Unraveling membrane traffic signals
Eastern Aphrodite Terra, Venus, looking south across MiraIaidji corona (image, ~300 kilometers across). Foreground lineaments represent crustal fractures; rectangles indicate missing data. The blurring of eastern Aphrodite Terra by magma diapirs indicates that it is neither a divergent nor a convergent plate boundary as previously interpreted. See page 526. [Image: David P. Anderson, Southern Methodist University, using NASA Magellan SAR and altimetry data; vertical exaggeration, 20 times]

Manganese Oxide Octahedral Molecular Sieves: Preparation, Characterization, and Applications
Y. F. Shen, R. P. Zeiger, R. N. DeGuzman, S. L. Suib, L. McCurdy, D. I. Potter, C. L. O'Young

Vapor-Condensation Generation and STM Analysis of Fullerene Tubes

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
