**CONTENTS**

**NEWS OF THE WEEK**
- Energy Department Pulls Plug on Overbudget Fusion Experiment
- Streamlined Clinical Trials, From a Home Computer
- Damaged University Mourns Its Dead—and Plans Fast Recovery

**SCIENCE'SCOPE**
- Fate of Plum Island Animal Lab Still Unclear
- Ancient DNA From Frozen Hair May Untangle Eskimo Roots

**NEWS FOCUS**
- Does Fermilab Have a Future? Whither the International Linear Collider?
- Freeze-Dried Findings Support a Tale of Two Ancient Climates
- Nothing Rotten About Hydrogen Sulfide’s Medical Promise

**LETTERS**
- Joshua Lederberg’s Interest in Ignorance
  M. H. Witte
- Women in Science: A Top-Down Approach
  D. J. Nelson and C. N. Brammer
- Biological Basis of the Third-Cousin Crush
  J. N. Lundström et al.

**BOOKS ET AL.**
- Scholarship in the Digital Age Information, Infrastructure, and the Internet
  C. L. Borgman, reviewed by K. L. Hahn
- Amazing Rare Things The Art of Natural History in the Age of Discovery
  Royal Collection Curators

**EDUCATION FORUM**
- Culture, Gender, and Math
  L. Guiso, F. Monte, P. Sapienza, L. Zingales

**PERSPECTIVES**
- Whither Geoengineering?
  A. Robock
  >> Report p. 1201
- A Blast from the Past
  A. C. Fabian
  >> Report p. 1195
- Immunity Benefits from a Little Suppression
  G. Kassiotis and A. O’Garra
  >> Report p. 1220
- Graphene-Based Materials
  D. Li and R. B. Kaner
- Is Mars Geodynamically Dead?
  M. Grott
  >> Research Article p. 1182
- Activating a Repressor
  S. Cohen, Z. Zhou, M. E. Greenberg
  >> Report p. 1224

**EDITORIAL**
- Education to Protect Humanity
  by David Hamburg
ECOLOGY
Ecosystem Feedbacks and Nitrogen Fixation in Boreal Forests
T. H. DeLuca et al.
As burned areas in boreal forests recover, cyanobacteria in moss carpets fix nitrogen as it is lost from dead leaves and litter, ensuring a constant nitrogen supply.

BIOCHEMISTRY
Structural Basis of Trans-Inhibition in a Molybdate/Tungstate ABC Transporter
S. Gerber, M. Comellas-Bigler, B. A. Goetz, K. P. Locher
A class of membrane transporters is subject to product inhibition: The imported substrate binds to a regulatory domain that sterically inhibits further adenosine triphosphate hydrolysis.

GENETICS
Paleo–Eskimo mtDNA Genome Reveals Matrilineal Discontinuity in Greenland
M. T. P. Gilbert et al.
Ancient human DNA sequences from Greenland suggest that the earliest inhabitants of the far north were from a lineage distinct from extant Native Americans and Eskimos.

PHYSICS
Probing Cold Dense Nuclear Matter
R. Subedi et al.
Electron-beam experiments reveal that some neutrons within $^{12}$C nuclei tend to form close, dynamical pairs with protons but that pairs of the same particle type are rare.

RESEARCH ARTICLES
PLANETARY SCIENCE
Mars North Polar Deposits: Stratigraphy, Age, and Geodynamical Response
R. J. Phillips et al.
Radar mapping shows that Mars’ thick north polar ice cap contains four dust-rich layers recording variation in the planet’s orbit and only slightly depresses the underlying crust.

MOLECULAR BIOLOGY
Widespread Translational Inhibition by Plant miRNAs and siRNAs
P. Brodersen et al.
Plant microRNAs and small interfering RNAs, thought to inhibit gene expression by cleavage of their RNA targets, also interfere with the translation of these RNAs into protein.

PSYCHOLOGY
Predicting Human Brain Activity Associated with the Meanings of Nouns
T. M. Mitchell et al.
A model trained to associate specific nouns with resultant images of brain activity can predict what activity pattern will occur when a participant is shown a picture of a new noun.
REPORTS

ASTRONOMY
The Cassiopeia A Supernova Was of Type Ib 1195
O. Krause et al.
A supernova seen 300 years ago is now seen again as infrared echoes scattered by interstellar dust, showing that it formed from the helium core of a red supergiant star.
>> Perspective p. 1167; Science Podcast

APPLIED PHYSICS
Interfacial Polygonal Nanopatterning of Stable Microbubbles 1198
E. Dressaire, R. Bee, D. C. Bell, A. Lips, H. A. Stone
Hexagonally packed surfactant molecules at the gas/liquid interface of micrometer-sized gas bubbles retard dispersion enough to stabilize them for more than a year.

CLIMATE CHANGE
The Sensitivity of Polar Ozone Depletion to Proposed Geoengineering Schemes 1201
S. Tîmes, R. Müller, R. Salawitch
Calculations imply that injection of sulfur into the atmosphere to counteract global warming would threaten the ozone layer, as occurred after the Mount Pinatubo eruption.
>> Perspective p. 1166

PLANETARY SCIENCE
Water Activity and the Challenge for Life on Early Mars 1204
N. J. Tosca, A. H. Knoll, S. M. McLennan
Calculations imply that the high salinity required to form widespread sulfates found on Mars reduces the effective concentration of water below the limits for life on Earth.

CELL BIOLOGY
A Cytosolic Iron Chaperone That Delivers Iron to Ferritin 1207
H. Shi, K. Z. Benze, T. L. Stemmler, C. C. Philpott
A cytosolic iron-binding protein, PCBP1, carries the reactive but essential element iron to ferritin, its major storage depot in the cell.

EVOLUTION
Massive Horizontal Gene Transfer in Bdelloid Rotifers 1210
E. A. Gladyshev, M. Meselson, I. R. Arkhipova
Bdelloid rotifers carry a large number of foreign genes—unusual for a metazoan—perhaps explaining how they have escaped extinction despite an asexual lifestyle.

EVOLUTION
Ancestral Monogamy Shows Kin Selection Is Key to the Evolution of Eusociality 1213
W. O. H. Hughes et al.
Monogamy prevailed in the ancestral lineages of bees and wasps, suggesting that high relatedness was critical to the evolution of their complex, cooperative social systems. >> Science Podcast

PSYCHOLOGY
Log or Linear? Distinct Intuitions of the Number Scale in Western and Amazonian Indigene Cultures 1217
S. Dehaene, V. Izard, E. Spelke, P. Pica
Adults from an Amazonian tribe view numbers as a logarithmic progression (e.g., 10 is halfway to 100), suggesting that our linear view of numbers is culturally learned.

IMMUNOLOGY
Coordination of Early Protective Immunity to Viral Infection by Regulatory T Cells 1220
J. M. Lund, L. Hsing, T. T. Pham, A. Y. Rudensky
In mice infected with herpes virus, a usually immunosuppressive T cell is necessary for rapid arrival of immune cells and elevated cytokine levels at the site of infection.
>> Perspective p. 1168

MEDICINE
MeCP2, a Key Contributor to Neurological Disease, Activates and Represses Transcription 1224
M. Chahrour et al.
A transcription factor implicated in autism and learning disorders is unexpectedly found to activate a large number of genes in the hypothalamus, not just a few.
>> Perspective p. 1172
SCIENCE SIGNALING
www.sciencesignaling.org
THE SIGNAL TRANSDUCTION KNOWLEDGE ENVIRONMENT

REVIEW: Pharmacological PKA Inhibition—All May Not Be What It Seems
A. J. Murray
Widely used inhibitors of cAMP-dependent protein kinase (PKA) have nonspecific side effects.

PERSPECTIVE: Steering in Quadruplet—The Complex Signaling Pathways Directing Chemotaxis
E. C. Rericha and C. A. Parent
Multiple pathways act in concert to direct a cell’s migration.

SCIENCE PODCAST
www.sciencemag.org/about/podcast.dtl
FREE WEEKLY SHOW
Download the 30 May Science Podcast to hear about kin selection and the evolution of eusociality, origins of the Cassiopeia A supernova remnant, Fermilab budget cuts, and more.
