A new design for a new decade

In setting standards in chromatography for the new decade, Pharmacia LKB has re-designed all its chromatographic instrumentation - one company, one design, one unbeatable quality.

Our range now features full communication capabilities between the wide choice of high quality instruments. This allows you to build the system to suit your needs, whether you work with Standard Chromatography, FPLC®, or HPLC “Designed for the Biochemist” (DfB).

Hundreds of important changes have been made to increase reliability and enhance performance, including the addition of noise filters and the convenience of touch-sensitive control panels. Look out for our new instruments, such as the REC-series of chart recorders and FRAC-100 which allows fractions to be collected on the basis of drop-count as well as calibrated volume and time. These are just a few of the many new instruments that you will be seeing in the forthcoming months, instantly recognisable by the exciting new colour scheme.

Keep ahead with our new, award-winning design. It sets the standards for performance and quality in the new decade.

We help you manage biomolecules.

Purify DNA from TBE or TAE Agarose Gels in 20 Minutes with the
GENECLEAN® II Kit

DNA TREATED WITH GENECLEAN® is free of RNA, proteins and other contaminants that inhibit enzymes and is a ready substrate for restriction enzymes, polymerases, ligases and kinases. Single and double stranded sequencing reactions are remarkably free of ghost bands caused by self-priming activity of RNA. The highly pure DNA transforms procaryotic or eucaryotic cells with high efficiency.

THE GENECLEAN® II process provides excellent recovery of single and double stranded DNA and it is not inhibited by SDS, organic solvents, protein or TBE buffers.

BIO 101 WANTS YOU TO BE PLEASED WITH ITS PRODUCTS. If you are not satisfied with the performance of the GENECLEAN® KITS let us know and we will refund your payment immediately.

To order GENECLEAN® II Kit or for further information: Contact BIO 101, Inc., in U.S. or nearest distributor.

Toobtain our latest catalog call today.
Electron Microscopy Sciences

Serving the Entire EM and LM Industry for Over 20 Years.

You know us for our complete line of chemicals, accessories and supplies for all your EM, LM, SEM, CRYO, Biological and Materials Science needs: our high product quality, our reasonable prices and our prompt service. Now get to know us for our complete line of the highest quality EM equipment.

*Don’t forget our #1 sellers at the lowest prices, highest quality; Osmium Tetroxide, Tweezers, Grids, Glutaraldehyde, any quantity packed to your specifications. For customers using the Life Cell Process we now have available specially priced and packed Osmium Tetroxide that meets all the requirements for use in the Molecular Distillation Dryer (MDD-C). For more information please call.

When They Say
"It's Just Like a Maxima... Really"
Give Them This Pop Quiz.

Ever since we introduced mouse-driven windowing and graphics to chromatography, Maxima has been the industry leader by a wide margin. Now, it seems like everyone has a Maxima look-alike. It's easy to build a product that looks like Maxima, the trick is building one that performs like Maxima. How can you tell the difference? Try asking our competition these questions:

1. Is their software as fast as Maxima?
Maxima runs at least as fast as other data systems do on a '286-based PC. In fact, it's up to 10 times as fast in head-to-head competition! That's because Maxima doesn't require other software like MS-Windows™ or GEM™ that slow down your chromatography and decrease your productivity.

2. What constraints does their data system impose on you?
Maxima gives you maximum flexibility to run your analysis manually, fully automated, or anywhere in between—and to customize your results reports to fit your specific needs. Unlike other data systems, Maxima lets you determine how you want to run.

3. How difficult is their system to learn and use?
Because they weren't developed for chromatography, data systems based on GEM and MS-Windows are more difficult to learn and use. Maxima is built from the ground up for chromatography, so your screen doesn't get cluttered with icons and objects designed for office applications.

4. Can they run Lotus 1-2-3® while they acquire and archive chromatograms?
Only Maxima's multitasking lets you simultaneously acquire and archive chromatograms, control your instruments, print queued reports, and run popular software, like Lotus 1-2-3, dBase™ and word processors.

5. Do they offer built-in data management?
Maxima's Summary Database automatically assembles results for up to 1,000 samples. You can filter to select only the results you want—then view, plot, print and export summaries quickly and easily—or call up any specific chromatogram at the touch of a button.

6. Can their data system control GC and HPLC systems?
Maxima provides complete system control for Waters HPLC, GPC, IC and GC equipment, including pumps, detectors, ovens and injectors.

The Maxima 820 Chromatography Workstation
No matter what the competition says, no other data system is "just like a Maxima"... Really!
**HP Integrator Users!**

**NEW! Chrom Perfect Software For Up To 8 Integrators**

Turn your HP integrator into a state-of-the-art PC-based chromatography data system. At a very affordable price. No other system, at any price, can match Chrom Perfect’s outstanding performance.

- Collects data from up to 8 HP 3396 or 3393 integrators
- PC remains free to run large programs during data acquisition
- Plots chromatograms on-screen at over 1000 points per second with baselines drawn and peaks labeled
- Mouse-driven graphics allow on-screen peak expansion and methods development
- Plots 60 point calibration curves
- Superior integration algorithm detects peaks smaller than 1 microvolt
- Ensures complete G.I.P. documentation
- Runs on IBM-compatible PCs and supports all major displays, printers, and X/Y plotters
- Plots 1 to 8 runs for comparison
- Supports custom-formatted reports
- Provides post-run statistics and graphs
- Allows user programs in BASIC and C
- Sets up HP autosamplers

**Women, Work, and Child Welfare in the Third World**

Editors: Joanne Leslie, international nutrition consultant, and Michael Paolillo, anthropologist with the International Center for Research on Women.

Enhancement of women’s economic opportunities and raising healthy children in the Third World are two important development priorities dependent upon women balancing productive and reproductive responsibilities. In this volume, a variety of research approaches and methodologies illustrate the multifaceted nature of women’s work and child welfare. The authors’ carefully drawn conclusions identify key relationships and criteria that must be considered for the development of effective economic and health programs. The book is essential reading for all researchers and policymakers concerned about the relationship between women’s work and child welfare in the Third World.

265 pp., 1989.

$28.50 ($22.80 for AAAS members who include their membership number from Science).

Order from: Westview Press, Dept. AAAS, 5500 Central Avenue, Boulder, CO 80301. Add $2.50 postage and handling for the first book ordered; 75c for each additional book.
Announcing...

HUMAN GENOME II

October 22-24, 1990
Town & Country Hotel
San Diego, CA

The Second Annual Conference on the largest biological project ever contemplated will take place October 22-24, 1990, in San Diego, California. It is "The International Conference" dedicated to the status and future of research on the human genome.

Co-chairmen
Charles R. Cantor, Ph.D.
Director, Human Genome Center
Lawrence Berkeley Laboratory

James D. Watson, Ph.D.
Director, National Center for Human Genome Research
National Institute of Health

Partial List of Speakers

Walter Bodmer
David Botstein
Michael Waterman
Argiris Efstratiadis
Frank Ruddle
Yoshiyuki Sakaki
Mathias Uhlen
Wilhem Ansorge

Craig Venter
Kay Davies
Dan Hartl
Walter Gilbert
Nancy Wexler
Charles Coutelle
Charles DeLisi
Henry Erlich

David Housman
Francis Collins
Leroy Hood
Eric Lander
Thomas Caskey
Malcolm Ferguson-Smith
Richard Myers

Sponsored By

SCIENCE MAGAZINE
A Publication of the American Association for the Advancement of Science and

The Human Genome Organization (HUGO)

The Conference will continue to build on the success of Human Genome I which attracted over 900 scientific researchers, 32 renowned presentors, and 80 commercial exhibitors creating an atmosphere of incredible knowledge. The exhibition and scientific presentations were regarded as "invaluable" to genetic researchers and companies currently involved with the human genome project. With a complete new line up of speakers, Human Genome II promises to deliver exciting new research and developments for the 1990's.

PRP-cc (Infinity) is your best choice for fast protein separations. This column provides:

- **Fast Results**: Separate six proteins in 60 seconds by gradient elution.
- **Separate Large Proteins**: The non-porous support is ideal for high molecular weight protein separations.
- **Enhanced Detectability**: Short analysis times keep peaks narrow and detectability high.

For more information about this application, call or send for the PRP-cc brochure.

**Syringes III HPLC Columns**  
Liquid Handling Instrumentation

In U.S. circle No. 61  
In Europe circle No. 97
Bio-Rad Laboratories, a leading chemical company since 1957, begins manufacturing HPLC columns of extraordinary quality. They quickly become the standard by which all HPLC columns are judged.

Bio-Rad Laboratories develops the revolutionary Soft-Start® dual piston pump, designed especially for biochemical and analytical labs. Its unique design provides flow rate ramping which protects column integrity and thus extends useful column lifetime.

Bio-Rad Laboratories redesigns its software from a biochemist’s perspective. This remarkably versatile new software, using a Microsoft® Windows® format, brings new levels of performance, convenience, and customization to HPLC.

After centuries of practice, mankind perfects scientific calculations: MathCAD.

Announcing MathCAD 2.5: The Dawn of a New Age.

What the historians will call it, only time will tell. Perhaps the Century of Speed, or the Era of Ease. But whatever the name, this is the age of MathCAD 2.5, the only math package that looks and works the way you think.

MathCAD is far and away the best-selling math package in the world. Because it lets you perform engineering and scientific calculations in a way that's faster, more natural and less error-prone than the way you're doing them now—whether you're using a scratchpad, calculator, spreadsheet or program that you wrote yourself.

And now there's MathCAD 2.5, a dramatically improved version that includes three-dimensional plotting, enhanced numerical analysis, PostScript® printer support, and HPGL file import from popular CAD programs like AutoCAD.

And like before, MathCAD's live document interface™ lets you enter equations anywhere on the screen, add text to support your work, and graph the results. Then print your analysis in presentation-quality documents.

It has over 120 commonly used functions built right in, for handling equations and formulas, as well as exponentials, differentials, cubic splines, FFTs and matrices.

No matter what kind of math you do, MathCAD 2.5 has a solution for you. In fact, it's used by over 90,000 engineers and scientists, including electrical, industrial, and mechanical engineers, physicists, biologists and economists.

But don't take our word for it; just ask the experts. PC Magazine recently described MathCAD as “everything you have ever dreamed of in a mathematical toolbox.”

And for Macintosh® users, we present MathCAD, rewritten to take full advantage of the Macintosh interface. Entering operators and Greek letters into equations is pure simplicity!

Look for MathCAD 2.5 at your local software dealer, or give us a call. For more information, a free demo disk, or upgrade information, dial 1-800-MATHCAD (in MA, 617-577-1017).

Available for IBM® compatibles and Macintosh computers.

Call for UNIX platform availability.

TM and ® signify manufacturer's trademark or manufacturer's registered trademark respectively.

Use Waters Quanta 4000 Capillary Electrophoresis System to complete the picture.

Are you confident you're getting complete information about your samples? Missing a second quantitative separations technology?

Whether your compounds are biomolecules, pharmaceuticals or small ions, Waters Quanta 4000 Capillary Electrophoresis System provides a powerful separations tool to help you complete the picture of your sample.

What's really missing?
CE offers new selectivities and a different way to look at your compound. Supplementing analytical and preparative LC and ion chromatography with capillary electrophoresis gives you more confidence in your results. Unlike conventional LC, CE separates molecules based on charge and size at extremely high efficiencies (> 250,000 theoretical plates are common). By comparing LC chromatograms and CE electropherograms, you get more information to determine peak purity and identify coeluting compounds.

See for yourself
Find out how Waters Quanta 4000 Capillary Electrophoresis System will boost your lab's productivity. Ask for our informative videotape which includes a technology discussion, application information, and an overview of the Quanta 4000. Simply return the coupon to see how to complete the picture.

Send me Waters videotape The Science of Capillary Electrophoresis.

Division of MILLIPORE
The 1990 contest year is July 1, 1989 through June 30, 1990.

All entries must be postmarked before midnight, July 14, 1990.

For 39 years the AAAS–Westinghouse Science Journalism Awards have recognized outstanding reporting on the sciences and their engineering and technological applications, excluding health and clinical medicine. Awards honor science reporting in newspapers and general circulation magazines and on radio and television.

Entries are judged on the basis of their initiative, originality, scientific accuracy, clarity of interpretation, and value in promoting a better understanding of science by the public.

Five awards of $2,500 each are made in the categories of: newspapers with daily circulation of over 100,000, newspapers with circulation of under 100,000, general circulation magazines, radio, and television.

The 1990 Awards will be presented at the National Association of Science Writers’ banquet during the Annual Meeting of the American Association for the Advancement of Science in Washington, DC, February 15–20, 1991.

The Awards are administered by the American Association for the Advancement of Science under a grant from the Westinghouse Foundation.

For further information and entry forms, contact the AAAS Office of Communications, 1333 H Street, NW, Washington, DC 20005, or call (202) 326-6440.
