Reports

48 Television Image of a Large Upward Electrical Discharge Above a Thunderstorm System: R. C. Franz, R. J. Nemzek, J. R. Winckler

Science is published weekly on Friday, except the last week in December, and with a supplement in March by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class Non-profit postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Copyright © 1990 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $60. Domestic institutional subscription (51 issues): $150. Foreign postage extra: Canada $46, other (surface mail) $46, air mail via Amsterdam $85. First class, airmail, school-year, and student rates on request. Single copy sales: Current issue, $3.50; back issues, $5.00; Biotechnology issue, $6.00 (for postage and handling, add per copy $0.50 U.S., $1.00 all foreign); Guide to Biotechnology Products and Instruments, $20 (for postage and handling add per copy $1.00 U.S., $1.50 Canada, $2.00 other foreign). Bulk rates on request. Authorization to photocopy material for internal or personal use, or under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 27 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1.00. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send Form 3579 to Science, P.O. Box 1723, Riverton, NJ 08077. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes. The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
51 Seawater Strontium Isotopic Variations from 2.5 Million Years Ago to the Present: R. C. Capo and D. J. DePaolo
55 Synchronous, Alternating, and Phase-Locked Stridulation by a Tropical Katydid: E. Simondo
64 An Insulin-Stimulated Protein Kinase Similar to Yeast Kinases Involved in Cell Cycle Control: T. G. Boultou, G. D. Yancopoulos, J. S. Gregory, C. Slaughter, C. Moomaw, J. Hsu, M. H. Cobb
70 Intercalation Complex of Proflavine with DNA: Structure and Dynamics by Solid-State NMR: P. Tang, C.-L. Juang, G. S. Harbison
73 Site-Specific Cleavage of a Yeast Chromosome by Oligonucleotide-Directed Triple-Helix Formation: S. A. Strobel and P. B. Dervan

Inside AAAS
76 Entries for Behavioral Science Research Prize ■ Trilateral Science Summit Held in Budapest ■ Elements of Chaos ■ Arctic Division Call for Papers ■ SWARM Division Meeting ■ AAAS Handbook ■ Westinghouse Award for Public Understanding of Science ■ AAAS Environmental Fellows

Book Reviews
78 Mesoamerica After the Decline of Teotihuacan, A.D. 700–900, and Tula of the Toltecs, reviewed by: D. Freidel ■ Astronomer by Chance, J. V. Evans ■ Evolutionary Phenomena in Galaxies, V. Trimble ■ Books Received

Products & Materials
82 Computer for Measuring Geological Resistance ■ Chromatography Storage Cabinets ■ Thermal Cycler for DNA Sequencing ■ Containment Vacuum Cleaner ■ Software for Drawing Figures ■ Protein Purification System ■ Literature

COVER Chirp entrainment by the katydid *Mecopoda* to periodic acoustic stimulation at two different stimulus intensities: plots obtained by iteration of the Poincaré map. The abscissa represents input stimulus rate and the ordinate, phase. At each stimulus rate the map was iterated 50 times: the first 10 iterations are represented by yellow dots while the last 40 iterations (steady-state) are shown in red. The plots identify regions of phase-locked response. See page 55.
