This Week in Science

Editorial

457 Dialog on the Future of Agriculture

Letters

463 Cold Fusion at Texas A&M: D. M. Anderson; J. O'M. Bockris; D. H. Worledge; G. Taubes Viral Etiology of AIDS and the Gallo Probe, A. B. Sabin; J. W. Shields

News & Comment

468 Oregon Puts Bold Health Plan on Ice • Oregon's Plan Comes to the Capital • Listing to Starboard: The Oregon Formula
471 NIH Sued Over Misconduct Case
472 A Base Dispute
473 SSC Cost Estimates Climb
474 Radiation Exposure: Hot Legacy of the Cold War • Hanford Releases Released
475 Briefings: Bick Replacement Named • Yet Another Job for Wyngaarden • Doing Science at the Gates of Hell • Chinese Still Coming

Research News

476 Meta-Analysis in the Breach • How to Perform a Meta-Analysis • Richard Peto: Statistician with a Mission
481 New Greenhouse Report Puts Down Dissenters • The Greenhouse Consensus
482 New Clue to Cancer Metastasis Found

Perspectives

488 Directed Evolution of Nucleic Acids by Independent Replication and Selection: J. Abelson
489 Telomeres and Their Synthesis: E. H. Blackburn

Articles

491 From Force Fields to Dynamics: Classical and Quantal Paths: D. G. Truhlar and M. S. Gordon

Research Articles

505 Systematic Evolution of Ligands by Exponential Enrichment: RNA Ligands to Bacteriophage T4 DNA Polymerase: C. TuErx and L. Gold
511 The Hin Invertasome: Protein-Mediated Joining of Distant Recombination Sites at the Enhancer: K. A. Heichman and R. C. Johnson

Reports

518 Structural Transitions upon Ligand Binding in a Cooperative Dimeric Hemoglobin: W. E. Royer, Jr., W. A. Hendrickson, E. Chiancone
521 Molecular Structure of Charybdotoxin, a Pore-Directed Inhibitor of Potassium Ion Channels: W. Masserski, Jr., A. G. Redfield, D. R. Hare, C. Miller
524 The Energetic Cost of Limbless Locomotion: M. Walton, B. C. Jayne, A. F. Bennett

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 1990 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $90. Domestic institutional subscription (51 issues): $150. Foreign postage extra: Canada $46, other (surface mail) $46, air mail via Amsterdam $86. First class, airmail, school-year, and student rates on request. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send change of address to Science, P.O. Box 1723, Riverton, NJ 08077. Single copy sales: Current issue, $3.50; back issues, $5.00; Biotechnology issue, $6.00 (for postage and handling, add per copy $0.50 U.S., $1.00 all foreign); Guide to Biotechnology Products and Instruments, $20 (for postage and handling add per copy $1.00 U.S., $1.50 Canada, $2.00 other foreign). Bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 22 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

Protection Against Mucoi Pseudomonas aeruginosa in Rodent Models of Endobronchial Infections: G. B. Pier, G. J. Small, H. B. Warren

Regulation of Activity of a Transcriptional Anti-Terminator in E. coli by Phosphorylation in Vivo: O. Amster-Choder and A. Wright

Antibody-Mediated Activation of Drosophila Heat Shock Factor in Vitro: V. Zimarino, S. Wilson, C. Wu

Specific Tropism of HIV-1 for Microglial Cells in Primary Human Brain Cultures: B. A. Watkins, H. H. Dorn, W. B. Kelly, R. C. Armstrong, B. J. Potts, F. Michaels, C. V. Kufta, M. Dubois-Dalcq

Protein Tyrosine Phosphatase Activity of an Essential Virulence Determinant in Yersinia: K. Guan and J. E. Dixon

A Mouse Macrophage Factor Induces Head Structures and Organizes a Body Axis in Xenopus: S. Sorkin, G. G. Wong, D. A. Melton

Binocular Depth Reversals Despite Familiarity Cues: An Artifact?: J. A. Deutsch and V. S. Ramachandran; E. Peli; A. Van den Enden and H. Spekreijse

German National Socialism and the Quest for Nuclear Power, 1939–1949, reviewed by P. Hayes Recollections of My Life; The Never-Ceasing Search; Song Among the Ruins; Science, Churchill and Me A Very Decided Preference; Landau; Chandrasekhar Venkata Raman, K. Livingstone The Art of Measurement, R. C. Ritter Stress Proteins in Biology and Medicine, L. E. Hightower Books Received
