Stratagene has streamlined agarose gel electrophoresis and blotting. The system decreases the time required, from sample loading to prehybridization ten fold.

**VAGE™ System**

The VAGE™ vertical agarose/acrylamide gel electrophoresis system allows the casting of agarose or acrylamide gels in the unit. Nucleic acids can be electrophoresed through a 3 mm, 0.8% vertical agarose gel in less than two hours with excellent resolution (Figure 1). Because the gels are thin, staining, depuration, and denaturation can be accomplished in 15 minutes.

**Figure 1:** Fractionation of end labeled DNA markers on 3 mm thick 0.8% agarose by the VAGE apparatus and transfer to Duralon—UV™ membranes using the PosiBlot pressure blouter.

A. Ethidium stained gel showing high resolution.
B. Same gel after pressure blotting.
C. Autoradiogram of membrane after pressure transfer.
The Stratalinker™ UV Crosslinker fixes nucleic acids to solid supports such as nitrocellulose or nylon membranes, in less than one minute. This compares favorably to vacuum baking, which requires 2 hours. The Stratalinker actually monitors the ultraviolet energy flux and deactivates the light source upon reaching the user-programmed energy level (Figure 4). Figure 3 shows an autoradiogram of a human genomic Southern blot performed using the VAGE, PosiBlot and Stratalinker all in 2.5 hours.

Stratagene offers a full selection of nitrocellulose, reinforced nitrocellulose and nylon membranes. Each membrane is stringently lot tested to ensure consistency when performing Northern and Southern blotting. Please call Technical Services for detailed information on Stratagene’s time saving blotting systems and membranes.
Eppendorf® spins out two new winners.

Two new Micro Centrifuges that make your work faster, easier, and safer.

One has refrigeration. The new Model 5402 Refrigerated Micro Centrifuge spins heat-sensitive samples at temperatures as low as -9°C,* bringing the cold room to your benchtop.

Both control aerosols. The refrigerated model and the new Model 5415C Micro Centrifuge both use new, easily interchangeable rotors with lids for added quiet, convenience, and safety.

Call 800-645-3050; in New York, 516-334-7500, for more information. Or write Brinkmann Instruments, Inc., Cantiague Road, Westbury, NY 11590. (In Canada: 416-675-7911; 50 Galaxy Blvd., Rexdale, Ont. M9W 4Y5)

*At 12,500 rpm.

After centuries of practice, mankind perfects scientific calculations: MathCAD.

Announcing MathCAD 2.5: The Dawn of a New Age.

What the historians will call it, only time will tell. Perhaps the Century of Speed, or the Era of Ease. But whatever the name, this is the age of MathCAD 2.5, the only math package that looks and works the way you think.

MathCAD 2.5 includes 3-D plotting, HPGL sketch import, and PostScript output.

MathCAD is far and away the best-selling math package in the world. Because it lets you perform engineering and scientific calculations in a way that's faster, more natural and less error-prone than the way you're doing them now—whether you're using a scratchpad, calculator, spreadsheet or program that you wrote yourself.

And now we've made the best even better. MathCAD 2.5 is a dramatically improved version that includes three-dimensional plotting, enhanced numerical analysis, and the ability to import HPGL files from most popular CAD programs, including AutoCAD. And now you can print on PostScript compatible printers.

And like before, MathCAD's live document interface lets you enter equations anywhere on the screen, add text to support your work, and graph the results. Then print your analysis in presentation-quality documents.

It has over 120 commonly used functions built right in, for handling equations and formulas, as well as exponentials, differentials, cubic splines, FFTs and matrices.

No matter what kind of math you do, MathCAD 2.5 has a solution for you. In fact, it's used by over 60,000 engineers and scientists, including electrical, industrial, and mechanical engineers, physicists, biologists, and economists.

But don't take our word for it; just ask the experts. PC Magazine recently described MathCAD as "everything you have ever dreamed of in a mathematical toolbox."

And for Macintosh users, we present MathCAD 2.0, rewritten to take full advantage of the Macintosh interface. Entering operators and Greek letters into equations is pure simplicity!

Look for MathCAD 2.5 at your local software dealer, or give us a call. For more information, a free demo disk, or upgrade information, dial 1-800-MATHCAD (in MA, 617-577-1017).

Available for IBM compatibles and Macintosh computers.

**Interleukin Too.**

We're introducing not only a new Interleukin-2 RIA, but also new Interleukin-1α and Interleukin-1β RIAs. They're all highly specific and highly sensitive. And only Advanced Magnetics has all three.

All are overnight assays that save washing and incubation time. All deliver the high performance and reliability that make Advanced Magnetics a leader in immunoassay.

We also offer a new highly specific Mouse IL-1α antiserum for use in your own assays. Besides cytokines, we have a large selection of eicosanoids, phosphoinositides, and cyclic nucleotide assays, too. Satisfaction is guaranteed. Send for our complete catalog of research products.

For research only. Not for use in human clinical diagnosis.
Bristol-Myers Squibb Company presents an annual award to a scientist making an outstanding contribution in neuroscience research. Candidates for the award are to be nominated by medical schools, hospitals and neuroscience research centers. Previous award winners include Dr. Julius Axelrod, National Institute of Mental Health; Dr. Arvid Carlsson, University of Göteborg; Dr. Paul Greengard, The Rockefeller University; Dr. Tomas Hökfelt, Karolinska Institute; Dr. Walle J. H. Nauta, Massachusetts Institute of Technology; and Dr. T. P. S. Powell, University of Oxford.

**Award:** $50,000 U.S.

Deadline for Receipt of Nominations: **February 16, 1990**

Announcement of Award Recipient: **June, 1990**

**Selection Committee**

**George K. Aghajanian, M.D.**
Yale University School of Medicine and
Ribicoff Research Facilities

**Ira B. Black, M.D.**
Cornell University Medical College—
New York Hospital

**Carl W. Cotman, Ph.D.**
University of California, Irvine

**Raymond J. Dingledine, Ph.D.**
University of North Carolina at Chapel Hill

**Fred H. Gage, Ph.D.**
University of California, San Diego

**Solomon H. Snyder, M.D.**
The Johns Hopkins University
School of Medicine

Rules and official nomination forms are available from: Secretary, Award Committee
Bristol-Myers Squibb Award for Distinguished Achievement in Neuroscience Research
345 Park Avenue, 4100, New York, NY 10154.
Science Books for Young Readers

Newton at the Bat
Edited by Eric W. Schrier and William F. Allman
Why do boomerangs return? Does a curve ball really curve? Why do golf balls have dimples? This fascinating book answers these and other questions as it explains the role of science in sports. 1984; 178 pp.
#85-30S - softcover; $3.50

The Paper Airplane Book
Edited by Allen L. Hammond and Alison Fujino
This official book of the Second Great International Paper Airplane Contest includes 75 photographs of winning entries; a do-it-yourself kit with complete instructions for seven winning designs; plus construction tips, notes on the principles of flight, and a section on resources. 1985; 120 pp.
#85-33S - softcover; $8.95

Twenty Discoveries That Changed Our Lives
Edited by Allen L. Hammond
The 20 most influential scientific advances of this century are chronicled in this hard-bound collector's edition of Science 84's fifth anniversary issue. Topics include the development of the telephone, automobile, airplane, computer, and television, as well as the discovery of DNA, Einstein's theories, nuclear fusion, and much more. 1984; 190 pp.
#85-21H - hardcover; $9.95

Songs from Unsung Worlds
Edited by Bonnie Bilyeu Gordon
The rich dimensionality of science is demonstrated in this collection of science poetry. The poems written by poets such as e.e. cummings and by scientists such as J. Robert Oppenheimer record natural observations in poetic language and reflect classical themes of love, death, and friendship in scientific language. 1985; 260 pp.
#85-30H - hardcover; $14.95
#85-30S - softcover; $9.95

Order from: AAAS Books, Dept. SM, PO Box 753, Waldorf, MD 20604. Individuals must prepay or use VISA/ MasterCard. AAAS will pay postage on prepaid or credit card orders; for institutional purchase orders add $3.50 postage & handling. Please specify publication number, and allow 2-3 weeks for delivery. For shipments to California, add applicable sales tax.

American Association for the Advancement of Science

EndNote®
BIBLIOGRAPHIES ON THE APPLE MACINTOSH
Maintains a database of up to 32,000 references and builds bibliographies automatically in the style you choose. Works with Microsoft Word, MacWrite, WriteNow, and WordPerfect on the Macintosh. $129.
EndLink is a companion product that allows importing references downloaded from online services like DIALOG or BRS Colleague into EndNote. $99.

Grant Manager
FOR IBM PC OR THE APPLE MACINTOSH
Maintains grant balances to prevent overspending or under spending. Prints orders on your forms and updates grant balances automatically. In use in more than 1000 university departments. $425.
Personnel Manager is a companion program that finds the optimal allocation of people to grants over time and posts charges to Grant Manager. $425. (IBM PC)

30-Day Money Back Guarantee.

DIRECTORY OF AFRICAN UNIVERSITIES
The Association of African Universities (AAU) announces the publication of the 5th Edition of the Directory of African Universities. Published biannually, the Directory provides 500 pages of useful information on principal officers, faculties, departments, and institutions; degrees, diplomas, and certificates awarded; admission requirements; library services; and other details about 92 African universities, including postal addresses.
It is an indispensable reference tool for national and international organizations and institutions, including libraries and universities, as well as individuals concerned with higher education in Africa.
PRICE: US $35 including airmail postage (Customers will receive invoices from AAU)

Choose a precast gel from an extended range of 9 different PhastGel® media. Place gel and buffer strips in the separation unit.

Load sample. Application is automated.

Develop the gel automatically with silver or coomassie staining kits.

Program and run the method.

With PhastSystem™ you’re at least 6 steps ahead of where you’d be with a conventional electrophoresis system. In the same time it takes to cast gels and prepare buffers for a conventional system, you could be ready to store results from a protein analysis run on PhastSystem. In less than an hour you can obtain accurate and reproducible results from any typical SDS- or native-PAGE separation. And an average isoelectric focusing run takes just 30 minutes.
Once you've gotten ahead, PhastSystem helps you to stay ahead. For fast, reproducible and economic transfer of PhastGel media results, we now offer PhastTransfer™, a new electrophoretic blotting system. With the small format of PhastGel media, PhastTransfer uses less detection reagents than other electrophoretic blotting units. And it consumes only 5 ml of buffer.

Then when you need to accurately and reproducibly evaluate results — whether they are in a PhastGel, an autoradiographic film or a PhastTransfer membrane — image analysis with the help of PhastImage™ is the final step. PhastImage is easy to operate and the same scanning procedure is used for one and two-dimensional gels.

After scanning, PhastImage determines band boundaries, defines the baseline, determines the optical densities of the bands or spots and integrates the volume.

With the help of a personal computer for instrument control and data evaluation, PhastImage dramatically increases the information handling capability of PhastSystem.

PhastSystem — it's about time.
