The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
cover  Topics spanning the spectrum of physical, life, social sciences, and
technology will be presented at the AAAS Annual Meeting, 14 to 19 February, in
Washington, DC. A small sampling of slides from one of the more than 200
symposia, technical sessions, and workshops is depicted on the cover (courtesy of K.
Dunlap and P. Brehm, D. E. Morse, and R. B. Silver, whose work will be presented
at the symposium on “New Perspectives in Cellular Signaling”). The meeting will
also include plenary lectures, a special seminar on the neurosciences, poster sessions,
exhibits, short courses, and an employment exchange. For details, see page 1437.
