Regularization Algorithms for Learning That Are Equivalent to Multilayer Networks. T. Poggio and F. Girosi

15th Annual AAAS Colloquium on Science & Technology Policy: R&D in the FY 1991 Budget. Symposia Lectures Session 1. Registration Form. Hotel Registration Form

CONTENTS

23 FEBRUARY 1990 TABLE OF CONTENTS 897

Cover: Dark-field photomicrograph of the anterior hypothalamus of a hamster immunostained with antibodies to vasopressin, showing the paired suprachiasmatic nuclei (SCN) between the third ventricle and optic chiasm (top) and the magnocellular vasopressin cells (yellow fireworks) of the paraventricular nucleus, above which is the SCN. The SCN, the locus of the mammalian biological clock, can be identified as two oval structures at the base of the brain (toward title). See page 975. [Photographic image by Russell Foster]
