■ The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
COVER  Electron distribution in C_{60} (buckminsterfullerene) at 1000 kelvin
(foreground: diameter, 7.1 angstroms), obtained from quantum molecular
dynamics simulations. The colors yellow, green, and blue denote regions of successively
greater electron density. The atomic structure of C_{60} (background) consists of five-
and six-membered rings arranged in the shape of a soccer ball. See Editorial, page
1705, and Molecule of the Year, page 1706. [Simulations and image by J. Bernholc,
