Pinnacles of ice and rock on Nevado Tauliraju (5830 meters above sea level) guard two extensive ice fields in the Cordillera Blanca, Peru. Two ice cores from an ice field on the col of Huascaran provide a perspective of climate and the environment in the tropics back to glacial times. These frozen archives are disappearing rapidly under the current climate conditions. See page 46 and the News story on page 32. [Photo: Lonnie G. Thompson]
