Three-dimensional power spectrum of solar oscillations from observations by the Global Oscillation Network Group (GONG). These data are for sound waves with 30 to 150 wavelengths around the sun of varying latitudinal extent and periods of 4 to 12 minutes. Greater power is denoted by blue-green tones. The curved sheets represent distinct radial overtones of the oscillations. See the special section on helioseismology (pages 1281–1309) and a News story (page 1264). (GONG is an international project supported by the National Science Foundation.) Image: N. Brummell and D. Haber

PHASE THREE OF THE BILLIONS OF ROCKET ENGINE TESTS
The Air Force spent more than $1 billion rocket engine test program, but the Senate Appropriations Committee requires NASA to continue the tests.

Change of address: allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to Science, P.O. Box 1811, Danbury, CT 06813-1811. Single copy sales: $7.00 per issue prepaid includes surface postage. Bulk rates on request. Authorization to photocopy material for internal or personal use, or use in educational or research work, to users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $4.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075/85/$4.00. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
