* SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484450) paid at Washington, DC, and additional mailing offices. Copyright © 1990 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $80. Domestic institutional subscription (51 issues): $150. Foreign postage extra: Canada $46, other (surface mail) $46, air mail via Amsterdam $85. First class, airmail, school-year, and student rates on request. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send change of address to Science, P.O. Box 1723, Riverton, Nj 08077. Single copy sales: Current issue, $5.50; back issues, $5.00; Biotechnology issue, $6.00 (for postage and handling, add per copy $0.50 U.S., $1.00 all foreign); Guide to Biotechnology Products and Instruments, $20 (for postage and handling add per copy $1.00 U.S., $1.50 Canada, $2.00 other foreign). Bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 27 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1-10. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes. * 

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
COVER  A false-color image of the core of the cluster of galaxies Abell 2029. Most of the objects are galaxies which reside within the halo of the massive giant that dominates the cluster. This galaxy is one of the largest and most luminous in the universe, 100 times brighter than our own Milky Way. See page 539. [Photograph by Juan M. Uson, Stephen P. Boughn, and Jeffrey R. Kuhn]

Reports

541 A Novel Topological Compression Mechanism in a Covalent Liquid: L. Stixrude and M. S. T. Bukowskina

543 Tetraplex Formation of a Guanine-Containing Nonameric DNA Fragment: R. Jin, K. J. Breslauer, R. A. Jones, B. L. Gaffney

549 Involvement of the Silencer and UAS Binding Protein RAP1 in Regulation of Telomere Length: A. J. Lustig, S. Kurzt, D. Shore

553 Protection of Mice Against the Lyme Disease Agent by Immunizing with Recombinant OspA: E. Fikrig, S. W. Barthold, F. S. Kantor, R. A. Flavella

562 Molecular Cloning and Functional Expression of the Cardiac Sarcomemmal Na<sup>+</sup>-Ca<sup>2+</sup> Exchanger: D. A. Nicoll, S. Longoni, K. D. Philipson

565 Voltage-Independent Calcium Release in Heart Muscle: E. Niggli and W. J. Lederer

568 Restoration of Inactivation in Mutants of Shaker Potassium Channels by a Peptide Derived from Shb: W. N. Zagotta, T. Hoshi, R. W. Aldrich

Book Reviews

574 At the Heart of the Bomb, reviewed by: J. R. Sutton ■ Morphogenesis, A. K. Harris ■ Genetic Data Analysis, R. R. Hudson ■ Molecular Astrophysics, S. Green ■ Books Received

Products & Materials

578 Noncontact Thermometers ■ Automated Peptide Synthesizer ■ Laboratory on a Stick ■ Ion Measurement in Living Cells ■ Computer Virus Simulator ■ Bibliographic Reference Software ■ Messenger RNA Isolation Kit ■ Literature
