Reports

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 1991 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $82. Domestic institutional subscription (51 issues): $150. Foreign postage extra: Canada $46, other (surface mail) $46, air freight $90. First class, airmail, school-year, and student rates on request. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send change of address to Science, P.O. Box 1723, Riverton, NJ 08077. Single copy sales: $6.00 per issue prepaid includes surface postage. Guide to Biotechnology Products and Instruments, $20. Bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per page plus $0.10 per page is paid directly to CCC, 27 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes. The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
COVER Atomic force microscope images reveal the atomic arrangement of the first monolayer of copper atoms (top layer) electrodeposited on a gold crystal (bottom layer). The atomic spacing of this first copper layer differs from that of the bulk when the reaction is carried out in sulfate electrolyte. See page 183. [Images by S. A. C. Gould and S. Manne et al.]

183 Atomic-Resolution Electrochemistry with the Atomic Force Microscope: Copper Deposition on Gold: S. MANNE, P. K. HANSMA, J. MASSIE, V. B. ELINGS, A. A. GEWIRTH

186 Methylation-Sensitive Sequence-Specific DNA Binding by the c-Myc Basic Region: G. C. PRENDERGAST and E. B. ZIFF

189 Distinct Protein Targets for Signals Acting at the c-fos Serum Response Element: R. GRAHAM and M. GILMAN

192 Association of B Cell Antigen Receptor with Protein Tyrosine Kinase Lyn: Y. YAMANASHI, T. KAKIUCHI, J. MIZUGUCHI, T. YAMAMOTO, K. TOYOSHIMA

195 Vaccination for Disease: S. OEHEN, H. HENGARTNER, R. M. ZINKERNAGEL

198 Altered Synaptic Plasticity in Drosophila Memory Mutants with a Defective Cyclic AMP Cascade: Y. ZHONG and C.-F. WU

201 Coordinate Regulation of β-Lactamase Induction and Peptidoglycan Composition by the amp Operon: E. TUOMANEN, S. LINDQUIST, S. SANDE, M. GALLEN, K. LIGHT, D. GAGE, S. NORMARK

204 Signal Transduction by Interferon-α Through Arachidonic Acid Metabolism: G. E. HANNIGAN and B. R. G. WILLIAMS

Book Reviews

210 Science—The Endless Frontier and American Science Policy Since World War II, reviewed by D. A. WILSON ■ The Fifth Branch, S. B. FOOTE ■ Peerless Science, S. S. BLUME ■ Books Received
