This Week in Science

Editorial

901 A National Engineering and Technology Agency: W. F. Brinkman

Letters

News & Comment

906 Biotechnology on the Auction Block
908 NIH Goes “Extra Mile” on Gallo
909 U.S. Lags on Birth Control Development
910 The Puzzling Pulsar That Wasn’t There
911 Scientists Battle Over Grand Canyon Pollution
912 MIT Picks Biologist as President

Research News

913 Mathematics Untwists the Double Helix ■ All Wound Up in DNA
916 Impact—Geomagnetic Reversal Link Rejected
917 Hurricane Forecasting Shows Promise

Articles

920 Learning Curves in Manufacturing: L. Argote and D. Epple
925 Studies of Unusual Simple Molecules by Neutralization-Reionization Mass Spectrometry: F. W. McLafferty
930 Protein Sorting to Mitochondria: Evolutionary Conservations of Folding and Assembly: F. U. Hartl and W. Neupert

Research Article

939 Molecular Switch for Signal Transduction: Structural Differences Between Active and Inactive Forms of Protooncogenic ras Proteins: M. V. Milburn, L. Tong, A. M. deVos, A. Brünger, Z. Yamaizumi, S. Nishimura, S.-H. Kim

Reports

946 The MerR Metalloregulatory Protein Binds Mercuric Ion as a Tricorionate, Metal-Bridged Dimer: J. D. Helmann, B. T. Ballard, C. T. Walsh
949 Predator-Induced Life-History Shifts in a Freshwater Snail: T. A. Croll and A. P. Covitch
cover  Dark-field photomicrograph of the anterior hypothalamus of a hamster immunostained with antibodies to vasopressin, showing the paired suprachiasmatic nuclei (SCN) between the third ventricle and optic chiasm (top) and the magnocellular vasopressin cells (yellow fireworks) of the paraventricular nucleus, above which is the SCN. The SCN, the locus of the mammalian biological clock, can be identified as two oval structures at the base of the brain (toward title). See page 975. [Photographic image by Russell Foster]

951  Double Fertilization in *Ephedra*, a Nonflowering Seed Plant: Its Bearing on the Origin of Angiosperms: W. E. Friedman

958  Molecular Characterization of a Functional cDNA Encoding the Rat Substance P Receptor: A. D. Hershey and J. E. Krause

964  Requirement for Cotologenic Gene Products in the Clonal Deletion of I-E Reactive T Cells: D. Woodland, M. P. Haff, J. Bill, E. Palmer

967  Mini-Mouse: Disruption of the Pygmy Locus in a Transgenic Insertional Mutant: X. Xiang, K. F. Benson, K. Chada

969  Atrioatriuretic Peptide Transforms Cardiac Sodium Channels into Calcium-Conducting Channels: L. A. Sorbera and M. Morad

973  A Family of Three Mouse Potassium Channel Genes with Intronsless Coding Regions: K. G. Chandy, C. B. Williams, R. H. Spencer, B. A. Aguilera, S. Ghanshani, B. L. Tempel, G. A. Gutman

975  Transplanted Suprachiasmatic Nucleus Determines Circadian Period: M. R. Ralph, R. G. Foster, F. C. Davis, M. Menaker

978  Regularization Algorithms for Learning That Are Equivalent to Multilayer Networks: T. Poggio and F. Girosi

**AAAS Meetings**

983  15th Annual AAAS Colloquium on Science & Technology Policy: R&D in the FY 1991 Budget ▪ Symposia Lectures ▪ Group Sessions ▪ Publications Advance Registration Form ▪ Hotel Registration Form

**Book Reviews**

**Products & Materials**

989  Custom Hybridoma Cell Line Development ▪ Biological Abstracts on Compact Disc ▪ Workstations Protect Instruments from Vibrations ▪ Mutagenesis System ▪ Nucleotide and Protein Analysis Software ▪ Chillers Expedite Cooling of Instrumentation ▪ Literature
