Science (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 1996 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $102 ($55 allocated to subscription). Domestic institutional subscription (51 issues): $250. Foreign postage extra: Mexico, Caribbean (surface mail) $55; other countries (air assist delivery) $90. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Printed in the U.S.A.
Talented undergraduates in Japan are being pulled in different directions. The government and the universities are urging them to pursue advanced scientific degrees as part of a larger effort to stimulate economic growth, while companies traditionally prefer to train them on the job. The cover is drawn in a style known as manga, a form of illustration popularized in serial cartoons and comic books in Japan. A more traditional depiction of the same idea appears on page 43 to open our special report on Science in Japan. [Illustration: Tomoko Saito]
