Box 1722, Riverton, NJ 08077. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.
- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER Tin bronze stag, 52.5 centimeters high, excavated from Tomb B at Alaca Höyük, north central Turkey, and now in the Museum of Anatolian Civilizations, Ankara. The stag dates to the mid-third millennium (Anatolian Early Bronze Age), a period characterized by the introduction of bronzes. A source for the tin used in making bronze has been a mystery. Kestel, a mine in the Taurus Mountains of Turkey, may have been that source of tin ore. See page 200.
