288 CCAAT-Enhancer Binding Protein: A Component of a Differentiation Switch: R. M. Umeek, A. D. Friedman, S. L. McKnight

Reports
293 An Antimony Sulfide with a Two-Dimensional, Intersecting System of Channels: J. B. Parise
COVER  Lakes and ponds on the arctic tundra with Itigaknit Mountain in the background, North Slope, Alaska. These aquatic ecosystems are continuously releasing carbon dioxide to the atmosphere. Much of the carbon originates in terrestrial environments, and accounting for this release substantially lowers the estimate of the worldwide arctic sink for atmospheric carbon dioxide. See page 298.
