RESEARCH ARTICLE
GEOCHEMISTRY
Synchronizing Rock Clocks of Earth History
K. F. Kuiper et al.
Tying an argon-argon dating standard to a section dated with Earth’s orbital variations yields older ages for the standard and for other events, including the K-T boundary.

REPORTS
MATERIALS SCIENCE
Sign Change of Poisson’s Ratio for Carbon Nanotube Sheets
L. J. Hall et al.
When stretched, a sheet made of carbon nanotubes contracts or expands in the opposite direction, depending on how many multiwalled tubes form zig-zag networks.
REPORTS CONTINUED...

MATERIALS SCIENCE
Stretchable and Foldable Silicon Integrated Circuits
D.-H. Kim et al.
High-performance, bendable, and stretchable electronic devices are fabricated on an elastic plastic substrate by placing the critical electronic components in the neutral bending plane.

APPLIED PHYSICS
Near-Field Plates: Subdiffraction Focusing with Patterned Surfaces
A. Gribic, L. Jiang, R. Merlin
A grating near the focal plane can focus microwave radiation to a spot size well below the diffraction limit.

PLANETARY SCIENCE
Ancient Asteroids Enriched in Refractory Inclusions
J. M. Sunshine et al.
Spectral data imply that some asteroids contain higher concentrations of early solar system grains and materials than are found in any sampled meteorite. >> Perspective p. 457

CLIMATE CHANGE
Human-Induced Arctic Moistening
S.-K. Min, X. Zhang, F. Zwiers
Comparison of 22 climate models to observations show that human activity has increased precipitation in the Arctic over the past 50 years, altering its timing and distribution.

BIOCHEMISTRY
Efficient Inhibition of the Alzheimer’s Disease β-Secretase by Membrane Targeting
L. Rajendran et al.
Tethering an inhibitor to a membrane anchor renders it effective against a membrane enzyme that creates the amyloid fragments deposited in Alzheimer’s disease, even in vivo.

MEDICINE
Plastin 3 is a Protective Modifier of Autosomal Recessive Spinal Muscular Atrophy
G. E. Oprea et al.
Expression of a protein that promotes axonal growth can compensate for the gene deletion in spinal muscular atrophy, indicating that axonal growth deficiencies cause the disease.

CELL BIOLOGY
Role of C. elegans TAT-1 Protein in Maintaining Plasma Membrane Phosphatidylserine Asymmetry
M. Darland-Ransom et al.
A phospholipid translocase enzyme keeps a critical membrane lipid localized to the inner leaflet of the cell membrane so it does not trigger engulfment by immune cells. >> Perspective p. 458; Report p. 531

VIROLOGY
Vaccinia Virus Uses Macropinocytosis and Apoptotic Mimicry to Enter Host Cells
J. Mercer and A. Helenius
To infect host cells, vaccinia virus exposes phosphatidylserine on its surfaces, which signals host cells to recognize the virus as cellular debris and take it up for clearance. >> Perspective p. 458; Report p. 528

CELL BIOLOGY
Encoding Gender and Individual Information in the Mouse Vomeronasal Organ
J. He, L. Ma, S. Kim, J. Nakai, C. R. Yu
Mice can recognize the pheromones from individual mice through unique patterns of receptor activation in the vomeronasal organ.

GENETICS
Rare Structural Variants Disrupt Multiple Genes in Neurodevelopmental Pathways in Schizophrenia
T. Walsh et al.
Patients with schizophrenia carry multiple small deletions and duplications in their DNA that are associated nonrandomly with neuronal signaling and brain development pathways.

EVOLUTION
Metabolic Diversification—Independent Assembly of Operon-Like Gene Clusters in Different Plants
B. Field and A. E. Osbourn
Through strong selection, similar clusters of genes for triterpene biosynthesis have arisen independently through gene duplication and neofunctionalization in several plant lines.

GENETICS
Mechanism of Self-Sterility in a Hermaphroditic Chordate
Y. Harada et al.
The sea squirt prevents self-fertilization with two genetic loci, each of which encodes a tightly linked sperm-egg receptor-ligand pair, a system similar to that of flowering plants.

Ancient Asteroids Enriched in Refractory Inclusions
J. M. Sunshine et al.
Spectral data imply that some asteroids contain higher concentrations of early solar system grains and materials than are found in any sampled meteorite. >> Perspective p. 457
