Articles

901 Finite Social Space, Evolutionary Pathways, and Reconstructing Hominid Behavior: R. A. FOLEY AND P. C. LEE
907 Polymer Synthesis and Organotransition Metal Chemistry: R. H. GRUBBS AND W. TUMAS
916 Coordinate Regulation and Sensory Transduction in the Control of Bacterial Virulence: J. F. MILLER, J. J. MEKALANOS, S. FALKOW

* SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1533 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with The Scientific Monthly. Copyright © 1989 by the American Association for the Advancement of Science. The title SCI- ENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $70. Do- mestic institutional subscription (51 issues): $110. Foreign postage extra: Canada $32, other (surface mail) $32, air-sur- face via Amsterdam $85. First class, airmail, school-year, and student rates on request. Single copy sales: Current is- sue, $3.50; back issues, $5.00; Biotechnology issue, $6.00 (for postage and handling, add per copy $0.50 U.S., $1.00 all foreign); Guide to Biotechnology Products and Instruments, $18 (for postage and handling add per copy $1.00 U.S., $1.50 Canada, $2.00 other foreign). Bulk rates on request. Change of address: allow 6 weeks, giving old and new add- resses and seven-digit account number. Authorization to photocopy material for internal or personal use under circum- stances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users regis- tered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Postmaster: Send Form 3579 to Science, P.O. Box 1722, Rivermont, NJ 08077. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in public understanding and ap- preciation of the importance and promise of the methods of science in human progress.
A fragment of lunar cordierite-spinel troctolite from the Apollo 15 mission. Two spinel crystals (reddish brown) and an adjacent grain of cordierite (lavender pink, upper left) are included in twinned plagioclase feldspar (blue and yellow). The cracked textures, offset twin lamellae, and weblike pattern (lavender pink and yellow) of finely crushed feldspar are shock features. (False-color photomicrograph taken in partially cross-polarized light with gypsum accessory plate; long edge of field is 0.53 millimeter.) See page 925. [Photomicrograph by Ursula B. Marvin]

Reports

923 Length-of-Day Variations Caused by El Niño–Southern Oscillation and Quasi-Biennial Oscillation: B. F. Chao
931 Ubiquitous Expression of Sevenless: Position-Dependent Specification of Cell Fate: K. Basler and E. Hafen
934 The Human Papilloma Virus–16 E7 Oncoprotein Is Able to Bind to the Retinoblastoma Gene Product: N. Dyson, P. M. Howley, K. Münger, E. Harlow
940 Epithelial Cell Surfaces Induce Salmonella Proteins Required for Bacterial Adherence and Invasion: B. B. Finlay, F. Heffron, S. Falkow
943 A Family of Putative Potassium Channel Genes in Drosophila: A. Butler, A. Wei, K. Baker, L. Salkoff

Book Reviews
