495  This Week in Science

497  Jet-Powered Flight

507  More evidence in the Gallo probe; getting tough on reproductive toxins; etc.

508  X-Ray Astronomy: The Unkindest Cut  ■ Chipping at the Edges of AXAF's Territory
511  WHO AIDS Program: Moving on a New Track
512  Rockefeller's $20 Million Gift
513  NIH Grants: Better Late Than Never?  ■ Rescoping A Hubble Mainstay
514  Abortion Stirs the Neuroscience Gumbo

515  Lab of the Rising Microsuns
517  Genetics Survey Gains Momentum
518  Nobel Prizes '91: Physics: Untangling Spaghetti  ■ Chemistry: A Certain Resonance  ■ Economics: Transactional Analysis
520  Collagen: A New Probe Into Prehistoric Diet
521  On the Trail of the Errant T Cells of Multiple Sclerosis
522  Briefings: Treating AIDS With Worts  ■ Genetic Bill Vetted  ■ Fish Research Stock in Jeopardy  ■ Commuter Shuttle  ■ Selling Shares in the SSC  ■ Packard Fellowships  ■ Mt. Wilson Staves off Interference  ■ By Jove, It Works  ■ Microbiologists Look at Biowarfare

528  Of Genes and Genomes: D. M. Hillis and J. B. Bull

529  Control of Granulocytes and Macrophages: Molecular, Cellular, and Clinical Aspects: D. Metcalf

539  X-ray Structure of the GCN4 Leucine Zipper, a Two-Stranded, Parallel Coiled Coil: E. K. O'Shea, J. D. Klemm, P. S. Kim, T. Alber

548  Clathrate Hydrate Formation in Amorphous Cometary Ice Analogs in Vacuo: D. Blake, L. Allamandola, S. Sandford, D. Hudgins, F. Freund

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 1991 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $82 ($47 allocated to subscription). Domestic institutional subscription (51 issues): $150. Foreign postage extra: Mexico, Caribbean (surface mail) $50; Other countries (air assist delivery) $95. First class, airmail, student and emeritus rates on request. Canadian rates with GST available upon request, GST #1254-98132. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send change of address to Science, P.O. Box 2005, Marion, OH 43302-2005. Single copy sales: $6.00 per issue prepaid includes surface postage. Guide to Biotechnology Products and Instruments, $20. Bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 27 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/93 $1 + .10. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
551 U and Sr Isotopes in Ground Water and Calcite, Yucca Mountain, Nevada: Evidence Against Upwelling Water: J. S. STUCKLESS, Z. E. PETERMAN, D. R. MUHS

554 Gene Trees and the Origins of Inbred Strains of Mice: W. R. ATCHLEY AND W. M. FITCH

558 Activation of Early Gene Expression in T Lymphocytes by Oct-1 and an Inducible Protein, OAP40: K. S. ULLMAN, W. M. FLANAGAN, C. A. EDWARDS, G. R. CRABTREE

562 Establishment of Cell Type by Compartimentalized Activation of a Transcription Factor: P. MARGOLIS, A. DRIKS, R. LOSICK

568 Phosphorylation of c-Src on Tyrosine 527 by Another Protein Tyrosine Kinase: J. E. THOMAS, P. SORIANO, J. S. BRUGGE

576 Cloning and Expression of a Cocaine-Sensitive Dopamine Transporter Complementary DNA: S. SHIMADA, S. KITAYAMA, C. -L. LIN, A. PATEL, E. NANTHAKUMAR, P. GREGOR, M. KUHAR, G. UHL

578 Cloning and Expression of a Cocaine-Sensitive Rat Dopamine Transporter: J. E. KILTY, D. LORANG, S. G. AMARA

579 Cloning of a Serotonin Transporter Affected by Antidepressants: B. J. HOFFMAN, E. MEZEE, M. J. BROWNSTEIN

584 AAAS Seminar Reaffirms Strong Bond Between German, U.S. Science Communities • Eyes on the Future • In Brief • AAAS Adopts New Resolution

588 A History of the International Chemical Industry, reviewed by A. S. TRAVIS • Japan's Software Factories, D. COLLIS • Acoustic Behavior of Insects, R. HOY • Infectious Diseases of Humans, S. TULJAPURKAR • Books Received

593 Mini Horizontal Electrophoresis Chamber • DNA Sequencing Template Kit • Pilot-Scale Chromatography • Scientific Clip Art Software • Biosensor for Peripheral Tissue • Automated Carbohydrate Analysis • Tissue Homogenizer • Endotoxin Remover • Literature

Table of Contents

Cover Representation of the interaction of surfactant protein B (SP-B) with phospholipids in pulmonary surfactant. The hydrophilic domains of the protein (yellow squares) interact with the charges of the phospholipid polar head groups (circles), and the hydrophobic stretches of the protein (orange arches) interact with the acyl side chains of the phospholipids (vertical lines). These interactions provide the basis of pulmonary surfactant function in resisting surface tension and collapse of alveoli. See page 566. [Image from C. G. Cochrane and S. D. Revak]
