Research Article

817 A Yeast Chromosomal Origin of DNA Replication Defined by Multiple Functional Elements: Y. Marahrens and B. Stillman
COVER  A cluster of the sea star Pisaster ochraceus on a beach of the Pacific Rim National Park, Vancouver Island, British Columbia. The oocytes from this echinoderm have been used as a source of the mitogen-activated protein (MAP) kinase p44\textsuperscript{\textastisco}k, which is now shown to be phosphorylated and activated by the lymphocyte protein tyrosine kinase p56\textsuperscript{\textastisco}k. See page 853. [Photograph by Peter Thomas]
