**Articles**

889 The Steroid and Thyroid Hormone Receptor Superfamily: R. M. Evans
895 Global Sea Level and Earth Rotation: W. R. Peltier

**Research Articles**

901 Synaptic Rearrangement During Postembryonic Development in the Cricket: A. Chiba, D. Shepherd, R. K. Murphey

---

*SCIENCE* is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with *The Scientific Monthly* © Copyright 1968 by the American Association for the Advancement of Science. The title *SCIENCE* is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $65. Domestic institutional subscription (51 issues): $98. Foreign postage extra: Canada $33, other (surface mail) $37, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $3.00 ($3.50 by mail); back issues $4.50 ($5.00 by mail); Biotechnology issue, $5.50 ($6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for *Science* is 0036-8075/88 $1 + .10. Postmaster: Send Form 3579 to *Science*, 1333 H Street, NW, Washington, DC 20005. *Science* is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
COVER  Two-dimensional carbon-carbon double-quantum correlated nuclear magnetic resonance spectrum of a carbon-13 labeled protein, oxidized *Anabaena* 7120 ferredoxin (molecular weight 11,000). The lines represent the tracing of signals from the carbon chains of individual amino acid residues obtained with the "MADNMR" graphics program. See page 908. [B. H. Oh, W. M. Westler, P. Darba, and J. L. Markley, University of Wisconsin, Madison, WI 53706]

Reports

911 Calpain II Involvement in Mitosis: J. E. Schollmeyer

913 Identification and Characterization of a Neuron-Specific Nuclear Antigen in *Drosophila*: E. Bier, L. Ackerman, S. Barbel, L. Jan, Y. N. Jan

922 Theoretical Studies of DNA During Gel Electrophoresis: J. M. Deutsch

Book Reviews

930 Health, Illness, and Medical Care in Japan, reviewed by P. G. Steinhoff ■ The First Electronic Computer, P. E. Ceruzzi ■ Recombinant Lymphokines and Their Receptors, W. J. Leonard ■ Developments in Numerical Ecology, M. Williamson ■ Books Received

Products & Materials

934 Microbiological Growth Analyzer ■ Software for Braun-Blanquet Technique ■ UV-VIS Detector for SFC ■ Heatable Plastic Beaker ■ Chemical Structure Database ■ Antibodies ■ Literature
