* SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 1996 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription ($1 issues): $102 ($55 allocated to subscription); Domestic institutional subscription (51 issues): $250. Foreign postage extra: Mexico, Caribbean (surface mail) $55; other countries (air assist delivery) $90. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Printed in the U.S.A.
Methane clathrate hydrate, an icy compound capable of sustaining its own combustion, displays intriguing formation kinetics as well as unusual plastic flow properties. Although naturally occurring methane hydrate may harbor the largest untapped reservoir of natural gas on Earth, the material properties of this ephemeral compound are not yet well understood. See page 1843. [Photo: John Pinkston and Laura Stern]
