More Innovations from Beckman
Your Complete Centrifugation Source

Beckman is more than the world's premier ultracentrifuge company. Beckman has become the pacemaker for all types of centrifugation.

With the new general purpose GP tabletop and floor model centrifuges—an instant success with their large capacity (up to three liters) and high performance (3750 rpm/3200 g). And they're the only compact centrifuges that can spin 250-mL conical bottles.

With the workhorse TJ-6 tabletop. Like the GP, it's available refrigerated or unrefrigerated and can spin horizontal and fixed angle rotors, tube racks, microtest plates, blood bag cups. Great versatility, at new low prices!

With the refrigerated AccuSpin™ FR tabletop that has digital speed, time and temperature controls for unmatched accuracy and precision.

With microcentrifuges that have been spinning away in labs around the world since 1960. Our newest star performer: the economical Microfuge® E with momentary button for "mini-spins." Two other Microfuge models with advanced features and controls also are available.

And, no matter which of these centrifuge types you choose, there is an aerosol protection system for it. Extra safety when working with infectious materials. (See photo inset.)

More originals from Beckman! All designed, manufactured, tested, sold, warranted and serviced by Beckman, the complete centrifuge company.

Circle No. 55 on Readers' Service Card
(A) Parafilm Dispensers - Available in 2" and 4" sizes, CAT# 400031, 400032 - These dispensers will hold a full 250 ft. roll of Parafilm®. They may be well mounted (hardware included) or used on the bench. The outer dimensions are 226 mm x 60mmW (2") or 120mmW (4") (additional cutting edge is included). The Parafilm can be dispensed and cut with one hand, eliminating the need for scissors.

(B) StrataCooler - CAT# 400001 - The StrataCooler can be used to prolong the life of expensive enzymes in two ways; 1) by maintaining them at a constant -20°C in your freezer; 2) by maintaining them on your bench top for 2 hours at -20°C to -15°C. StrataCooler provides protection for enzymes stored in frost free freezers.

(C-1) Mini Agarose Gel Electrophoresis Box CAT# 400042 - The gel box is constructed of U.V. transparent acrylic to allow easy viewing of the test sample without removing the gel. The platinum current wire is embedded in the acrylic with silicone to make the connection extremely corrosion resistant. Exterior dimensions are 170mm x 87mmW x 48mmH. Gel bed is 88mm x 75mmW. Power supply leads and a safety top are included, as well as three gel combs, and a support bridge.

(C-2) Agarose Gel Electrophoresis Box CAT# 400048 - This agarose electrophoresis box is similar to our mini-gel box but can accommodate two gel combs side by side. Exterior dimensions are 170mmL x 170mmW x 48mmH. Gel bed is 160mmW x 88mmL. Power supply leads and a safety top are included, as well as three gel combs, and a support bridge.

(D) Gel Scoops - Size: 3" (70mm) Wide, 6" (150mm) Wide - CAT# 400057, 400052

This scoop is constructed of U.V. transparent acrylic and has a beveled edge to facilitate transfer of gels from electrophoresis box to U.V. monitor without breakage. The outer dimensions, excluding the handle, are: 70mm x 90mm and 150mm x 110mm.

(E) Radioactivity Shield - Size: 14-1/2"W x 21"H x 17"W x 21"H - CAT# 400020, 400021 - It is constructed of one-half inch, shatter resistant, acrylic for maximum protection. This radiation shield has a back-sloped top piece for comfortable viewing without exposure to radiation. Unit is supported by acrylic side bars with cut outs which allow a convenient working position. Two widths are available to allow you to choose the size most comfortable for your needs.

(F) Radioactivity Transport Box - CAT# 400104

This is a heavy-duty, one-half inch, closed cylinder which shields the researcher from radiation when transporting radioactive substances. The top and bottom interlock for a secure closing. Interior dimensions are 90mmH x 64mmD. Each box comes with a rack that will hold seven microfuge tubes.

FROM 1 GOOD IDEA TO 9 MILLION BASE PAIRS

Good ideas have a way of growing.

Today a good new idea—Pulsaphor™ pulsed-field gel (PFG) electrophoresis—has taken root and eliminated the difficulties that separation of large DNA molecules has previously posed. Separation of up to 9 million base pairs, with ultra-high resolution, is now a growing reality.

How so? PFG electrophoresis uses two alternating electric fields, applied at different angles for different time periods, to stretch coiled molecules across a horizontal plane. Agarose gel block embedding, using whole cells, protects the vital integrity of the DNA molecules. Novel enzymes and reagents are then employed to digest the chromosomal proteins and other cell components.

Control of the pulse time predetermines the size of molecular separations. Control of the electric field shape increases the resolution by sharpening the separated bands. The result is not only high-resolution separation of large molecules, but also dramatically improved resolution in the separation of smaller DNA fragments.

NEW! The new Pulsaphor Plus Control Unit permits programming of the precise pulse and run times that will produce straight lanes for clear, accurate analysis. And up to 9 separate run procedures can be stored in memory for future separations.

NEW! Choose between two electrode kits, the conventional point electrodes or the new hexagonal kit, for the flexibility to run present and future variations of the PFG method.

Think about it. Nine million base pairs from one basic idea! Contact your nearest Pharmacia LKB representative today and ask about PFG and Pulsaphor Plus. It's a good idea that you can grow with.
It Takes only $4500 to Own the WINner.

When it comes to chromatography workstations, you don't always get what you pay for. Unless you pick the WINner.

The WINner is a new and complete Workstation/INtegrator for chromatographers who want a complete solution at a completely affordable price.

With the WINner, you get an IBM-compatible Epson Equity computer, a 20-Mbyte hard disk, and Spectra-Physics' industry-standard integrator, the SP4290.

You also get a full complement of laboratory-proven Spectra-Physics chromatography applications software, high-resolution graphics, and direct data transfer to Lotus and other general purpose programs.

But what really puts the WINner out in front of its competition is the way it works. The WINner gives you true multi-tasking with continuous real-time plots and reports, from one or two data channels, right at your chromatographs. At the same time, the computer is always available for other tasks. And you never miss a run or lose data.

Best of all, you get it all—for $4,500!*

So if you're looking for a chromatography workstation to put your money on, go with the WINner. It's a sure thing.

In the U.S., call toll free 800-424-7666. Spectra-Physics Autolab Division, 3333 North First Street, San Jose, CA 95134.

*Price for U.S. only. For prices outside the U.S.A., contact your Spectra-Physics representative.
How to develop new products.

There's no faster, easier way to document, review, analyze or present your R&D findings than with Polaroid instant images. The images on the left were created in seconds using Polaroid instant films and imaging systems. They show just a few of the many ways that Polaroid can help you develop and research new products.

PolaPan Type 52 sheet film was used to capture this split-field S.E.M. of an integrated circuit (Fig. 1). This black and white, fine grain print film offers a wide tonal range and provides superb detail.

To capture the subtle color differentiations in this CAD/CAM image of a ball bearing (Fig. 2), new High Contrast PolaChrome 35mm Instant Slide Film was used. New High Contrast PolaChrome provides bright, high quality, color slides in minutes for presentation or documentation.

The longevity test of an alternator operating in excessive heat (Fig. 3) was taken from a thermography system using the Polaroid FreezeFrame Video Image Recorder and color AutoFilm Type 339.

An x-ray spectrum to determine the composition of a stainless steel specimen (Fig. 4) was taken from an energy dispersive analyzer using the Polaroid DS-34 Direct Screen Camera and Polacolor ER Type 669 film.

This S.E.M. image of a heart valve, magnified 18× (Fig. 5), is on Type 55 instant film. This black and white sheet film provides both a positive and negative to make high quality, professional images.

In color or black and white. In prints, 35mm slides, or overhead transparencies. In house. In seconds. If you have a research and development application Polaroid has a solution to help you document your findings. And you get it all A.S.A.P.—As Soon As Polaroid instant images. For a complete brochure about Polaroid instant imaging solutions for the R&D field, or for a free consultation, call 1-800-343-5000. Or write, Polaroid Corporation, Dept. 693, P.O. Box 5011, Clifton, N.J. 07015.

A.S.A.P.
As Soon As Polaroid

They say nothing lasts forever. Which may not be entirely true.

Consider for a moment a lab balance like our METTLER PM. It's built to be precise. (An ingenious feature called "electronic calibration" makes sure a PM is very precise.)

And it's built to be simple to use. (An even more ingenious feature called "DeltaTrac" helps you see what you're doing, making it very simple to use.)

But more importantly, a PM is built to stay precise and simple to use.

Why do you suppose we give each PM such a rugged housing? Or back it with more service than you may ever need? Or why in the world do you think we subject it to over 100 hours of tests before you're allowed to subject it to one minute of use?

The truth is, we have a rough idea of what you'll eventually put a PM through. So we simply try to put a PM through it first.

To find out more, call us at 1-800-METTLER.

Here's to a long, full life.

Circle No. 83 on Readers' Service Card

The last thing the world needs is something else that won't hold up.
Introducing the fastest, most accurate densitometer ever.

Molecular Dynamics' new 300A Computing Densitometer reads a 36cm x 42cm electrophoresis gel or film in less than 3 minutes. That's 500-1000 times faster than most other densitometers on the market.

And the same technological breakthrough that gives the Model 300A its speed gives it unequaled dynamic range.

The 300A scans the entire sample area in both directions — not just a "representative" line. A proprietary, high-efficiency light collection system measures virtually all the light that passes through the sample. And since the light comes from a high-intensity laser, accuracy is better than 1% — even on the darkest spots.

In other words, the 300A doesn't miss anything. Resolution is an incredible 14,000 points per cm? The density at each point is measured with 12-bit precision (4096 density levels). And all this information is stored safely on the high-capacity disk drive of a built-in computer.

Which brings up another point. The Model 300A puts you in control of data processing. Powerful analysis tools let you measure peak areas and volumes quickly. You choose the data display format: color contour maps, 3-D projections or electrophoreograms. If you need statistical analysis, Microsoft WINDOWS™ software makes it easy to transfer results into programs such as EXCEL.

The new Model 300A Computing Densitometer. It's about time. And a whole lot more.

To find out about the Model 300A, call or write for our new booklet, How to Choose a Densitometer. It only takes a couple of minutes to read. In the long run, you'll save a lot of time.

**Phosphoinositide assays**

**A unique quantitative assay**

*D-myo-Inositol 1,4,5-trisphosphate (IP₃) [*³H*] assay system* TRK.1000

- Utilizes a high specific activity tritiated tracer together with a specific IP₃ binding protein.
- Specific for the 1,4,5-isomer.
- Allows rapid and accurate measurement of IP₃ in cells and tissues.

**Novel inositol products**

Two new tritiated inositol products specially developed to give ‘low blanks’ in phosphoinositide turnover assays.

**myo-[2-*³H*] Inositol with PT 6-271**

370-740GBq/mmol, 10-20Ci/mmol, TRK.911

**myo-[*³H*] Inositol with PT 6-271**

2.96-4.44TBq/mmol, 80-120Ci/mmol, TRK.912

- Contain PT 6-271 — a polymer specially developed to continuously remove radiolytic decomposition products which gives low blanks (less than 0.005%) in assays measuring phosphoinositide turnover.
- Supplied in solution in water — no removal of interfering organic solvents is required and the products may be used straight from the vial.

**Convenient sample preparation in phosphoinositide assays**

Amprep™ minicolumns provide a convenient alternative to Dowex ion-exchange resins.

**Amprep SAX minicolumns (100mg)** RPN.1908

- Rapid separations
- Good recoveries
- Small elution volumes

Precision control peristaltic pump

Tris" is the peristaltic pump that's different. You get three channels, precision control with 2% reproducibility, robust metal construction, electronic intercommunication with your other instruments, a three-year warranty, and a price lower than you're asked to pay for someone else's single channel plastic model. The snap-out tubing cassettes give you uniform channel-to-channel flow and long tubing life—all without manual adjustment.

To order or get more information, phone toll free (800)228-4250. Or write Isco, Inc., P.O. Box 5347, Lincoln, NE 68505, USA.
Amplify DNA in hours, not days, with the new DNA Amplification System.

A new amplification technique allows you to obtain microgram quantities of DNA from picogram amounts of starting material. This patented* procedure — called the Polymerase Chain Reaction (PCR) — amplifies, in vitro, a target DNA sequence at least 100,000-fold in just hours instead of days. Developed by Cetus scientists, PCR represents a major breakthrough in molecular biology.

OPTIMIZE THE PCR ADVANTAGE

And now, Perkin-Elmer Cetus Instruments extends the PCR revolution with the introduction of a system that optimizes the technique's speed and efficiency. We call it the DNA Amplification System. All the tools you need to perform the PCR technique in your research laboratory.

GENEAMP™ KIT—THE ONLY PCR KIT

All the necessary high quality reagents optimized for the PCR technique, including the thermostable enzyme, Taq Polymerase. With one kit, you can perform 100 individual assays quickly and efficiently. Or, if you prefer, purchase Taq Polymerase separately.

DNA THERMAL CYCLER—AUTOMATE THE PCR TECHNIQUE

A sophisticated, yet easy-to-use, programmable temperature cycling instrument. Just place your sample in the instrument, program your cycle profile, and walk away.

To find out about our innovative products for DNA amplification, synthesis, purification, and quantitation, call your Perkin-Elmer Representative. For ordering information and technical support in the U.S., call 1-800-762-4001. For literature, call 1-800-762-4000.

Now, Taq Polymerase is available.

The name "Narishige" is recognized worldwide for high quality micromanipulators and microinjectors. Now, Narishige USA brings the technology of cell injection to an impressive new level. With our remarkable IM-200 Micro-Injector you can make intracellular or extracellular injections, via digital settings of pressure and time over a wide range of volumes, with precision and reproducibility. Yet it's so simple that beginners can work with as much confidence and ease as experienced users. Best of all, the IM-200 is an exceptional value.

Narishige USA offers an extraordinary system for cell experimentation, of which the IM-200 is but one part. All equipment, including Micromanipulators, Microinjectors, Microforges, Microgrinders and Micropipette Pullers can be purchased separately.

A growing micro-research community turns to Narishige USA whenever they need precision products. Should a question ever arise, Narishige USA will be there with expert telephone support. Call for a detailed brochure and the name of the dealer closest to you: 1-800-445-7914.

It’s easier to rip the one on the left.

NitroPlus 2000™ membranes from MSI are 500 times stronger than traditional nitrocellulose. These high-strength membranes are so tough, they’re guaranteed not to crack or chip during standard transfer procedures.

Developed and patented by MSI, NitroPlus 2000 membranes have the classic binding characteristics of standard nitrocellulose; no protocol modifications are needed. In addition, NitroPlus 2000 membranes are sensitive to DNA, RNA and protein and can be direct stained. They are ideal for capillary Southern and Northern blots, all types of Western blots, plaque lifts and colony hybridization.

With versatile NitroPlus 2000 membranes, up to six reprobing can be successfully completed without shrinkage, swelling, curling, or loss of performance...

despite the rigors of numerous washing and stripping steps. Finally, repeating procedures due to membrane breakage and data loss is eliminated.

Stop losing valuable research time and avoid the expense of repeating procedures due to membrane breakage. For a free sample of NitroPlus 2000 membranes, or information on MSI’s broad selection of membrane and filtration products, call 1 800 444-8212. Or tear and forward the coupon below.

Revolutionary NitroPlus 2000 membranes are another one of the innovative products in membrane technology developed by Micron Separations Inc. Committed to providing unique solutions for diverse challenges, our superior line of hybridization membranes, filters, prefilters, filtration devices and filtration units are available worldwide. Dialog puts ideas in motion. It's the force that changes the way you look at problems and solutions. Maybe even previous hypotheses.

We're the largest online knowledgebank in the world. Our databases have the chemical property, toxicity, regulatory and patent information you need.

We have chemical substance, substructure and identification information online. Dialog also offers other databases covering molecular formulae, ring data and properties.

But what really sets Dialog apart is how thoroughly we cover so many different industries from chemistry to agriculture to biotechnology. We can make a big difference when a project demands more than chemical information. Since it's all on one service, you'll have what you need, quickly and easily.

With Dialog you get more than in-depth information. You get quality service and training.

We're reasonable, too. All you pay for is the time you spend using Dialog. There is no minimum usage requirement.

So when you need a catalyst to get ideas going, or to push them further, turn to Dialog. And watch how your mind reacts.

BIOTECHNOLOGY: The Renewable Frontier

Edited by Daniel E. Koshland, Jr.
Editor, Science

Discoveries in the modern biology laboratory are of great practical importance in industry today, as they have been in medicine for many years. This volume clearly illustrates the extraordinary cross-disciplinary aspects of modern biology and its tremendous impact on the future. Like its 1984 predecessor, this collection presents the latest and most important topics at the forefront of biological research. Compiled from papers in Science, 1985.

Contents

I. New Techniques
   In Vitro Mutagenesis
   Novel Genomes of Large DNA Viruses
   Heterologous Protein Secretion from Yeast
   Genetic Linkage Map of the Human X Chromosome
   Protein Insertion into & Across Membranes

II. Immunology
   Transfectomas to Novel Chimeric Antibodies
   Histocompatibility Antigens on Murine Tumors
   Factors in Protein Antigenic Structure

III. Developmental Biology and Cancer
   Spatially Regulated Expression of Homeotic Genes in Drosophila
   Plasticity of the Differentiated State
   Oncogenes in the Cytoplasm & Nucleus
   Granulocyte-Macrophage Colony-Stimulating Factors
   X-Ray Structure of Displatin with DNA
   Immunoglobulin Heavy-Chain Enhancer: Tissue-Specific Factors

IV. Hormones and Metabolism
   Atrial Natriuretic Factor
   The LDL Receptor Gene
   Human von Willebrand Factor

V. Biotechnology
   Biotechnology & Food
   Drug Biotechnology: The Japanese Challenge

VI. Virology
   Nucleotide Sequence of Yellow Fever Virus
   Three-Dimensional Structure of Poliovirus

VII. Plant Sciences
   Arabidopsis thaliana & Molecular Genetics
   Safety & Genetic Engineering in Agriculture

VIII. Behavior and Sensory Phenomena
   The Cellular Basis of Hearing
   Insect Colony Sociogenesis
   Neurotrophic Factors

1986; 400 pp., comprehensive index, 125 illustrations and tables
Hardcover $29.95; AAAS members $23.95 ISBN 0-87168-314-7
Softcover $17.95; AAAS members $14.35 ISBN 0-07168-283-4

Whatever will be, will be wonderful—if you start planning for your future now.

And a good place to start is with TIAA and CREF Supplemental Retirement Annuities. SRAs are tax-deferred annuities that supplement your pension plan and can help you save the "extra" you'll need to really enjoy your retirement.

Since contributions and earnings are tax-deferred until you retire, SRAs not only help you save for the future, they help you save today—by paying less taxes on your current income.

What's more, with SRAs you can choose to diversify between TIAA, a fixed-dollar annuity, and CREF, a variable annuity. With CREF's variable annuity, you have two investment options—CREF's common stock and money market accounts. At retirement you can even choose to receive your payments in a lump sum, for a fixed period, or as lifetime income.

So consider SRAs now. To help your retirement be whatever you want it to be.

TIAA-CREF. Pension planning expertise for the education and research communities.

Ensuring the future for those who shape it.®

For more complete information, including charges and expenses, call 1-800-842-2733 for a prospectus. Read the prospectus carefully before you invest or send money.

**Michigan State University**

**CONFERENCE ON**

**TOXICOLOGICAL IMPLICATIONS OF ALTERED GAP JUNCTIONAL INTERCELLULAR COMMUNICATION**

**September 28-30, 1988**

**Michigan State University**

**East Lansing, Michigan**

This meeting will bring together cell biologists and toxicologists to examine scientific evidence which suggests that toxic chemical modulation of gap junctions and/or intercellular communication can be responsible for such divergent endpoints of toxicity as abnormal development, carcinogenesis, reproductive dysfunction, neurological disorders, and immune modulation.

There will be a contributed poster session. The deadline for submission of abstracts is August 15, 1988. A not more than 250-word summary of work to be presented should be sent to:

**Dr. Michael Kamrin,**

Center for Environmental Toxicology, C231 Holden Hall, Michigan State University, East Lansing, MI 48824, USA.

Speakers include:

Barbara Yancey, California Institute of Technology
Elliott Hertzberg, Baylor College of Medicine
David Spray, Albert Einstein College of Medicine
Robert Garfield, McMaster University
Marc Pelletier, University of Ottawa
Paolo Meda, University of Geneva
James Trosko, Michigan State University
Gary Williams, American Health Foundation

**Advances in Cognitive Science: Steps Toward Convergence**

Edited by Manfred Kochen, *University of Michigan*, and Harold M. Hastings, *Hofstra University*

Computer science and biology—two fields that were once widely divergent—are increasingly influencing one another and converging into a new, more comprehensive area of cognitive science. This book, based on a AAAS Annual Meeting symposium, focuses on issues of evolutionary learning, thereby stimulating fresh ideas for research. Its multidisciplinary discussions integrate methods and concepts in imaginative ways, offering a unique perspective on the state of the field and on directions for future study. This volume should prove valuable to psychologists, computer scientists, biologists, and anyone interested or involved in artificial intelligence or cognition.

$45.00; AAAS members $36.00 (include membership number from Science). 283 pp., 1988. AAAS Selected Symposium 104.

Order from: Westview Press, Dept. AAAS, 5500 Central Avenue, Boulder, CO 80301. (Add $2.50 postage and handling for the first copy, 75 cents for each additional copy; allow 4–6 weeks for delivery.)

Published by Westview Press for AAAS
