VOL. 256 • 10 APRIL 1992

SCIENCE · VOL. 256 · 10 APRIL 1992
Polarized light micrograph of asters (systems of microtubules emanating from centrosomes; these microtubules contribute to the mitotic spindle during cell division) in cytoplasmic lysates prepared from oocytes of the Atlantic surf clam, Spisula solidissima. A method of duplicating centrioles outside of the confines of the cell has now been developed. See page 219. [Photomicrograph by Robert E. Palazo]
Science 256 (5054), 155-255.
