**SCIENCE** is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484465) paid at Washington, DC, and at an additional entry. Copyright 1988 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $65. Domestic institutional subscription (51 issues): $96. Foreign postage extra. Canada $32, other surface mail $27, air-mail via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $3.00 ($3.50 by mail); back issues $4.50 ($5.00 by mail); Biotechnology issues, $5.00 ($6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $15 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCL) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCL, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/88 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes. The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
**Gas Bubbles in Fossil Amber as Possible Indicators of the Major Gas Composition of Ancient Air: R. A. Berner and G. P. Landis**

**RNA as an RNA Polymerase: Net Elongation of an RNA Primer Catalyzed by the Tetralymena Ribozyme: M. D. Been and T. R. Cech**

**Duchenne Muscular Dystrophy Gene Expression in Normal and Diseased Human Muscle: M. O. Scott, J. E. Sylvester, T. Heiman-Patterson, Y.-J. Shi, W. Fieles, H. Stedman, A. Burghes, P. Ray, R. Worton, K. H. Fischbeck**

**Human Immunodeficiency Virus May Encode a Novel Protein on the Genomic DNA Plus Strand: R. H. Miller**

**Localized Dispersal and Recruitment in Great Barrier Reef Corals: The Helix Experiment: F. W. Sammarco and J. C. Andrews**

**Anaerobic Dormancy Quantified in Artemia Embryos: A Calorimetric Test of the Control Mechanism: S. C. Hand and E. Gnaiger**
