**SCIENCE** (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484480) paid at Washington, DC, and additional mailing offices. Copyright © 1991 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $82 ($60 allocated to subscription). Domestic institutional subscription (51 issues): $150. Foreign postage extra: Canada $46, other (surface mail) $46, air freight $90. First class, airmail, school-year, and student rates on request. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send change of address to Science, P.O. Box 2053, Marion, OH 43305-2003. Single copy sales: $6.00 per issue prepaid includes surface postage; Guide to Biotechnology Products and Instruments, $20. Bulk rates on request. Authorization to photocopy material for internal or personal use, or the internal or personal use of specific clients, is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per page plus $0.10 per page is paid directly to CCC, 27 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
COVER Primary sensory areas of rat neocortex, revealed by computer-enhanced acetylcholinesterase histochemistry. Somatosensory cortex (center) is organized into discrete "barrels," functional units of thalamic axons and cortical neurons, arranged in a pattern isomorphic to specialized sensory hairs on the rat's skin. Visual cortex (lower right), which normally has a more uniform pattern, develops barrels when transplanted to somatosensory cortex, indicating that these diverse cortical areas have the potential to form similar structures. See page 1556. [Photograph by B. L. Schlaggar, D. D. M. O'Leary, and J. Plotkin]

1536 Satellite Observations of Smoke from Oil Fires in Kuwait: S. S. Limaye, V. E. Suomi, C. Velden, G. Tripoli

1542 Light-Transparent Phase Formed by Room-Temperature Compression of Graphite: W. Utsumi and T. Yagi

1544 Monolayer Crystallization of Flagellar L-P Rings by Sequential Addition and Depletion of Lipid: T. Akiba, H. Yoshimura, K. Nambara

1546 Dopamine Activation of an Orphan of the Steroid Receptor Superfamily: R. F. Power, J. P. Lydon, O. M. Connelly, B. W. O'Malley

1548 Recognition by Class II Alloreactive T Cells of Processed Determinants from Human Serum Proteins: P. Panina-Bordignon, G. Corrardin, E. Roosnek, A. Sette, A. LanAVECCHIA

1551 Generation of Torsional and Vertical Eye Position Signals by the Interstitial Nucleus of Cajal: J. D. Crawford, W. Cadera, T. VlV

1553 Mediation of the Attachment or Fusion Step in Vesicular Transport by the GTP-Binding Ypd Protein: N. Segert

1556 Potential of Visual Cortex to Develop an Array of Functional Units Unique to Somatosensory Cortex: B. L. Schlaggar and D. D. M. O'Leary

1560 A Distinct Potassium Channel Polypeptide Encoded by the Drosophila egg Locus: J. WARMKE, R. DRYSDALE, B. GANETZKY

1562 Alteration of Four Identified K+ Currents in Drosophila Muscle by Mutations in egg: Y. Zhong and C.-F. Wu
