Only the sample breaks down. Brinkmann homogenizers make the difference—in 30 seconds. Rapid action preserves biological integrity. Brinkmann homogenizers take advantage of mechanical shearing and cavitation to assure you of uniform sample breakdown in only 30 to 60 seconds. This rapid action protects your samples from inactivation by heat generated during prolonged homogenization. Powerful, durable motors work harder. Brinkmann homogenizers use AA.4.7 7% of NaCl heavy aqueous, rawp speed, VU and a complete range of accessories. For more information: call 800-645-3050; in New York, 516-334-7500.
