DABS brings stability to reversed phase amino acid analysis.

Stability. It's more than holding something steady for just a moment. It's keeping it that way. For a long, long time.

With DABS you won't measure derivative stability in minutes. Or even hours. DABS remains stable for weeks.

So you can do repeated runs from the same sample. Or go back days later and analyze a sample again using the same derivative, the same method—without changes.

And DABS only takes minutes to set up with our exclusive Dabsylation Kit.

Add the advantages of visible detection, and DABS is obviously the wise choice for high speed, high sensitivity amino acid analysis.

And because you'll be using the world's easiest, most advanced HPLC—System Gold, the Personal Chromatograph—you'll have guaranteed methods and reference chromatograms available on disk.

To add stability to your reversed phase amino acid analyses, contact your local Beckman representative. Offices in major cities worldwide.

Call 800/742-2345 in the US. Or write Beckman Instruments, Inc., Altex Division, 2350 Camino Ramon, P.O. Box 5101, San Ramon, CA 94583.

REACH FOR A COOL ONE!

Introducing STRATACOOLER II™
Your Portable -20°C Benchtop Freezer

While at your lab bench, or anywhere your research may lead you, the Stratacooler II is designed to maintain subzero temperatures. Within your -20°C freezer the Stratacooler II insulates your enzymes from periodic temperature increases due to open freezer doors, frost-free cycles, or power loss. Your Stratacooler II will maintain your enzymes at -15°C for up to two hours at your work area.

The Stratacooler II has all of the features of the original Stratacooler with several enhancements. The new shape facilitates transportation and handling of the cooler. Stratacooler II is also designed for efficient stacking and easy access using racks available from Stratagene.

The Stratacooler II accommodates 32 standard microcentrifuge style tubes. Each unit is thoroughly tested and guaranteed to perform to specifications.

Please call for a catalog and details: 1-800-548-1113

In Europe:
Stratagene GmbH
Postfach 105466
D-6900 Heidelberg
(Federal Republic of Germany)

For orders outside the USA or Germany please contact Stratagene for the distributor nearest you.
The World's Most Effective Separation Tool

It's the Beckman TL-100 tabletop ultracentrifuge for rapid, efficient runs.

The proof is in the applications literature:

- Isolate both DNA and RNA in one 3-hour CsCl gradient run in the TLS-55 rotor.

- Prepare rabbit reticulocyte fractions with four times the protein synthesis activity of conventional preparations in 20 minutes using the TLA-100.2.

- Isolate DNA in 4-5 hours on CsCl-ethidium bromide gradients run in the TLA-100.2 rotor.

- Pellet RNA through a CsCl cushion in 2.5 hours using the TLS-55 rotor.

- Separate lipoprotein fractions by a single 25-minute spin in the TLV-100 rotor.
  J. P. Segrest et al., Beckman TL-100 News 1:2, 1-2 (Dec. 1986)

- Prepare a protein-free plasma fraction for drug binding studies by a 1-hour run in the TLA-100.2 rotor.
  T. Zysset, Ther. Drug Monit. 9, 433-438 (1987)

- Clarify solubilized membrane proteins in 15 minutes in the TLA-100.2 rotor.
  P. H. Lin et al., Biochemistry 26, 731-736 (1987)

- Separate lipoprotein fractions using single or serial 2.5-hour runs in the TLA-100.2 rotor.

- Estimate sedimentation coefficient of a protein from a 4-hour sucrose gradient run using the TLS-55 rotor.

Small wonder the TL-100 has become the fastest selling ultracentrifuge in the world!

For more information, including our new annotated applications bibliography with over 100 literature references, contact Beckman Instruments, Inc., Spinco Division, 1050 Page Mill Road, Palo Alto, CA 94304. (800) 742-2345. Offices worldwide.

Gilson fraction collectors have always been reliable. Our newest offers 98% problem-free performance.

Whether you need simple or sophisticated collection techniques, the one thing you need is a collector that performs day-in and day-out. Without jamming. Without breaking down. That’s the kind of reliability built into every Gilson fraction collector...from the very first in 1957 to the very latest introduced in 1986.

Stationary rack system is one of our secrets to problem-free performance.

Many collectors have rotating carousel racks. Some of our earliest models did, too. But we soon recognized the advantages of a stationary rack. With fewer moving parts, the chance of mechanical problems is greatly reduced. The FC 203, since its introduction three years ago, has achieved a problem-free performance record of 98%. The stationary rack system is just one of the reasons why.

Built for long-term use...inside and out.

To assure optimal performance over time, internal drive components are designed for long-term use—even in the cold room. Critical components are metal, rather than plastic, for long-lasting operation.

And, the exteriors of Gilson fraction collectors are durable, too. For example, the FC 203 features a chemically-resistant molded case and keypad to protect the unit inside and out from spills.

Day-in and day-out convenience, too.

We also build Gilson fraction collectors for easy installation and use. It starts with compact design. The 202 has the largest capacity of any collector—540 tubes. Yet, it measures only 20 inches wide by 17 inches deep. And the FC 203 takes up only about a square foot of bench space.

Gilson fraction collectors can be used with any HPLC or LC system—ours or other manufacturers’. And the three of the collectors can control peripherals such as pumps and chart recorders.

Choose from five different models:

FC 80 and FC 100 microfractionators: Proven performers for simple time and drop collection. Many of these units have been in use for more than 15 years. Racks hold 80 or 100 tubes.

FC 203: Collects fractions by time or drop for simple analyses; peak and time windows enable more sophisticated applications. An affordable multi-mode unit capable of collecting up to 128 fractions.

201 and 202: With 15 operating modes, rack options and capacities up to 540 tubes, no other fraction collector does more or handles more.

Contact us for free literature today.

To learn more about Gilson fraction collectors and how they outperform others, simply mark the reader service number below. Or call us toll-free in the U.S. at 800-445-7667. (In Wisconsin, call 608-836-1551.)

How to project your findings.

There's no faster, easier and more accurate way to present your work than on Polaroid instant films and imaging systems. Whether your presentation is the next day or the next hour, Polaroid can help you project your findings without darkrooms or expensive photographic facilities. The images on the left show just a few of the many presentation films available from Polaroid that can help you project a better image. Instantly.

To capture the subtle color differentiations in the CAD/CAM image of a ball bearing (Fig. 1), new High Contrast PolaChrome Instant 35mm Slide Film was used. PolaChrome HC provides bright, high quality color in minutes.

The fish fossil on limestone (Fig. 2) was taken on PolaPan 35mm Instant Slide Film. The images were developed in daylight in minutes using the portable Polaroid PowerProcessor.

The instant color overhead transparency of a cost analysis graph (Fig. 3) was made using Colorgraph Type 691 film. This continuous tone, full color film creates easy-to-handle small format overhead projection transparencies so the latest findings can be presented instantly. The actual graph was generated on a PC using the Polaroid PalettePlus Computer Slide Maker.

This white-on-blue slide of the molecular structure of galactosamine (Fig. 4) was made with new PolaBlue Instant 35mm Slide Film. PolaBlue provides bright, high quality, white-on-blue slides in minutes, at a much lower cost than traditional blue slides.

The surface structure of a fern under a scanning electron microscope (Fig. 5) was taken with PolaPan 35mm Instant Slide Film.

No matter what you're presenting, or how you're presenting it, Polaroid has a film that can help you do it faster and easier. In color, black and white or white-on-blue. In 35mm slides, prints or overhead transparencies. In seconds, Polaroid has a complete line of instant films and imaging equipment to help bring your findings to light. And you get it all A.S.A.P.-As Soon As Polaroid instant images.

For a complete brochure (please specify whether you want information about the Quality Assurance Field or the Research Field) about Polaroid instant imaging solutions for the professional scientific community, or for a free consultation, call 1-800-343-5000. Or write, Polaroid Corporation, Dept. 695, P.O. Box 5011, Clifton, N.J. 07015.

The astonishingly bright, high-contrast image. The wide selection of quality accessories. The large stationary stage for maximum stability. The very modest price.

The renowned Diaphot.

It's the inverted microscope from Nikon that's designed to meet all the requirements of your research laboratory.

The Diaphot utilizes Nikon's exclusive CF optics, famous for their crisp, clear images. These optics deliver the extra edge that's needed in today's research and clinical laboratories.

A wide selection of accessories allow you to meet all the documentation requirements of your laboratory—from 35mm to large format and Polaroid®, CCTV and cinemicrography. With special CF objectives ranging from 4X through 100X, the Diaphot has complete capability in phase contrast, fluorescence and Nomarski DIC.

The Nikon Diaphot is engineered for functional performance and reliability. For maximum stability, its solid die-cast body has a very low center of gravity and the fixed stage makes Diaphot ideal for micromanipulation. And in addition to everything you heard, the Diaphot's striking superiority is available at a very modest price.

To learn even more about the renowned Diaphot, contact:
Nikon Inc., Instrument Group, 623 Stewart Avenue, Garden City, NY 11530. (516) 222-0200.

Comprehensive Mathematical and Statistical Subroutines Within Your Reach

If you use FORTRAN as a problem-solving tool, IMSL software libraries should be right at your fingertips. Leading the field of numerical software, these libraries provide a comprehensive source for mathematical and statistical FORTRAN subroutines.

Calling a single subroutine could save you the seemingly endless effort spent developing and debugging code for your FORTRAN application programs. IMSL libraries not only increase productivity, but can actually enhance the accuracy and robustness of your scientific and engineering programs.

These libraries comprise over 800 proven subroutines supported on more than 40 computing environments ranging from personal computers to supercomputers.

For more than 18 years IMSL has maintained a reputation of excellence and today it serves more than 8000 clients within major corporations, universities, and research centers around the world.

Contact us today and let us tell you how we can make FORTRAN more useful for you. Call toll-free 1-800-222-IMSL; in Texas or outside the U.S., call (713) 782-6060.

Visit us at the Pittsburgh Conference, Booth #3455.
Give your samples a free ride on the world’s fastest, most accurate densitometer.

When we introduced our new 300A Computing Densitometer, we said it was up to 1000 times faster than other densitometers on the market — with better than 1% accuracy. Understandably, a lot of people have to see it to believe it.

Here’s your chance.
Beginning March 1, 1989 you can see your electrophoresis gels and dot blots analyzed — with speeds and accuracy you never thought possible — at a private demonstration of our Computing Densitometer.
Demonstrations are scheduled in Atlanta, Boston, Chicago, Dallas, Denver, Detroit, Houston, Indianapolis, Los Angeles, Madison, New Orleans, New York, Philadelphia, Research Triangle Park, San Francisco, Seattle, St. Louis, and Washington D.C. Additional demonstrations will be arranged as needed in other cities in the U.S. and Canada and at major scientific meetings.

To make your appointment, call Wendy Ohlmann at (408) 773-1222.
And get ready for some thrilling results.

New Nalgene® Cryoware™ beats the others cold.
The advanced labware system for improved cryogenic storage. All designed by Nalge, the first name in high-tech plastic labware.

Cool Control with Nalgene Cryovials.
We designed them right from the start. We put screw threads outside the vial where they belong. We gave the closure a longer skirt, for uncontaminated aseptic procedures. Our closure seals without a gasket. And we gave the vial a conical bottom for easier sample extraction—and a flat base to stand on its own. Plus, an opaque marking area for your ID codes and an easy-to-read fill line. In 1.2- and 2-mL sizes.

Cool Storage with Nalgene CryoBoxes™
Isn’t it time you had all-plastic cryogenic storage boxes? Replace your flimsy cardboard or expensive stainless steel boxes with durable and economical Nalgene CryoBoxes. Grid and numbers on box top and inside keep track of inventory—one-way fit keeps grids lined up. In standard 9x9 array (81 vials) and a new 5x5 array (25 vials). Stackable. Autoclavable. Tough. Strong. Never brittle—even at −196°C!

Cool Handling with Nalgene Cryovial Holders.
Your lab deserves our new all-plastic cryovial holders, too. Holder interlocks with up to 50 Nalgene Cryovials to allow single-handed operation. Molded-in alpha-numeric identification system. Autoclavable.

Cool Fit with Nalgene CryoBox Racks.
We didn’t forget to design new stainless steel racks, either. Our racks fit your existing mechanical or liquid-nitrogen freezers and Dewars. Retainers hold new Nalgene CryoBoxes securely and separately—release quickly. Racks hold your existing cardboard or stainless steel boxes, too. Order Nalgene Cryoware from your Authorized Nalgene Labware Dealer worldwide.

Send for free samples. Prove it to me that Nalgene Cryoware beats the others cold. Send free trial samples of Nalgene Cryovials and more information about advanced Nalgene Cryoware.

Advanced Nalgene® Cryoware™
The secret to meeting the weighing needs of the life scientist is to create the perfect balance for each application. And like you, the Sartorians stop at nothing to find perfection.

Today, we make balances for all of the life sciences, from microbiology to zoology, from the analysis of a single cell to the study of a quadraped.

In fact, to meet your specific requirements, we offer a wider selection of precision balances than any company in the world. Seventy-one, and counting. And they are the most technologically advanced you can buy. For good reason.

We’ve been making balances for nearly 120 years. Longer than anyone. Our investments in research and development have consistently produced new concepts in weighing technology. The Plus Performance Package saves you time and effort by extending the capabilities of our balances. Three different keypad overlays
perform more than 16 separate functions, including numeric entry, tare and ID storage, and mass unit conversions.

So if your work requires precision weighing, call the Sartorians. We have the perfect balance, no matter what you do in life.

For more information, or a free demonstration, call or write Sartorius Instruments, P.O. Box 770, McGaw Park, IL 60085, (312) 578-4297. Or contact your representative from Baxter Healthcare Corporation, Scientific Products Division, or any authorized dealer. Tell them you’d like to see a Sartorian.

THE IMAGING MICROSCOPE WORKSTATION LEADER

▲ COMPLETE
Complete family of imaging microscope workstations designed specifically for biomedical research and backed by years of biological and imaging experience.

▲ INTEGRATED
Integrated optical, mechanical, and computer hardware and software components essential for performing fluorescence, dark field, polarized light, phase contrast, interference, and bright field microscopy—all in a single package!

▲ MODULAR
Modular design that allows you to start with a minimum, entry-level configuration and expand to the popular multimode workstation.

▲ POWERFUL
Apple" Macintosh™ II or DEC MicroVAX™ II computer, integrated with the powerful Perceptics real-time image processor.

▲ FRIENDLY
Intuitive, interactive user interface with an extensive set of biological software functions, including Multiprobe Fluorescence Analysis™, ratio imaging, quantitative feature analysis, and 3-D reconstruction.

▲ AFFORDABLE
Finally! An affordable, yet complete family of imaging microscope workstations to meet your research needs. By Perceptics, of course!

Call or write today for more information and see why BioVision is the imaging microscope workstation leader!

IBI DNA SEQUENCING WORKSHOP

Schedule for 1989

March 21 - 24
Wesleyan University, Middletown, CT
APRIL 4 - 7
Washington University, Saint Louis, MO
MAY 23 - 26
University of Hawaii, Honolulu, HI
JUNE 13 - 16
Rutgers University, New Brunswick, NJ
JUNE 27 - 30
San Francisco State University, San Francisco, CA
NOVEMBER 14 - 17
Iowa State University, Ames, IA
NOVEMBER 28 - DECEMBER 1
Baylor Center for Biotechnology, Houston, TX
DECEMBER 12 - 15
Rutgers University, New Brunswick, NJ

ADDITIONAL LOCATIONS AND DATES WILL BE ANNOUNCED

Lecture topics will cover:
• current strategies in DNA sequencing.

Each participant will perform:
• directed subcloning by the Dale Procedure
• purification of template DNA
• single strand and supercoil sequencing
• DNA sequencing with Taq DNA Polymerase
• DNA sequencing with Klenow fragment
• denaturing gel electrophoresis
• autoradiography
• structural analysis with Macintosh software.

Tuition is $795.00 for four full days. Class size is limited to 16.

For more information or registration, please call or write:
Lisa Salen, Program Coordinator, or
David R. Starr, Workshop Instructor

Brain Structure, Learning, and Memory

Edited by Joel L. Davis and Robert W. Newburgh, Office of Naval Research, and Edward J. Wegman, George Mason University

This new book, based on a AAAS Annual Meeting symposium, explores the connections between cellular and computational approaches to understanding the neural basis of learning and memory. Incorporating such diverse ideas as invertebrate and computer-based models, cerebellar involvement in motor engrams, learning, and the sensory sciences; nonstationary point processes; and models closely tied to vertebrate neural nets, the contributors not only shed new light on important brain functions but also provide an example of how neuroscience research should be structured.

$35.00; AAAS members $28.00 (include membership number from Science), 301 pp., 1988. AAAS Selected Symposium 105.

Order from: Westview Press, Dept. AAAS, 5500 Central Avenue, Boulder, CO 80301. (Add $2.50 postage and handling for the first copy, 75 cents for each additional copy; allow 4–6 weeks for delivery.)

Visiting Brain Function... The past 20 years represent a period of dramatic progress in ophthalmic surgery. Today, biotechnology is creating new dimensions in the management of wound healing. Genetic engineering and modern separation science are making growth factors and other biological response modifiers available to the physician. These proteins, the physiological regulators of tissue repair, are the next generation of ophthalmic pharmaceuticals. The successful integration of these new drugs into the practice of ophthalmic surgery defines today's frontier.

Visions in Wound Healing is a forum for physicians and scientists to exchange ideas which will shape the future practice of surgery in ophthalmology.

Bringing you the latest findings in DNA mapping and sequencing research and enabling you to publish DNA sequence data papers in full...

SCOPE
The journal will publish:
- mapping data that would be useful to future DNA sequencing
- DNA sequence data in full
- new DNA sequencing procedures and allied techniques
- analyses of DNA sequences
- computer methods to analyse DNA sequences
- compilations of sequence motifs of DNA and proteins
- regular reviews on sequencing especially methodology and the latest techniques
and provide a forum for the exchange of research experience and advice, through a Letters to the Editor section

CALL FOR PAPERS
The Editors welcome original research papers and short communications. The journal will also publish commissioned review articles. Papers and suggestions for reviews may be submitted to the Editor in Chief or to any of the Editors for consideration. There are no page charges to authors or institutions. For further information and Notes for Contributors, please contact the Editors or the Marketing Department at Harwood Academic Publishers.

First issue due Autumn 1989

The new Carl Zeiss Microscope Systems extend the performance and capabilities of the modern light microscope to meet the ever growing demands of science and industry.

State-of-the-art light microscopes with unexcelled ICS optics are combined with the latest technologies for specimen handling, information retrieval and processing.

The results, in terms of resolution, content and reproducibility, far exceed anything previously attainable with conventional instrumentation. Now the most sophisticated techniques in microscopy can become a routine part of your research.

The LSM Microscope Systems from Carl Zeiss with their specially selected lasers and ICS optics offer excellent resolution and superb confocal depth contrast. The zoom system allows the total magnification to be changed by up to a factor of 10 – with constant image brightness and no objective change.

A perfect electronic image is produced by point-by-point scanning of the specimen with a focused laser beam and by direct digitization of the measured values. The exceptional advantage of the LSM: the user can switch between conventional light microscopy and laser scan microscopy at any time.

All functions are activated and controlled from the clearly arranged control panel.

The following are only some of the possibilities offered by the LSM Microscope Systems:
- confocal fluorescence with high detection sensitivity for perfect optical sectioning;
- high resolution images – also in confocal reflection contrast;
- future-oriented, flexible system software with a hard disk for image mass storage;
- video printer for instant and high-resolution 35 mm photography;
- interfaces for external computers.

LSM Microscope Systems – for cell biology, genetic research and experimental neurology and pathology.

For the full story, contact the Quantitative Microscopy Group at (914) 681-7736.
Screen Tests.

Go ahead. Try this with any other single PC software package.
Sure, you could create these screens by using several scientific software packages. (Of course, you'd have to learn several different systems and convert your data files a few times.) But we did it all with just one, integrated, scientific software tool. A tool that can handle all your needs—data acquisition, analysis, and graphics—ASYST.

ASYST gives you full control of your data. Within one, unique, interactive programming environment you have access to high-level commands that allow you to perform functions like instrument interfacing and control, FFTs, smoothing, integration, differentiation, curve fitting, statistics, and matrix and polynomial operations.

But even though the ASYST function set is extensive, you're not tied to it. You can expand and customize the functionality of ASYST by tailoring its capabilities to your needs. And you'll find, as thousands of satisfied users have, that you don't have to be a professional programmer to use it.

And just in case you need it, you'll appreciate our 60 days of free technical support. Ongoing support is available.

Test ASYST on your own screen with our 30-day no-risk offer. Call 1-800-348-0033.

A complete system:
- Data analysis and statistics
- Acquisition (A/D, D/A, and Digital I/O)
- Instrument interfacing and control (IEEE-488/GPIB and RS-232)
- High-performance graphics

Go ahead. But even though the ASYST function set is extensive, you're not tied to it. You can expand and customize the functionality of ASYST by tailoring its capabilities to your needs. And you'll find, as thousands of satisfied users have, that you don't have to be a professional programmer to use it.

And just in case you need it, you'll appreciate our 60 days of free technical support. Ongoing support is available.
The new METTLER AT Analytical Balance was developed around a remarkable discovery: People only have two hands.

For years people with two hands have had to operate balances designed for three.

Introducing the METTLER AT. The first analytical balance that's simple to handle.

One hand is now free to open the draft shield from the opposite side. So you don't have to twist both arms to work on the same side. Or you can let the draft shields open and close automatically. Which leaves your hands free to move your samples instead of doors.

You have a choice of configuring the draft shield so you can put your sample on from the left, the right, or even from above.

The weighing pan is close to the edge of the weighing chamber. Which for the first time allows your hand to get close to the pan.

To find out more, call us.
We'd be happy to give you a hand.

If you perform calculations, the answer is obvious. MathCAD 2.0. It's everything you appreciate about working on a scratchpad—simple, free-form math—and more. More speed. More accuracy. More flexibility.

Just define your variables and enter your formulas anywhere on the screen. MathCAD formats your equations as they’re typed. Instantly calculates the results. And displays them exactly as you’re used to seeing them—in real math notation, as numbers, tables or graphs.

MathCAD is more than an equation solver. Like a scratchpad, it allows you to add text anywhere to support your work, and see and record every step. You can try an unlimited number of what-ifs. And print your entire calculation as an integrated document that anyone can understand.

Plus, MathCAD is loaded with powerful built-in features. In addition to the usual trigonometric and exponential functions, it includes built-in statistical functions, cubic splines, Fourier transforms, and more. It also handles complex numbers and unit conversions in a completely transparent way.

Yet, MathCAD is so easy to learn, you’ll be using its full power an hour after you begin.

What more could you ask for? How about three new applications packs to increase your productivity?

The Advanced Math Applications Pack includes 16 applications like eigenvalues and eigenvectors of a symmetric matrix, solutions of differential equations, and polynomial least-squares fit.

Two Statistics Applications Packs let you perform 33 standard statistical routines such as multiple linear regression, combinations and permutations, finding the median, simulating a queue, frequency distributions, and much more.

MathCAD lets you perform calculations in a way that’s faster, more natural, and less error-prone than the way you’re doing them now—whether you use a calculator, a spreadsheet, or programs you write yourself. So come on over to MathCAD and join 45,000 enthusiastic users.

See your dealer or call 1-800-MATHCAD Ext. 2776 (In MA: 617-577-1017).
The Model 431A Peptide Synthesizer.
Our success is yours to share.

When the Model 431A Peptide Synthesizer comes to your lab, it brings with it the best in protein chemistry. People who understand how to apply state-of-the-art synthesis methodologies in precision instrumentation. People who share your vision for the potential of peptide synthesis in your research. People with the expertise to help you produce results the first time out.

The compact, simple Model 431A embodies the most advanced, most proven technology available for peptide synthesis today. In just a few keystrokes, you can access Applied Biosystems' perfected Fmoc and t-Boc chemistries and the precise delivery of our patented valve block system. Walk away, and come back for your peptide. Simplicity without compromise.

Instrument operation is only the beginning. Experts in peptide synthesis and purification are only a phone call away. Our worldwide customer service network ensures prompt delivery of the finest reagents, optimized for your instrument. In our own laboratories, scientists like yourself continue to explore and respond to your research requirements.

Get to know the Model 431A. Get to know the people who'll help you succeed. Contact Applied Biosystems today.

**Variability and Management of Large Marine Ecosystems**

Edited by Dr. Kenneth Sherman, *Director, Narragansett Laboratory, National Oceanic and Atmospheric Administration*, and Dr. Lewis M. Alexander, *Director, Center for Ocean Management Studies, University of Rhode Island*

Large marine ecosystems (LMEs) are being subjected to increasing stress from industrial and urban wastes, aerosol contaminants, and heavy exploitation of renewable resources. This book is a state-of-the-art review of effective means for measuring changes in populations and productivity, physical-chemical environments, and management options for LMEs. For the first time, this volume treats LMEs holistically as regional management units by bringing together all too often fragmented efforts to optimize ocean resources. 319 pp., 1986.

$31.85; AAAS members $25.50 (include membership number from Science).

Order from: Westview Press, Dept. AAAS, 5500 Central Avenue, Boulder, CO 80301
Add $2.50 postage and handling for the first book ordered; 75¢ for each additional book.

Isotec Inc. offers the scientific community one of the world's largest selections of stable isotopes and labelled compounds.

- Amino Acids
- Fatty Acids
- Sugars
- Substrates (for breath tests and other metabolic studies)

You Get More From

- > 99% chemical purity
- High isotopic enrichment
- Competitive prices
- Fast delivery

Plus...

metal stable isotopes, helium-3 and other noble gas isotopes, other enriched stable isotopes, multiply-labelled compounds and custom synthesis

Call or write for your NEW complete price list today!

Lab Data Analysis — No Assistants Required

Make Waves...

the First Spreadsheet designed exclusively for Scientists and Engineers.

Over 150 functions for displaying and analyzing waveforms makes lab data analysis as easy as typing a name. Run external data acquisition software, or your own analysis programs; create new functions with DADiSP Macros; and, talk to your instruments with DADiSP-488.

make a Call.

And responded with New Design Nalgene Disposable Filterware. You talked about improving your favorite disposable filterware. Nalge listened. And responded with a technically-advanced line of disposable filterware designed to make your work faster and more efficient than ever before.

You asked for convenience. We listened. And gave you new easy-to-use two-piece units. Plus receivers designed for dispensing and storage with leakproof closures that are easy to put on and remove.

You asked for versatility. We listened. And offered you extra capacity with 150-, 250-, 500-, and 1000-mL sizes. Plus graduations on receivers and uppers for easy measurement, because you asked for it.

You asked for easy identification. We listened. So now, Nalgene Filter Units are color-coded by membrane material—and the pore size and membrane material are marked right on the collars.

You asked for speed. We listened. And increased the effective filtration area by more than 25% for faster flow rates.

But we didn't change what we couldn't improve. We didn't change the membranes or plastics you've always depended on. You get the same uncompromising standards you expect from Nalge, because all materials are carefully tested for cytotoxicity, and all units are guaranteed sterile. So you won't introduce any variables whatsoever into your work.

Nalgene Filterware... the name you've trusted for 20 years.
