Domestic institutional subscription (51 issues): $250. Foreign postage extra; Mexico, Caribbean (surface mail) $55; other countries (air assist delivery) $90. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Printed in the U.S.A.
Illustration of the human β T cell receptor locus on chromosome 7 (left) and chromosome 9 (right). The locus, comprising multiple genes, has been sequenced, and each coding region is represented by a colored stripe. Trypsinogen genes (pink) are interspersed between T cell receptor variable gene segments (yellow, functional genes; white, pseudogenes) and the two constant gene clusters (green and orange). See page 1755. [Illustration: Designed by R. Hohmberg and L. Hood]
