Introducing **REFERENCE UPDATE™** — the enlightened approach to staying abreast of the scientific literature using your personal computer. This weekly service represents a whole new concept in keeping up with current publications in your field.

Each week subscribers will receive a single floppy disk containing the tables of contents from the current issues of more than 300 major journals of biology and medicine. Simply slip the disk into your computer and request any combination of authors, words in the title, and/or journal names. References that fit your retrieval request will immediately appear on the screen. You pay no line charges and retrieve only current references — not the ones that you already saw last week or last month.

If you wish, **REFERENCE UPDATE™** will automatically print reprint requests on special cards provided by RIS. Selected references may be entered directly into your Reference Manager® database or transferred into a disk file as a Medline formatted text file.

Of course we don’t have a weekly cartoon, “Current Comments®”, or a “Press Digest”. But neither do we require thumbing through page after page of irrelevant journals, or moving awkwardly between cryptic index numbers in the back pages and titles in the body of a booklet. All we do is provide the information that you need, on time, and in a form that is easy to use.

And the biggest surprise is that the new, enlightened way costs less. Our introductory charter subscription price (through September 1, 1988) is only $69.00 (plus $20.00 postage and handling) for a 26 week trial. Our regular price will be $250.00 a year — less than $5.00 a week.

**REFERENCE UPDATE™** is available for the IBM-PC and all compatibles as well as for the Apple Macintosh. Also available from RIS: Reference Manager® - the leading bibliographic management software, and Grant Accountant™ - for more efficient management of grant funds.

Circle No. 188 on Readers' Service Card
There must be a million places where you can sit back, relax and take your chances. Regrettably, a lab isn’t one of them.

Which is why we call your attention to an analytical balance like our METTLER AE.

It comes with automatic calibration. Which makes it amazingly accurate.

It goes through 100 hours of testing. Which makes sure it stays accurate.

It has a remarkably bright readout. Which makes sure what you’re seeing is accurate.

And it’s backed by METTLER service. Which if we humbly described as reliable, would also be accurate.

Now this high level of accuracy can’t help but provide you with a high level of something equally hard to come by.

Confidence. (Maybe that’s why more people in more labs use the AE more than any other analytical balance.)

So give us a call at 1-800-METTLER to find out more about the AE.

Unless, of course, you’re feeling lucky.

There are some places where gambling is perfectly acceptable.
Eppendorf
Ultra Micro Pipettes

From 0.5 \( \mu \text{L} \)… ultra micro accuracy by design.
Eppendorf brings superior performance and the convenience of air displacement to ultra micro pipetting. All Eppendorf Ultra Micro Pipettes feature a unique extended piston design that reduces dead-air volume and assures no carryover between samples. The result? Great accuracy at ultra micro settings.

Guaranteed performance in continuously adjustable and fixed-volume models.
The Eppendorf Ultra Micro Digital Pipette is the only continuously adjustable air displacement pipette with guaranteed performance from 0.5 to 10 \( \mu \text{L} \). Just twist the control button at the top of the pipette to select the desired volume, and a “click-set” ratchet mechanism will lock the volume in place—making accidental changes practically impossible. Four Eppendorf Ultra Micro Fixed-Volume Models, with built-in tip ejector, handle volumes of 1, 2, 5, and 10 \( \mu \text{L} \).

Top performance starts at the bottom.

For your other pipetting needs... up to 1000 \( \mu \text{L} \).
For volumes from 2.0 to 1000 \( \mu \text{L} \), three additional Eppendorf Digital Pipettes give you direct digital display of the set volume to assure precise, reproducible results every time. And all Eppendorf Digital Pipettes feature a “click-set” ratchet mechanism, maintenance-free seals, and a tip ejector.

Shaping the future. Brinkmann Instruments, Inc.
Now receive four peptides for less than others charge for one!

Custom Peptide Synthesis Redefined

Recent proprietary techniques and new optimized synthesis methodologies enable MPS, a company specializing in peptide synthesis and purification, to readily supply you with all the custom peptides you need, at a fraction of the cost and time of others.

Specialization has its rewards, such as:

AFFORDABILITY - We offer peptides to you at 1/4 of the price others expect you to pay!

AVAILABILITY - We can readily supply you with 50 mg of 100 completely different 15 residue peptides in 3 weeks!

QUALITY - Our peptides are of the highest quality available anywhere!

With MPS as your partner, quality, price, and availability will never be limiting factors in your research again. We'll help you make your research visions become realities. Call today at: 619-455-3710.

We can provide you with:

☐ HIV related peptides
☐ Anti-bacterial/Magainin peptides
☐ Neurologically active peptides
☐ Biologically active peptides
☐ Isotopically labelled peptides with 15N, 13C, D
☐ Tritium labelled peptides

MPS also offers:

Custom HP Cleavage Service and the state of the art HF Cleavage System.

A SPECIAL INTRODUCTORY OFFER

For a limited time, you can get custom peptides at the extraordinary prices listed below.

RECOMBINANT DNA WORKSHOPS

IBI continues to offer on-site workshops in the basic concepts and laboratory techniques of recombinant DNA. The four day “hands-on” course is designed for teachers and researchers with a scientific background but without previous laboratory experience in recombinant DNA technology.

Techniques covered in the workshop include:
- isolation and purification of plasmid DNA
- restriction enzyme digestions and mapping
- agarose gel electrophoresis and blotting
- recovery of DNA from agarose gels
- use of linkers and DNA modifying enzymes to join DNA
- fragments preparation and transformation of competent bacterial cells

Upcoming Workshop sites and dates are:

**JUNE 21-24**
Wright State University, Dayton, OH
Department of Biological Sciences

**JULY 19-22**
San Diego State University, San Diego, CA
Department of Biology

**JULY 26-29**
Cal. State University, Long Beach, CA
Molecular Ecology Institute

**AUGUST 2-5**
Cal. State University, Los Angeles, CA
Department of Biology

**AUGUST 16-19**
University of Wisconsin, Madison, WI
Department of Horticulture

**SEPTEMBER 13-16**
Cleveland State University, Cleveland, OH
Department of Biology

**OCTOBER 18-21**
University of South Carolina, Columbia, SC
Institute for Biological Research and Technology

**NOVEMBER 1-4**
Iowa State University, Ames, IA
Office of Biotechnology

**DECEMBER 5-9**
University of Alabama, Birmingham, AL
Department of Biology

Workshops will be conducted by David F. Betsch, Ph.D. of the IBI staff. Tuition is $495.00 ($US) for pre-registered individuals. Those registering within one month of the course date will be charged $595.00. Tuition includes all consumable materials for the course. Arrangements for meals and lodging are left to the individual participants.

For more information or registration, please call:

Ninhydrin by System Gold. A classic performed by a master.

Beckman has been doing successful amino acid analysis since Moore, Stein and Spackman pioneered it. So it's only natural we would offer you the first HPLC that really works with the classic methodology: ion exchange with ninhydrin derivatization. The preferred method for quantitative results.

It is unaffected by derivative stability during separation, eliminates interference from the sample matrix, and detects both primary and secondary amino acids in one run.

The key to your success is System Gold™, the Personal™ Chromatograph. Solvent delivery is precise, data integration easy, and results reliable. It even includes proven methods and a reference chromatogram on disk. So we can guarantee successful analyses.

Discover the pleasure of a classic performed by a master. Contact your local Beckman representative. Offices in major cities worldwide. Call 800/742-2345 in the US. Or write Beckman Instruments, Inc., Altex Division, 2350 Camino Ramon, P.O. Box 5101, San Ramon, CA 94583.
Now, it's easy.

The importance of glycosylation in protein function is fast becoming clear. Yet many researchers focus on the protein alone, because carbohydrates are much harder to analyze.

Unless, of course, you use the new Dionex BioLC™

An extravagant claim?

Until Dionex introduced the BioLC System, it could take several weeks to isolate oligosaccharides derived from a glycoprotein.

With the BioLC System, you can do it in an afternoon.

The BioLC gives you results faster and easier than any other chromatographic method. It detects low-picomole levels of carbohydrates directly and resolves positional isomers selectively. There's no derivatization. And sample prep is minimal.
THE GLYCO COPROTEINS.

More than just another HPLC.
Dionex's high resolution Micro-Bead™ Anion Exchange resins and pulsed amperometric detector (PAD) technology make BioLC the most sensitive and specific system available for analysis of carbohydrates—free or derived from glycoconjugates.

But that's not all!
Just add a UV detector to purify proteins by any FPLC® or HPLC protocol. Add other BioLC column and detector combinations to analyze nucleic acids, amino acids, organic acids, and ionic biological molecules. The BioLC is the only high-pressure, metal-free, quaternary gradient system capable of analyzing a complete range of biomolecules.

So, discover the glyco... and the protein
... and a whole lot more.
Find out how easy it is to discover the glyco in your glycoproteins. Call or write for a complete brochure and published literature on the extraordinary capabilities of the BioLC System.

Insulin-like Growth Factor bound to an IgG-Binding Protein

There's only one real choice in fast protein LC. The Waters 650.

If you want to transfer and scale up your open column methods on an automated LC with the convenience of storing up to 15 protocols, there's only one real choice.

If you need one instrument to isolate micrograms to grams of purified protein using any FPLC® Protein-Pak™ or self-packed preparative column, there's only one real choice.

If you're looking for complete system control and fast, error-free programming with a full screen CRT display, there's only one real choice.

If you want versatile methods optimization using linear or non-linear gradients with up to four buffers, there's only one real choice.

If you prefer a full range of UV detection options that includes programmable, tunable or fixed, there's only one real choice.

If you require complete methods documentation using either a personal computer or a recording integrator, there's only one real choice.

And if you're looking for a faster, better way to purify proteins, there's only one real choice—Waters™ 650 Advanced Protein Purification System.

Managing references just got easier.

Stop filing index cards and misplacing references! Organize them instead, with a specially designed database program called Pro-Cite® for the Macintosh (the all-new version of the Professional Bibliographic System).

Pro-Cite makes it easy to manage references. Now you can sort, search, or index references from journal articles, books, or any other source. Keep references organized, include long abstracts or notes, and format bibliographies in any style.

New!

Pro-Cite®
for the Macintosh!

Call (313)996-1580 today. Other PBS products for the Macintosh® include Biblio-Links® which transfer records from BRS, DIALOG, MEDLARS and NOTIS into Pro-Cite. Pro-Search® (a specialized communications program for searching BRS and DIALOG), Pro-Cite, and Biblio-Links are available for IBM® PCs and compatibles. Pro-Cite is now NOTCopy protected.

The superior fresh tissue sectioning system is now available in 2 versions, the standard Series 1000 and the new Series 2000 with expanded capabilities including:
- Specimen bath refrigeration
- Automatic sectioning repetition
- Motorized digital control of section thickness and specimen height

Circle No. 31 on Readers' Service Card

The deFonbrune-type Micromanipulator is also now available in 2 versions—classical free-standing model and new stage-mounted model. Features of this new stage-mounted Micromanipulator:
- May be used with any microscope, alone or in clusters
- Smaller—about 1/3 the size of the free-standing model
- Smooth, positive response to your every move
- Virtually zero drift, no backlash, unlimited positioning capability
- Easy to use single-handed joystick control for either right or left-handed operator

Circle No. 32 on Readers' Service Card

Microtools of many kinds may be readily fabricated using the deFonbrune-type Microforge.
- 6 movement controls
- Accomplish contact fusion/melting, remote fusion, micro-forging, fracturing, micro-glass blowing, distant/contact stretching
- Forge/fabricate with glass, metals, alloys, organic crystals, polymers, other fusible materials

Detailed literature available.

They say that variety is the spice of life. But the variety of life insurance products in the marketplace today poses a bewildering prospect—even for the most educated customer. Which is why it's refreshing to know that there's still a kind of life insurance whose appeal lies in its simplicity.

Not only is AAAS Term Life the purest kind of life insurance available, it is also the least expensive. And now that Group Rates have been cut another 15% effective 4/1/88 (they were also cut 10% last October), AAAS Term Life is an even better bargain.

If you're interested in applying for coverage from $15,000 up to $240,000, and wish to request generous protection for your family, too, the next step is simple.

Contact the Administrator, AAAS Group Insurance Program, 1255 23rd Street, N.W., Suite 300, Washington, D.C. 20037, or call toll-free (800) 424-9883 (in Washington, D.C. call 202-8030). They will be pleased to answer any questions you may have about this valuable member benefit.
**New Nalgene® Cryoware™ beats the others cold.**
The advanced labware system for improved cryogenic storage. All designed by Nalge, the first name in high-tech plastic labware.

**Cool Control with Nalgene Cryovials.**
We designed them right from the start. We put screw threads outside the vial where they belong. We gave the closure a longer skirt, for uncontaminated aseptic procedures. Our closure seals—without a gasket. And we gave the vial a conical bottom for easier sample extraction—and a flat base to stand on its own. Plus, an opaque marking area for your ID codes and an easy-to-read fill line. In 1.2- and 2-ml sizes.

**Cool Storage with Nalgene CryoBoxes.**
Isn’t it time you had all-plastic cryogenic storage boxes? Replace your flimsy cardboard or expensive stainless steel boxes with durable and economical Nalgene CryoBoxes. Grid and numbers on box top and inside keep track of inventory—one-way fit keeps grids lined up. In standard 9x9 array (81 vials) and a new 5x5 array (25 vials). Stackable. Autoclavable. Tough. Strong. Never brittle—even at -196°C!

**Cool Handling with Nalgene Cryovial Holders.**
Your lab deserves our new, all-plastic cryovial holders, too. Holder interlocks with up to 50 Nalgene Cryovials to allow single-handed operation. Molded-in alpha-numeric identification system. Autoclavable.

**Cool Fit with Nalgene CryoBox Racks.**
We didn’t forget to design new stainless steel racks, either. Our racks fit your existing mechanical or liquid-nitrogen freezers and Dewars. Retainers hold new Nalgene CryoBoxes securely and separately—release quickly. Racks hold your existing cardboard or stainless steel boxes, too. Order Nalgene Cryoware from your Authorized Nalgene Labware Dealer worldwide.

**Cool Thinking from Nalge.**
Call (716) 586-8800 now for more information and free trial samples of sterile Nalgene Cryovials. Or send us the coupon today.

**Send for free samples.**
Prove it to me that Nalgene Cryoware beats the others cold. Send free trial samples of Nalgene Cryovials and more information about advanced Nalgene Cryoware.

**Advanced Nalgene® Cryoware™**
Nalge Company
The ability to listen. The technology to respond.
Introducing the Protein Chromatography connection

It's software for protein purification. It's the new communications link for FPLC® System. It's called FPLCmanager™. Like a good manager, FPLCmanager is intelligent. Dedicated to the purification of biomacromolecules, FPLCmanager knows how to extract the essence from a protein chromatography separation. It knows how to control all parts of the system and how to make the best of them. It not only knows where to obtain the information you need, but also how to present it. And with a great memory for methods and chromatograms, it compares and evaluates your data effortlessly. FPLCmanager is also easy to work with.

If you work with proteins or other biomacromolecules, then you probably already have FPLC System. If you do, then you're likely to want this manager reporting to you immediately. If you don't, then perhaps Pharmacia LKB has even more help to offer. Consult us.

FPLC System takes you through your entire separation strategy - increasing the efficiency of your methods development and optimizing your final purification scheme - all with the intelligent system control and data handling capabilities of FPLCmanager.
If you've got better things to do than debug pages and pages of code, you need ASYST. It's the programming environment developed specifically for scientific and engineering applications.

ASYST simplifies data analysis and graphic display, and integrates them with data acquisition. Using ASYST, you can replace pages of low-level code with a few specialized commands. And it's easy to tailor to your changing applications. ASYST's simple configuration menus and our technical support will get you up and running quickly—and keep you there.

Call and discuss your application with one of our technical specialists. Or request more information.

Just make the next line of code you enter 1-800-348-0033. It'll put you on-line with ASYST, the scientific way to program.

Features:
- Analog-to-Digital, Digital-to-Analog, and Digital I/O Support
- GPIB/IEEE-488 Interface
- RS-232 Interface
- Sophisticated Analysis and Graphics

System requires IBM PC, XT, AT, or 100% compatible.

It's 2-fluoro-1-methyl pyridinium toluene-4-sulfonate. FMP chemistry for short.
But we call it Affinica.
It's a superior affinity chemistry. With a better binding capacity than other chemistries.
How much better?
Affinica Protein A gels bind over 30% better than CNBr. Or CDI. Or NHS.
They bind more because of higher ligand density. As much as 200% more ligand per ml than other gels.
And Affinica Protein A optimizing buffers are available to provide the highest possible immunoglobulin recovery.

S&S HIGH STANDARDS.
S&S products like NC nitrocellulose have been number one with you for decades.

Affinica products include the Affinica Protein A Starter Kit which features a multiple-use 1 ml cartridge and buffers. Affinica gels are available in pre-packed cartridges (five/pack) or in bulk, so you can pack your own columns. More ligands and other Affinica products will become available later this year.

And just like those products, Affinica gels and buffers come with something extra. Like dedicated technical support as close as your phone.
Not to mention the consistently high standards for which you've come to rely on us.

Circle No. 195 on Readers' Service Card

WE WANT TO HEAR FROM YOU.
Call us with your questions or to get the latest information on Affinica products.
By calling, you can become a member of the Affinica Access Group.
You'll receive regular mailings containing literature and news about Affinica products. All free.

Time to start planning your valuable visit to this year's British Laboratory Week! It's the UK's premier scientific industry gathering — and it has a great deal to offer.

There are four major exhibitions — LABORATORY, BIO '88, COMPUTER-AIDED-SCIENCES and MEDICAL LABORATORY SCIENCES. Each presenting more stands than ever before. Also at Olympia — the prestigious ANALYTICON CONFERENCE, plus a technical book fair, employment exchange and photographic competition.

We can promise you'll enjoy your visit to "The Week" — and that it will be a really rewarding professional experience.

Mail the coupon, and we'll send you FREE tickets for the exhibition of your choice. Which are also valid for the other three events. But please do it NOW — those who arrive at Olympia without a ticket will have to pay £5 to get in!

Circle No. 259 on Readers' Service Card

We plan a handsome and readable newsletter, brief, well-written, and packed with information. It will carry short features, commentary, interviews, profiles, humor (and, of course, news about AAAS activities), all focusing on policy and professional issues. The 16-page 2-color format will be illustrated with drawings and photographs.

The clever member whose suggested name is adopted will get a stack of memo pads featuring the newsletter's logo... and two free admissions to the next annual meeting, January 14-19 in San Francisco. The four runners-up will also be admitted to the meeting at no charge.

You must be a member of AAAS to enter, but not on the staff or Board of Directors. (Other officers, for example Section chairs, are eligible, however.) No statutory limit on number of entries, but the judges respectfully request that you winnow yours down and send only the best. Your entry must be postmarked before midnight Sunday, June 26.

A lively new periodical is in the works for AAAS members, and it needs a name. So we're having a contest to name it.

Send entries to:

New Directions
in Chemical Research

Frontiers in the Chemical Sciences
Selected and with an introduction by
William Spindel and Robert M. Simon, National Research Council

This collection of 38 articles from the pages of Science shows chemists unraveling the mysteries of molecular reactivity, developing powerful analytical and theoretical tools, exploring and exploiting new pathways for catalysis and synthesis, and contributing to disciplines as diverse as biology and materials science. Focusing on such themes as fundamental chemical change and extreme molecular complexity, this volume takes the reader on a tour of the contemporary research frontiers in chemistry. Articles by some of the leading scientists in their respective fields cover new work in seven key areas: understanding chemical reactivity, chemical analysis, theoretical chemistry, chemical catalysis, organic synthesis, the chemistry of life processes, and the chemistry of new materials. Two Nobel lectures are included.

**Deadline for nominations is 1 October 1988**

---

**1989**

**AAAS — Scientific Freedom and Responsibility Award**

**To Encourage Scientists and Engineers to Reflect Upon the Social Implications of their Professional Actions**

The AAAS Scientific Freedom and Responsibility Award, established by the AAAS Board of Directors in 1980, is awarded annually to scientists and engineers who have:

- acted to protect the public’s health, safety, or welfare; or
- focused public attention on important potential impacts of science and technology on society by their responsible participation in public policy debates; or
- established important new precedents in carrying out the social responsibilities or in defending the professional freedoms of scientists and engineers.

You are invited to submit nominations now for the 1989 award, to be presented at the 1989 AAAS Annual Meeting in San Francisco. A recipient of the award is selected by a panel of judges appointed by the AAAS Board of Directors. The deadline for receipt of entries is 31 July 1988.

 Requests for nomination forms and more information should be sent to: *Scientific Freedom and Responsibility Award*, AAAS, 1333 H Street, NW, Room 1101, Washington, DC 20005.
NitroPlus 2000™ membranes from MSI are 500 times stronger than traditional nitrocellulose. These high-strength membranes are so tough, they’re guaranteed not to crack or chip during standard transfer procedures.

Developed and patented by MSI, NitroPlus 2000 membranes have the classic binding characteristics of standard nitrocellulose; no protocol modifications are needed. In addition, NitroPlus 2000 membranes are sensitive to DNA, RNA and protein and can be direct stained. They are ideal for capillary Southern and Northern blots, all types of Western blots, plaque lifts and colony hybridization.

With versatile NitroPlus 2000 membranes, up to six reproblings can be successfully completed without shrinkage, swelling, curling, or loss of performance... despite the rigors of numerous washing and stripping steps. Finally, repeating procedures due to membrane breakage and data loss is eliminated.

Stop losing valuable research time and avoid the expense of repeating procedures due to membrane breakage. For a free sample of NitroPlus 2000 membranes, or information on MSI’s broad selection of membrane and filtration products, call 1 800 444-8212. Or tear and forward the coupon below.

Revolutionary NitroPlus 2000 membranes are another one of the innovative products in membrane technology developed by Micron Separations Inc. Committed to providing unique solutions for diverse challenges, our superior line of hybridization membranes, filters, prefilters, filtration devices and filtration units are available worldwide. For the distributor nearest you call 1 800 444-8212.

Please forward a free sample of the unbreakable NitroPlus 2000 membrane from MSI (0.45μm sample size, 15cm x 15cm).

Also, send a catalog in the following areas of interest:

- □ Laboratory Filtration
- □ Process Filtration
- □ Molecular Biology

Circle No. 232 on Readers’ Service Card
Pharmacia LKB Molecular Biology announces the expansion and revision of our sequencing product line. As rapid, accurate DNA sequence analysis is an important technique for increasing your knowledge of gene structure, we now offer a coherent sequencing framework from which you can select kits and components—all utilizing significant advances in sequencing technology. Sequence single-stranded M13 template or double-stranded DNA directly, using high quality reagents which will routinely give sharp bands with low background for clean, easy-to-interpret results.

"Core" kits have new formulations to generate longer chain-terminated fragments during sequencing reactions. Mixes (Deaza Mixes too!!) are modular replacement kits for the mixes in the core kits—ideal if you prefer to set up your own sequencing procedures but wish to take advantage of our new formulations.

PC3D™

three dimensional reconstruction software

Reconstruct multi-colored three dimensional computer models of any object from serial section data. Display the reconstructed image, rotating and viewing it from any angle or orientation. Automatically calculate volumes of elements. Output 3-D images to plotter.

Analyze and sort out complex structures (e.g. intertwined neurons). Components may be removed or replaced at will, allowing computer "dissection" of complex objects. Up to 400 polygons per section, 1000 serial sections per image. Applications in electron and optical microscopy, macroscopic sectioning, CAT scans, positron emission tomography, NMR imaging, autoradiographs, and more.

Astronomy & Astrophysics

Edited by Morton S. Roberts

Selected from articles published in Science between 1982–1984, these 24 papers are divided into four parts: Solar System, Structure and Content of the Galaxy, Galaxies and Cosmology, and Instrumentation. The volume reveals a broad, coherent, and contemporary picture of our astronomical universe. Includes two Nobel Prize lectures. Fully indexed and illustrated. 1985; 384 pages.

Hardcover $29.95
Softcover $17.95

Order from AAAS Marketing, Dept. Q, 1333 H Street, NW, Washington, DC 20005.
Add $1.50 postage and handling.
