The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in promoting the welfare of human kind, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Does it matter whether the United States is competitive in the global marketplace? Several articles in this issue of Science focus on that question and how economic competitiveness affects not only individuals and government but also our industries, particularly high-technology industry. See page 299. [Cover design by John L. Heinly, Burke, VA 22015]
