The day we proved we could not do the impossible.

We can't do the impossible. Our FPLC® System can, however, do things some people think are not possible.

Take the case of an article we produced on the possibilities for automated chromatography using multi-dimensional FPLC. The piece was initially rejected because one reviewer thought such sophisti-
cation was simply not possible!

Automated FPLC System is, of course, a working reality in labs around the world. The article was soon published elsewhere*

Unfortunately, the editor's reaction is not unique. To those who have not used FPLC, the plethora of possibilities presented by the continuously developing FPLC System may seem incredible. But it isn't, really.

It's just part of our pledge to help life scientists manage biomolecules. If you work with protein separations, take a look at the possibilities our FPLC System presents. Recent developments have simplified the process even more.

At Pharmacia LKB Biotechnology, we believe in possibilities. Contact a representative today and see for yourself what's not impossible.

Guaranteed performance in continuously adjustable and fixed-volume models.

Eppendorf brings superior performance and the convenience of air displacement to ultra micro pipetting. All Eppendorf Ultra Micro Pipettes feature a unique extended piston design that reduces dead-air volume and assures no carryover between samples. The result? Great accuracy at ultra micro settings.

From 0.5 μL...ultra micro accuracy by design.

For your other pipetting needs...up to 1000 μL.

For volumes from 2.0 to 1000 μL, three additional Eppendorf Digital Pipettes give you direct digital display of the set volume to assure precise, reproducible results every time. And all Eppendorf Digital Pipettes feature a “click-set” ratchet mechanism, maintenance-free seals, and a tip ejector.

Top performance starts at the bottom.

The FAST TRACK mRNA isolation kit will efficiently isolate high yields of intact poly A+ RNA directly from cells or tissue in less than four hours!

A Complete Set of Pretested Reagents and a Simple-To-Follow Instruction Manual

The FAST TRACK™ procedure gives you consistently higher yields of active, intact mRNA for the construction of cDNA libraries, primer extension, RNase protection analysis and Northern blots. FAST TRACK yields 40-100μg of poly A+ from 10⁶ cells or 1 gm of tissue.

Let Invitrogen put you on the FAST TRACK. To order, ask for catalog No. K1593-02 after calling . . .

We can give you the answer.
If you work with 2-D gels in the life sciences, then you need to know which proteins are being induced, repressed, phosphorylated and glycosylated. And you need to know when they are changing. PDI can help. We've taken the empirical art of 2-D electrophoresis and made it a more precise science by creating the only total system of analytical gel services, software, and instruments to reduce biological information to useful, manageable data.

We can quantify the changes in your cells and tissues.
Whether you run 2-D or not, we can give you the answers you need to make discoveries. With PDI, you get the benefit of years of gel running experience linked to software development devoted to quantifying and reducing biological data to answers you can use.

The marriage of 2-D Electrophoresis and computer-assisted analysis.
Our instrument system, the Discovery Series™, does the tedious work and frees you for the creative and intuitive processes that lead to breakthroughs. That's the power of PDI; the power to illuminate, amplify. You no longer need to reinvent the wheel every time you run an experiment with hormones, growth factors, neurotransmitters, drugs.

Proven in top labs and by over 90 publications.
Don't take our word for it. Over 90 publications world-wide testify to the value of PDI's partnerships with world's leading scientists. Clients from Cal Tech, Columbia University, Pasteur Institute, The University of Penn., UCSF, Harvard, and leading pharmaceutical companies have used gel services and/or the systematic analysis of global changes occurring in biological systems. And it's more affordable than you think! As with all our services, you can buy or lease the entire system — or you may send your samples to us and use our system on a low-cost service basis. Either way, we give you the answers. You make the discoveries.

Call or write for our latest "Product & Services Guide" shown here and for more information.

JOIN FISHERBIOTECH IN A UNIQUELY BENEFICIAL RELATIONSHIP...
Of all the sellers in the market, FisherBiotech is uniquely capable of working with you to help make your work more productive. Symbiosis to us means a mutually beneficial ongoing exchange of ideas and information, not merely a commercial exchange of purchase orders and purchases. Symbiosis means watching your work in progress and our products in use. Anticipating your needs and adapting our services to meet them. Understanding your problems and implementing hands-on solutions. And developing advanced products to help your work advance.

Our motives are not selfless. FisherBiotech plans to grow symbiotically with biotechnology—because we offer unique contributions to accelerate that growth.

All the essentials of biotechnology...

One single source can furnish all the biotechnical tools you need, from reagents, enzymes, labelling and packaging systems for molecular biology... ultrapure raw materials and efficient mechanisms for DNA synthesis... antibodies and detection systems of all types... complete systems and supplies for electrophoresis... basal media, antibiotics, vitamins, and process controls for cell culture—over 3,000.
products in all, with more added every week.

...and the skills essential to applying them

FisherBiotech sends our biotechnologists to work with your biotechnologists. Our Biotechnology Specialists, the largest dedicated force in the field, carry the best credentials and speak your language fluently. That promotes symbiosis, not just sales.

Quality is as critical to our results as it is to yours.

Biotechnology imposes unforgiving standards. So all FisherBiotech suppliers undergo stringent product evaluations, and must meet or exceed our Quality Assurance standards before we distribute their products. With nearly a century of manufacturing high quality reagents, FisherBiotech knows how to assure consistent purity. Our product assays—and our customers' results—speak for themselves.

The new products of symbiosis

FisherBiotech introduces what you need by understanding firsthand what you need to know. Your problems stimulate our product development—for instance: new peptides...more efficient electrophoresis systems...new scintillation cocktails...and higher yield cell cultures, among others.

Delivery systems that help you deliver results

Instantaneous computerized ordering. Express shipments from massive inventories. Expert answers with one toll-free call. The convenience and economy of Fisher Scientific as the source for everything your lab needs. Fisher service lets you spend less time obtaining products, and more time using them productively.

Choose a supply house—or a symbiotic relationship.

Supply houses sell to you. FisherBiotech works with you. The benefits will be as unique and mutual as the relationship. For additional information, contact your Fisher Biotechnology Specialist or local Fisher Scientific Representative.

Cell Culture...Biochemicals
They are behind all our optical achievements. Harnessing supercomputers of unfathomable power, they're constantly reformulating the lens. Envisioning new rare earth glasses with breakthrough refractive indices. Calculating element patterns that correct aberrations to an uncanny degree.

They are the optical engineers of Olympus, bending light to their will. Alchemists with their pots of glass, they turn base minerals into lenticular "gold."

From their minds come optical designs renowned for providing images of unsurpassed brilliance and clarity. The heart of precision instruments of innovative and ergonomic design, of versatile modularity and operational simplicity.

It is this human element that has distinguished Olympus microscopes for more than 65 years. This human element, and its end product:

Superior vision.

For more information on the precision instruments of Olympus that suit your applications, call toll-free: 1-800-446-5967. Or write Olympus Corporation, Precision Instrument Division, 4 Nevada Drive, Lake Success, New York 11042-1179.

Nikon's Microphot-FXA... the first research microscope to display real intelligence...

- **Simplifies** complex microscopy and photo protocols with user defined software management.
- **Resolves** images called “the best in microscopy today” with a choice of over 130 CF lenses including new 1.4 N.A. 60x and 100x oil plan apochromats.
- **Produces** the brightest low light image in the shortest exposure time.
- **Concentrates** essential controls in a single “ergo-control center” so your eyes never leave the specimen.
- **Switches** effortlessly between transmitted or reflected light techniques including: brightfield, darkfield, DIC, pol, fluorescence, rectified, phase contrast, interferometry Hoffman modulation contrast and VRM illuminator.
- **Displays** key camera and microscope data on a clear, bright LCD screen.
- **Imprints** exposure time, film speed, frame number, bracket exposure adjust, lux intensity, auto-scale, photo magnification or user defined ID file name/number on the film.
- **Calculates** total magnification and prints it on the film.
- **Detects** the DX code from the film cassette and automatically sets the film speed.
- **Automates** control of brightness, motorized nose-piece, focus, stage movement, photo light path selection and condenser aperture.
- **Documents** hard copy of all functions via desk-top printer.
- **Stores** data and automated functions for up to 3 attached cameras independently for a total of 18 separate data print files.
- **Communicates** with a host computer for remote control and quantitative applications.
- **Responds** to computer commands via RS 232 protocols.

You've just begun to touch on the total system advantages of the Nikon Microphot-FXA. Discover more. Contact Nikon Inc., Instrument Group, 623 Stewart Avenue, Garden City, NY 11530. 516-222-0200.

What's in it for you?

DNA probe assays, monoclonal antibodies for immunopathology, labeling systems for nucleic acids, and more.

If you have applications in clinical pathology, molecular or cellular biology, genetic engineering or nucleic acid research, you must have the NEW Enzo Diagnostics Catalog.

FOR YOUR FREE COPY, Please use the reader service card or call 800-221-7705, in New York 212-741-3838.

ENZO DIAGNOSTICS, INC.

325 Hudson Street
New York, NY 10013
Biotix shatters the five minute mer.

The new Biotix DNA Synthesizer delivers the fastest cycle time in the industry — less than 5 minutes per coupling on 1 or 2 column units. So you can synthesize a 100 mer in less than 8½ hours, and devote the hours you save to more creative aspects of your research.

This short cycle time also minimizes exposure of the growing DNA chain (or oligo) to reagents, ensuring the highest quality DNA of any unit available.

Guaranteed 125 mer synthesis.

Guaranteed biological activity.

From Biotix.

To find out more, call 1-800-288-2468, or write Biotix, Inc., Commerce Park, Corporate Drive, Danbury, CT 06810-4130.

GETTING OUR NEW OSMOTIC PUMP THIS SMALL WAS NO SMALL EFFORT.

It was a small miracle.

Because now, after several years of intensive research and development, the new ALZET® Micro-Osmotic Pump is ready to help you with small animal research.

This new micropump, Model 1003D, can be successfully used in mice and other animals weighing as little as 10 grams. The 1003D provides the same quality drug delivery as our larger osmotic pumps. It has a 100 μl capacity and pumps at 1 μl/hr for three days.

Only ALZET osmotic pumps offer you an opportunity for continuous, controlled delivery to help evaluate your drug in the steady state. They accomplish this without the trauma of injection-induced stress that can interfere with your test results.

Brain Structure, Learning, and Memory

Edited by Joel L. Davis and Robert W. Newburgh, Office of Naval Research, and Edward J. Wegman, George Mason University

This new book, based on a AAAS Annual Meeting symposium, explores the connections between cellular and computational approaches to understanding the neural basis of learning and memory. Incorporating such diverse ideas as invertebrate and computer-based models, cerebellar involvement in motor engrams, learning, and the sensory sciences; nonstationary point processes; and models closely tied to vertebrate neural nets, the contributors not only shed new light on important brain functions but also provide an example of how neuroscience research should be structured.

$35.00; AAAS members $28.00 (include membership number from Science). 301 pp., 1988. AAAS Selected Symposium 105.

Order from: Westview Press, Dept. AAAS, 5500 Central Avenue, Boulder, CO 80301. (Add $2.50 postage and handling for the first copy, 75 cents for each additional copy; allow 4-6 weeks for delivery.)

Published by Westview Press for AAAS

Smart assays.

The CBC HTLV-I research kit.

Highly specific and sensitive antibody assays through recombinant technology.

Researchers have always been searching for ways to make their assays more specific. More sensitive.

Smarter, in other words.

Which is why our assays utilize highly purified proteins engineered from selected viral genes.

Example number one: our much-talked-about, five-minute HIV-1 antibody assay for AIDS diagnostics. It’s FDA approved, available through Baxter Healthcare and called Recombigen® HIV-1 LA.

Then there’s our two-hour HTLV-I EIA antibody assay. It features microwells coated with recombinant 
env protein. And can be ordered directly from us.

And that’s not all. Other assays based on CBC-engineered proteins are forthcoming.

You’ll soon see why choosing a smart assay is truly an intelligent decision.

*For research use only.
