COVER
A male lark bunting in the Pawnee National Grassland, Colorado. The plumage quality of the males determines their reproductive success, but different aspects of the black and white markings are preferred by females in different years. This variability alters the long-term sexual selection dynamics and may favor the evolution of multiple sexual ornaments. See page 459.

BREVIA
COMPUTER SCIENCE
100% Accuracy In Automatic Face Recognition
R. Jenkins and A. M. Burton
The simple process of image averaging can boost the performance of a commercial face recognition system to 100% accuracy.

REPORTS
PHYSICS
Probing the Carrier Capture Rate of a Single Quantum Level
M. Berthe et al.
Scanning tunneling microscopy reveals how electrons tunnel through a single dangling silicon bond and shows that local subsurface doped holes greatly affect the dynamics.

CHEMISTRY
Spin Conservation Accounts for Aluminum Cluster Anion Reactivity Pattern with O₂
R. Burgert et al.
Small metal clusters with an even number of atoms react rapidly with oxygen because electron spin is conserved, whereas odd clusters are more stable because it is not.

CHEMISTRY
NMR Imaging of Catalytic Hydrogenation in Microreactors with the Use of para-Hydrogen
L.-S. Bouchard et al.
The flow of para-hydrogen through industrial catalytic reactors allows magnetic resonance imaging of the gas flow and of the hydrogenation reactions, facilitating optimization.

APPLIED PHYSICS
GaN Photonic-Crystal Surface-Emitting Laser at Blue-Violet Wavelengths
H. Matsubara et al.
Surface-emitting lasers fabricated with photonic crystal structures can now emit at technologically relevant blue-violet wavelengths.

GEOCHEMISTRY
Comparison of Comet 81P/Wild 2 Dust with Interplanetary Dust from Comets
H. A. Ishii et al.
The silicate minerals found in interplanetary dust particles are not seen in Comet 81P/Wild 2, implying that the comet is devoid of material from the outer solar system.
