The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
cover Polished surface of a submarine basalt breccia formed by explosions >1800 meters below sea level south of Japan. The cleft on the right may be accidental but the surrounding matrix quenched and welded during the submarine eruption. The matrix consists of basalt glass shards with vesicles 0.1 to 0.2 millimeter in diameter. See page 1214. [Shipboard photograph by C. Galida, Ocean Drilling Program. Sample is ODP Leg 126 791B-66R-2, piece 1c; field of view is 1.2 centimeters by 1.8 centimeters.]
