Separation of plasmid and chromosomal DNA

Run conditions:
CsCl-ethidium bromide gradient, homogeneous starting density 1.55 g/mL.
VTi 65.2 vertical tube rotor spun at 65,000 rpm in an L8M or L7 Ultracentrifuge.
Temperature 20°C. Sixteen 5.1-mL Quick-Seal® polyallomer tubes.

This full-speed run can only be achieved in a Beckman VTi 65.2 rotor. Send for protocol. Beckman Instruments, Inc., Spinco Division, 1050 Page Mill Road, Palo Alto, CA 94304. (800) 742-2345. Offices worldwide.

A safe, simple protein detection system by Promega.

The ProtoBlot® Western Blotting Systems from Promega—For the Rapid, Sensitive Immunodetection of Proteins.

Choice of alkaline phosphatase-based or horseradish peroxidase-based detection systems:
- Safe—Eliminates the need for radioactive isotopes
- Sensitive—Provides picogram-level sensitivity, greater than 35S-protein A-based systems
- Optimized—Reproducible, reliable results
- Fast—Protein detection in as little as 2 hours
- Choice—Systems available for the detection of mouse, rabbit, and human antibodies

12 high purity plasmid preps in less than an hour?

Yes, with one of the new QIAGEN >plasmid< kits

- matching CsCl purity
- with new, short & simple protocols
- mini, midi or maxi scale.

QIAGEN Hi purity >plasmid< kits contain our proprietary anion exchange resin QIAGEN in disposable plastic tips, together with all the buffers and solutions required to go from overnight cultures to pure plasmids in 50 minutes (for minipreps, 90 min for maxi preps).

Hi purity kits are available for either 25 Mini- or, 25 Midi or, 10 Maxi preps of DNA of a purity equivalent to CsCl gradients. A fourth kit, QIAScreen, for 300 Mini preps of "screening" quality produces plasmid DNA ideal as a substrate for restriction analysis.

High recoveries
Excellent reproducibility
Non-toxic reagents

All you need to get started is a QIAGEN >plasmid< kit

DNA research.

The Eppendorf MicroCycler™ makes it effortless.

Accurate temperature control in denaturation kinetics, DNA sequencing and probe research is getting easier and more affordable. The new Eppendorf MicroCycler builds upon Eppendorf's expertise in precision sample handling and temperature control. The result: an elegantly simple instrument that fits readily into your budget and your lab.

Designed by molecular biologists, the Eppendorf MicroCycler offers powerful capabilities in a convenient package. The interactive keypad makes getting started easy. As many as 99 different time-temperature subroutines can be defined, stored and linked in any sequence to form programs. Up to 26 programs can be stored and easily retrieved. Temperature changes from 0 to 100°C are rapid and accurate with the efficient heating block.

The MicroCycler comes in two models: one for use with 0.5 ml Eppendorf Microcentrifuge Tubes and one for use with the 1.5 ml size.

The Eppendorf MicroCycler, Eppendorf quality makes it reliable. Eppendorf design and support make operation effortless. Contact Eppendorf for more information today. Call (800) 421-9988.

For research only. MicroCycler is a trademark of Eppendorf Incorporated.

If sequencing has you going around in circles...

let FASTaq™ straighten you out.

Introducing the FASTaq sequencing biosystem. The first single incubation protocol.

Finally, there's an end to the mix/incubate/cool cycle. With FASTaq, you just mix, incubate once and load. FASTaq can cut up to half an hour and up to seven steps from your preparation time while leaving less to go wrong. Best of all, you can walk away while its incubating — and use the time to get more things done.

The Thermus aquaticus polymerase actively catalyzes polymerization at temperatures exceeding 70°C. These higher temperatures denature virtually all template secondary structures and hairpins that cause most data errors. You get crisp, clear, accurate data every time.

Find out more about the FASTaq sequencing biosystem. Call or write today... and straighten yourself out.

The agony.
The ecstasy.

We know it takes a lot of work to produce good scientific data. Which is why you owe it to yourself to check out SlideWrite Plus. You see, our powerful presentation graphics software for the IBM PC and compatibles can turn the data you worked so hard to capture into high impact charts, graphs, slides and overheads — and do it all in minutes.

SlideWrite Plus gives you powerful graphing features, full drawing capability, flexible labeling with 16 great fonts, and extremely high quality output on printers, plotters, and cameras. And that’s just for starters. It’s no wonder SlideWrite Plus tied for first place in a recent PC Week poll!

Call us for a free demo diskette right now. We’ll show you how SlideWrite Plus can help your results get results.

Call for your FREE full-featured trial diskette!

How in the world can you discover subtle changes in genetic expression?...

...With PDI — That's How!

We can give you the answer.

If you work with 2-D gels in the life sciences, then you need to know which proteins are being induced, repressed, phosphorylated and glycosylated. And you need to know when they are changing. PDI can help. We’ve taken the empirical art of 2-D electrophoresis and made it a more precise science by creating the only total system of analytical gel services, software, and instruments to reduce biological information to useful, manageable data.

We can quantify the changes in your cells and tissues.

Whether you run 2-D or not, we can give you the answers you need to make discoveries. With PDI, you get the benefit of years of expertise linked to software development devoted to quantifying and reducing biological data to answers you can use.

The marriage of 2-D Electrophoresis and computer-assisted analysis.

Our instrument system, the Discovery Series™, does the tedious work and frees you for the creative and intuitive processes that lead to breakthroughs. That’s the power of PDI; the power to illuminate, amplify. You no longer need to reinvent the wheel every time you run an experiment with hormones, growth factors, neurotransmitters, drugs.

Proven in top labs and by over 90 publications.

Don’t take our word for it. Over 90 publications world-wide testify to the value of PDI’s partnerships with world’s leading scientists. Clients from Cal Tech, Columbia University, The Pasteur Institute, The University of Penn., UCSF, Harvard, and leading pharmaceutical companies have used gel services and/or the systematic analysis of global changes occurring in biological systems. And it’s more affordable than you think! As with all our services, you can buy or lease the entire system — or you may send your samples to us and use our system on a low-cost service basis. Either way, we give you the answers. You make the discoveries.

In applications such as:
- Growth & development
- Hormonal regulation
- Genetic expression
- Effects of toxins & drugs
- Genomic sequencing

The Discovery Series™ from PDI.

Use the Power of The Discovery Series™

Our latest version of The Discovery Series™ is the most powerful, the most user-friendly and the most customer-proven system available anywhere for the systematic analysis of global changes occurring in biological systems. And it’s more affordable than you think! As with all our services, you can buy or lease the entire system — or you may send your samples to us and use our system on a low-cost service basis. Either way, we give you the answers. You make the discoveries.

Call or write for our latest "Product & Services Guide" shown here and for more information.

The Thrill of Discovery
New Advances in Interactive Laser Cytometry

Introducing the ACAS 570...

Advanced Instrumentation for:
- Adherent Cell Sorting
- Quantitative Fluorescence Analysis

JAPAN:  JAPAN
TEL:  (03) 3711811

FRANCE:  CYTOLAB
6, rue Bastiat
78100 St-Germain-en-Laye
TEL:  (1) 30.44.63.23
TELEX:  689497F

BENELUX:  DALTON bv
P.O. Box 154 - NL 5140 AD Waalwijk - The Netherlands
TEL:  (0) 4160-31225 - Teletext:  (0) 4160-41365
Only the ACAS lets you harness the power of the laser for interactive experimentation with adherent cells. Interactive techniques include: photobleaching of fluorescent probes to make real time measurements of cellular dynamics (for example, receptor membrane mobility, endosomal movement, and intercellular communications); microsurgery of cellular components; ablation of cells; and sorting of cells.

Only with the ACAS can you isolate an individual adherent cell for cloning or mRNA phenotyping in minutes, even at frequencies of one in a million. And use a variety of fluorescence techniques that offer you new strategies for "mutant hunting."

When you want interactive laser cytometry you need the ACAS 570 Interactive Laser Cytometer.

Only the ACAS provides precisely targeted and controlled laser illumination to give you maximal fluorescence signal with minimal photobleaching for optimal quantitation.

The ACAS 570 unleashes the power of fluorescence providing you with reproducible quantitative assays of cellular biochemical and physical activity. Single or multiple measurements and ratioing of simultaneous emissions give you real numbers for quantitation ranging from DNA to pH, and cytosolic Ca$^{2+}$.

When you want to make quantitative fluorescence measurements you need the ACAS 570 Interactive Laser Cytometer.

The ACAS 570 uses a focused laser spot and advanced photometric detection to give you the sensitivity needed for fluorescence analysis of cells. With the ACAS you can label cells with the lowest detectable dye concentrations, to minimize interference with normal cellular functions; perform multiple measurements on the same cell with little or no photobleaching; and detect fluorescence when only a small number of sites are labeled.

When you want to make sensitive fluorescence measurements you need the ACAS 570 Interactive Laser Cytometer.

From cloning cells to fluorescence imaging, and measuring rapid calcium fluxes, the ACAS Interactive Laser Cytometer is the only instrument that provides you with such a broad range of cell and molecular biology applications. The model 570 with advanced computer and detection systems offers you even more power and versatility with new options such as confocal fluorescence imaging and video processing.

When you want versatile integrated instrumentation you need the ACAS 570 Interactive Laser Cytometer.

Answers to your questions about applications or instrumentation are immediately available with a call to our dedicated group of cell biologists, engineers, and computer scientists.

When you want exceptional technical support you need the ACAS 570 Interactive Laser Cytometer.

These are only five of the many reasons why the ACAS 570 is The Cytometer For All Reasons.

Call us now at 800-247-8084 to explore your reasons.

(In Michigan call 517-349-7200.)
Seven reasons why other restriction enzymes don’t cut it.

1. Quality. Our rigorous testing for the absence of contaminating activities and our sensitive functional testing guarantee the reliable, consistent products you expect from Boehringer Mannheim Biochemicals.

2. Selection. We offer more than 85 different restriction endonucleases, including many enzymes that are unique to Boehringer Mannheim.

3. Concentration. Only Boehringer Mannheim standardizes every lot at the most useful concentrations—for maximum convenience, efficiency and economy. Plus, more than 30 of our enzymes are available in both high and low concentrations to accommodate specific dual applications.

4. Buffers. Our unique SuRE/Cut™ Buffer System means you need only five buffers for more than 80 enzymes. They’re supplied free and guaranteed to provide 100 percent activity.

5. Stability. Only Boehringer Mannheim control dates each restriction enzyme vial and guarantees purity and full activity for 12 or 18 months.

7. Service. Our toll-free numbers, electronic ordering, on-site stocking, rapid delivery, competitive pricing, easy-to-use catalogs and professional technical support people back up a total commitment to unequaled service.

There’s more than one reason why some restriction enzymes can make the cut and some can’t. At Boehringer Mannheim Biochemicals, we know that it’s the combination of these seven factors that assures successful restriction enzyme digest. And only Boehringer Mannheim incorporates that combination of factors into each restriction enzyme sale. From unsurpassed quality to a total commitment to service, we’ll give you all the best reasons to choose the restriction enzyme leader — Boehringer Mannheim Biochemicals.

Put our restriction enzymes to the test. Call us today at 800/262-1640 and order the restriction enzymes that really cut it!
Announcing... HUMAN GENOME I

October 2 – 4, 1989
Town & Country Hotel • San Diego, CA

Human Genome I, the conference on the largest biological project ever contemplated, is set for October 2-4, 1989 in San Diego, CA. It is an international conference on the status and future of research on the human genome.

Co-chaired By
Charles R. Cantor, Ph.D.
Director, Human Genome Center
Lawrence Berkeley Laboratory

Daniel E. Koshyland Jr., Ph.D.
Editor of SCIENCE

PARTIAL LIST OF SPEAKERS FOR HUMAN GENOME I

Sydney Brenner
Director, MRC Molecular Genetics Unit
Cambridge, England

Robert Moyzis
Genetics Group Leader
Los Alamos National Laboratory

Charles Cantor
Professor of Molecular Biology
University of California, Berkeley

Ronald Davis
Professor of Biochemistry
Stanford University School of Medicine

Allan Wilson
Professor of Biochemistry
University of California, Berkeley

Tasuku Honjo
Professor of Medical Chemistry
Kyoto University Faculty of Medicine

Jean Dausset
Professor, College de France
President, Human Polymorphism Study Center (CEPH)

Hans Zachau
Professor, Institute for Physiological Chemistry
University of Munich

Peter Pearson
Chairman, Department of Human Genetics
Sylvius Laboratories, Leiden

Allan Wilson
Professor of Biochemistry
University of California, Berkeley

Thomas Caskey
Professor and Director, Institute for Molecualr Genetics
Howard Hughes Medical Institute

Russell Doolittle
Professor of Chemistry and Biology
Center for Molecular Genetics

Cassandra Smith
Associate Professor of Molecular Biology
University of California, Berkeley

Peter Dervan
Professor of Biochemistry
California Institute of Technology

David Cox
Associate Professor of Psychiatry
University of California, San Francisco

George Church
Assistant Professor of Genetics
Harvard Medical School

Renato Dulbecco
Distinguished Research Professor and Acting President
Salk Institute

Michio Oishi
Professor of Applied Microbiology
University of Tokyo

PARTIAL LIST OF SESSION TOPICS

• Organization of the Human Genome Project
• State of our Current Knowledge
• Advances in Technology: New Methods for Mapping and Sequencing
• Progress in Interesting Regions of the Human Genome
• The Diversity of the Human Genome in Different Populations

Sponsored By

SCIENCE MAGAZINE
A Publication of the American Association for the Advancement of Science

and

The Human Genome Organization (HUGO)

The conference will be accompanied by an exhibition open to commercial firms offering or planning to offer appropriate equipment. The magnitude of the project and its requirements for the latest in scientific laboratory equipment, supplies and services will make the exhibit a signficant contribution both to scientists and the companies that serve the scientific community.

SCHERAGO ASSOCIATES, INC.

Isolation of recombinant mycobacterial antigens by an automatic and generally applicable purification method for beta-galactosidase fusion proteins. J. Chromatogr. 446 (1988) 165-172, Schoel, B. Kaufmann, H.E.

Isoelectric focusing

Flattening and/or expanding pH gradients in isoelectric focusing gels exemplified with PhastSystem. Electrophoresis 9 (1988) 262-267, Hackler, R., Kleine, O.

2-Dimensional PAGE

Detection

Blotting
Electrophoretic transfer of allergenic proteins from ultrathin gels to a cya

On March 10, 1986, when PhastSystem™ was introduced, it represented a totally new concept in electrophoresis. Today, most of the major biotechnology industries in the world are equipped with PhastSystem. And PhastSystem is rapidly setting the standard for purity control of healthcare products. In 1988 alone, over 5.2 million samples were tested on PhastSystem.

These developments reflect industry confidence. Confidence in itself as a reliable source of healthcare products. Confidences could not have been developed without the support of leading scientists and engineers. Here is the story of these developments.
Chain to form an antigen binding site. Biochemistry 26:24 (1987) 7849-7855
Kubak, T. et al.

A 10-kDa cyano group-bonded fragment from the epidermal growth factor homology domain of rabbit thrombomodulin contains the primary thrombin binding site. J. Biol. Chem. 263 (1988) 5993-5996, Kurosawa, S. et al.

Chain to form an antigen binding site. Biochemistry 26:24 (1987) 7849-7855
Kubak, T. et al.

A 10-kDa cyano group-bonded fragment from the epidermal growth factor homology domain of rabbit thrombomodulin contains the primary thrombin binding site. J. Biol. Chem. 263 (1988) 5993-5996, Kurosawa, S. et al.

Evidence in the accuracy and reproducibility of PhastSystem results. Confidence in the efficiency and speed of PhastSystem. In January 1988, the Journal of Electrophoresis devoted an entire issue to articles on PhastSystem methods. Recently, forensic results obtained on PhastSystem have been accepted as valid court evidence.

The list of references continues to grow. And so does the commitment from Pharmacia. Since PhastSystem was introduced, several new gels and silver staining kit have added to the versatility and reproducibility of the original system. Many new application notes and technical files have been published.

PhastSystem owners throughout the world regularly receive a newsletter that keeps them informed on the latest additions to the system, new applications, valuable method tips and updated reference lists. Over a hundred workshops and seminars have been conducted to date on PhastSystem techniques. And within the next few months several new gels and major accessories to PhastSystem will be introduced worldwide.

At the time of this writing, PhastSystem is three years ahead of any system of its kind.
Automated Cell Counting and Sizing

Look up from your microscope...

COULTER COUNTER®

Labor-saving speed
You can free time for valuable basic research by forgetting the tedious job of manual cell counting through a microscope. The COULTER COUNTER ZM automatically counts and sizes up to 5,000 cells per second.

Upgradability for future needs
For added confidence, use a printer to obtain a hard-copy record of exact data: sample I.D., instrument settings, counts and analysis time. Add cell size distribution capability with the CHANNELIZER® 256, which includes the ability to differentiate viable vs. nonviable cells. Or, expand data handling and storage capability with AccuComp® IBM®-compatible software. Only the ZM gives you such broad flexibility in a surprisingly economical package.

All the service and support you need
For complete information about the COULTER COUNTER ZM, call the toll-free number below and ask for extension 2818. And, like all Coulter instruments, the ZM is backed by the world's most recognized service and support team. In the U.S., call

(800) 526-6932
Outside the U.S., contact your Coulter representative, or call 1 (305) 885-0131.

RECOGNIZING YOUR NEEDS
ARE MORE THAN INSTRUMENTAL
Now you can perform *in vivo* cell labeling more efficiently with Amersham's stabilized L-[³⁵S]Methionine (Cat. No. SJ1015). It features:

- No cytopathic effects from Amersham's exclusive stabilizer; assured compatibility with tissue culture systems.
- The highest specific activity—1000-1300 Ci/mmol—for better detection.
- Reduced formation of volatiles for safer handling, a result of HPLC purification and stabilization.
- Decomposition rate is less than 3% per month.

**Amersham offers a comprehensive line of other high-purity L-[³⁵S]Methionines:**

- SJ204—in potassium acetate, no stabilizer added.
- SJ235—aqueous solution, free of salts.
- SJ1515—stabilized, used in cell-free systems.
- SJ5050—stabilized, high concentration.

For more information on L-[³⁵S]Methionine for *in vivo* cell labeling as well as Amersham's other L-[³⁵S]Methionines, just write or call us toll free today.

THE NEW STANDARD FOR HIGH PERFORMANCE STATISTICAL SOFTWARE

CSS

COMPLETE STATISTICAL SYSTEM
WITH DATA BASE MANAGEMENT
AND GRAPHICS

A powerful, comprehensive, elegant, and super-fast statistical package for IBM (PC, AT, PS/2) and compatible computers. The CSS optimized user interface with fast hierarchical menus incorporates elements of artificial intelligence; even complex analyses require only a few keystrokes (batch processing is also supported). CSS features comprehensive, state of the art implementations of: Basic statistics, Multi-way frequency tables, Nonparametric statistics, Exploratory data analysis with analytic graphs, Multiple regression methods, Time series analysis with modeling and forecasting (incl. full ARIMA), General ANOVA/ANCOVA/MANOVA, Contrast analysis, Discriminant function analysis, Factor analysis, Principal components, Multidimensional scaling, Item analysis/Reliability, Log-linear analysis, Cluster analysis, Non-linear estimation, Logit/Probit analysis, Canonical analysis, Survival and Failure Time analysis (Censored data), Quality Control analysis, and much more. All statistical procedures are integrated with fast data base management and instant, presentation quality graphics (over 100 types); full support for all mono and color graphics boards (incl. VGA) and over 100 plotters and printers (incl. the HP and Postscript standards). All CSS screen output is displayed via customizable Scrollsheets™ (i.e., dynamic, user controlled, multi-layered tables with cells expandable into pop-up windows); all numbers in a Scrollsheet™ can be instantly converted into a variety of presentation quality graphs; contents of different Scrollsheets™ can be instantly aggregated, combined, compared, plotted, printed, or saved. The flexibility of the CSS input/output is practically unlimited: CSS offers an intelligent interface (read/write) to all common file formats (Lotus, Symphony, dbIII, dbIII+, DIF, SYLK, . . .) and special utilities to easily access data from incompatible programs; graphics can be saved in files compatible with desktop publishing programs (Aldus, Ventura). CSS data files can be as large as your operating system (DOS) allows; OS/2 version coming soon. CSS precision exceeds the standards of all common precision benchmarks. Technical note: The CSS user interface and all I/O were written in Assembler and bypass DOS; graphics and data management were written in Assembler and C; the computational algorithms were written in Assembler and optimized Fortran. $495 (plus $5 sh/h); 14-day money back guarantee.

In the world of micromanipulation there is no such thing as “good vibrations”

The Legendary remote control Hydraulic Systems from Narishige

Make the vibrations associated with other micromanipulators a thing of the past. From coarse positioning to ultra-precise micromanipulation, highly stable movements are made routine and simple to perform. Models are even available that provide fine resolution down to 0.2 microns, and negligible drift during long term experiments.

For microinjection, no other product can match the versatility and value of Narishige’s reproducible Micro-Injector, featuring individual digital settings of pressure and time.

Narishige’s leadership is based on our precision craftsmanship and determination to be truly innovative in product development. In the world of micromanipulation, there are no “good vibrations” except those that come from experiencing Narishige’s instruments.

Call for details and the dealer nearest you.

In the fast-moving field of capillary electrophoresis, only the Model 270A puts you in the lead.

Harness the power of capillary electrophoresis (CE) with high performance instrumentation. For meaningful quantitation and reliable analysis, CE's inherent selectivity and resolution must be complemented with accuracy and precision.

The Model 270A Analytical Capillary Electrophoresis System is the first truly integrated system designed to meet the stringent demands of quantitative CE. The system you need when every minute, every result, counts.

The human serum albumin digest was provided courtesy of Delta Biotechnology Ltd., Nottingham, U.K.

True quantitation begins with precision and accuracy in both sample injection and column temperature control. The Applied Biosystems Model 270A combines automation with a unique injector design, a thermostatted capillary compartment and proven detector technology to achieve unsurpassed reproducibility of peak areas and electrophoretic mobility.

Count on your first results within minutes after installing the Model 270A. Select a preprogrammed separation protocol, or create and store your own methods using the interactive display and keypad. The Model 270A is designed for both the novice and the seasoned user of analytical instrumentation.

Contact Applied Biosystems today, and join the leaders in advancing capillary electrophoresis from theory to application.
A SOFTWARE SYSTEM WITH THE CAPABILITIES MOST NEEDED BY MOLECULAR BIOLOGISTS TODAY

DNASTAR LASERGENE SYSTEMS offer the widest range of molecular biology analysis software available including many unique programs (BEND, MODEL, PROBE, X-RAY, MAPSEQ, R-MAP) but also offer attractively priced networks and multiple user installations or custom packages of individual programs. LASERGENE SYSTEM 190 contains 30 of the 55 programs and databases in the full LASERGENE. And with SYSTEM 190 you can upgrade to LASERGENE.

SYSTEM 190 PROGRAMS:

DATABASES. Complete and unabridged DNA (GenBank) and Protein (PIR) Sequence Data Banks on compact disk PLUS DNASTAR'S powerful search and retrieval software, fully indexed for rapid access. Keyword, pattern, matrix, consensus oligonucleotide and sequence comparison searches (query sequence up to 12Kb). Flexible data entry and sequence extraction and search storing.

SEQUENCING PROJECT MANAGEMENT. Full scale automated gel assembly supporting Maxam-Gilbert and dideoxy methods in both random and directed approaches. Complete control over data with comprehensive parameter options. Plenty of capacity for assembling all the gels from large projects. Onscreen merger editing plus vector prescreening.

SEQUENCE ANALYSIS. Translate, reverse translate and identify genes by open reading frames and codon usage frequency. All alternative genetic codes supported. Scan DNA or proteins with powerful biological pattern searching options allowing any combination of consensus strings, mismatch, position or order. Scan DNA or probes for literal and/or ambiguous restriction sites with a database of 140 enzymes. Comprehensive enzyme subsetting by enzyme characteristics, including cloning overhang compatibility and fill-in.

SEQUENCE COMPARISONS. Similarity searches, fully parameter controlled, for both DNA and proteins using optimised alignments with automatic gapping or using dot plot alignment by sliding window method for an interactive graphics orientated approach.

SECONDARY STRUCTURE FEATURES. Estimation of helix, turn, beta sheet, hydrophilicity, hydrophobic moment, charge, molecular weight, potential antigenic sites and amino acid content in proteins. Search for loop-stem structures in DNA and RNA.

SEQUENCE EDITING, INSPECTION, PRESENTATION. DNA and protein sequence screen editing with cursor orientated functions for composing, reorganising, splicing, cutting, searching sequences, pasting to and from file and to printer. Flexible sequence display and presentation. Production of publication quality circular and linear maps.

ONSCREEN WINDOWS for Help, automatic File Pick Screens and file management, printer and font control and all DOS utilities INSIDE EVERY PROGRAM. Automatic sequence file conversion to and from all major non-DNASTAR format styles.

DNASTAR software runs on all IBM/COMPAQ-compatible microcomputers (inc. PS/2)—Apple versions coming. All compatible dot matrix & laser printers & Hewlett Packard Plotters supported. Screen graphics require EGA or higher. UPDATING is quarterly. Each c.d. update contains complete databases to date. DNASTAR software enhancements and new programs distributed quarterly or as released.

BROADEN YOUR SCOPE

The Nikon/Narishige NT-88 Cell Manipulation Work Station

Nikon and Narishige have broadened the scope of cellular research with the creation of the NT-88 Cell Manipulation Work Station. It’s the only system to combine hang-type micromanipulators for comfort with the world-renowned Diaphot for crisp, clear images.

The NT-88 provides smooth, vibration-free operation, combining superbly crafted hydraulic remote controls with the highly stable Nikon microscope.

Depending on your application, a wide variety of fully compatible coarse and fine micromanipulators, microinjectors, pipette formation equipment, and optional stage mover, are all available from Nikon.

For more information on how to broaden your scope, contact your nearest Nikon dealer or write Nikon Inc., Instrument Group, 623 Stewart Avenue, Garden City, NY 11530
Tel: (516) 222-0200

If a picture is worth a thousand words, what are a thousand pictures worth?

Sygraph has more technical graphics than any other PC or mainframe package.

If you already use a technical graphics package, you probably have been frustrated to find that it cannot produce the sophisticated graphs you need for presentation or publication. You want asymmetrical error bars, but it draws only symmetric. You want logs to any base, but it does only base 10. You want contouring over irregularly spaced data points with several different smoothers, but it contours only over regular grids.

Sygraph was developed for the scientist. Text can be infinitely sized and angled in two or three dimensions. Composite 3-D graphs can be produced with a surprisingly simple set of commands. And unlike "paint" programs, it can process programmable macros to produce customized graphs for similar applications on different data.

Sygraph interfaces to popular microcomputer file formats and it includes drivers for over 50 color boards, plotters, printers, cameras and other graphic devices. If you use a spreadsheet, a data base, or a statistics package like SYSTAT, SAS or SPSS, now you can produce the graphics worthy of your research.

Sygraph operates on IBM PCs and compatibles. Single copy price $495. Site licenses, quantity prices and training seminars available. No fees for technical support.

SYSTAT, SAS and SPSS are registered trademarks of SYSTAT, Inc., SAS Institute Inc. and SPSS Inc., respectively.

Features: Overlay plots Drivers for most graphics devices Two-dimensional: Error Bars Scatterplots Line and Vector Graphs Vector, Dot, Bubble and Quantile Plots Bar Graphs (single, multiple, stacked, range) Box plots (single and grouped) Stem-and-leaf diagrams Linear, quadratic, step, spline, polynomial, LOWESS, exponential smoothing Confidence Intervals and ellipsoids (any alpha value) Smooth mathematical functions Rectangular or polar coordinates Log and power scales ANOVA interaction plots Histograms (regular, cumulative, fuzzy) Stripe and jitter plots Gaussian histogram smoothing Scatterplot matrices Voronoi Tesselations Minimum spanning tree Maps with geographic projections (U.S. state boundary file included) Chernoff faces Star plots Fourier plots Pie charts Contour plots on regularly and irregularly spaced points Control charts and limits Three-dimensional: Data plots Smooth function plots Vector plots Linear, quadratic, spline, least squares surface smoothing Three-dimensional type fonts Import/export Lotus, dBase, and DIF files Full screen data editor

Introducing
S-OLIGOS
Anti-Sense DNA
for Experimentation in Living Cells

S-OLIGOS ARE SULFUR DERIVATIZED OLIGONUCLEOTIDES.

CHARACTERISTICS -
• MORE CELL PERMEABLE
• RESISTANT TO NUCLEASES

RESULT -
• REPLICATION, TRANSCRIPTION
  AND TRANSLATION SIGNIFICANTLY BLOCKED

FOR A BIBLIOGRAPHY ON S-OLIGOS, OR INFORMATION ON
OUR OTHER OLIGONUCLEOTIDE PRODUCTS, PLEASE CALL

Brain Structure, Learning, and Memory

Edited by Joel L. Davis and Robert W.
Newburgh, Office of Naval Research, and
Edward J. Wegman, George Mason
University

This new book, based on a AAAS Annual Meeting
symposium, explores the connections between cellular
and computational approaches to understanding the
neural basis of learning and memory. Incorporating such
diverse ideas as invertebrate and computer-based
models, cerebellar involvement in motor engrams,
learning, and the sensory sciences; nonstationary point
processes; and models closely tied to vertebrate neural
nets, the contributors not only shed new light on
important brain functions but also provide an example
of how neuroscience research should be structured.

$35.00; AAAS members $28.00 (include membership number
Order from: Westview Press, Dept. AAAS, 5500 Central Avenue,
Boulder, CO 80301. (Add $2.50 postage and handling for the
first copy, 75 cents for each additional copy; allow 4–6 weeks
for delivery.)

Published by Westview Press for AAAS

With Foto/Prep I, you get two
transilluminators in one -
Analytical and Preparative.

FOTO/PREP I is the first innovative transilluminator
to offer the sensitivity of 300nm midrange UV, with the
kind of protection previously provided only by 366nm
UV sources.

The key? A unique sensitivity control device. In the
analytical mode it provides the nanogram level
sensitivity distinguishing all FOTODYNE 300nm DNA
transilluminators. Switching to the preparative mode,
the gel can be exposed as long as 20 minutes with
little or no detectable photonicking damage. Yet, a
2000bp band containing less than 10 nanograms of
DNA can be visualized for cutting.

FOTO/PREP I comes with a replaceable UV trans-
parent protective sheet, so gels can be cut directly on
its surface without damaging the UV glass. The
molded, UV blocking cover can be raised from 0° to
90° to allow easy access to the gel.

For more information call or write.

Stop filing index cards and misplacing references! Organize them instead, with a specially designed database program called Pro-Cite.

Pro-Cite makes it easy to manage references. Now you can sort, search, or index references from journal articles, books, or any other source. Keep references organized, include long abstracts or notes, and format bibliographies in any style.

**Pro-Cite puts references in order.**

Call (313) 996-1580 today. Pro-Cite is available for IBM® PCs and the Macintosh® and the programs are data compatible. Other PBS products include Biblio-Links® (companion programs that transfer records into Pro-Cite) and Pro-Search® (a specialized communications program for searching BRS and DIALOG (IBM only)). Pro-Cite is now NOT copy protected.

Intern. Trade Fair + Congress for Biotechnology
Hannover 17th – 19th Oct. ’89
The World Forum for Biotechnology

Trade Fair

About 500 international exhibitors from industry, large-scale research centres and university institutes will be presenting a comprehensive display of application-orientated biotechnology.

The exhibition programme:
- BT research
- BT processes and products
- BT laboratory and production technology
- BT services
- BT applications in pharmacy, the chemical industry, food production, agriculture, environmental protection, bioenergy, raw material extraction and consumer goods

Congress and Seminars

A venue for experts from all over the world.

The congress themes in ’89:
17.10.89: Protein engineering
18.10.89: Chromatographic techniques for extracting bio-products
19.10.89: Polysaccharides and oligosaccharides – production and utilization

These are supplemented by accompanying seminars and workshop based upon practical experience and intended for practical application.

SCIENCE has 153,192* good reasons for being number one.

The pre-eminence of SCIENCE as the definitive life science journal starts with our circulation, a full 435% greater than our nearest rival! But that's only one reason for our supremacy. SCIENCE reaches more doctoral scientists, more NIH/Hughes Institute grant recipients, more U.S. science policy leaders than any other publication. For working scientists who must keep in touch with the life sciences universe, there is no choice but to read SCIENCE. For businesses with products or services to sell them, there is no choice but to advertise in SCIENCE.
