**NEWS OF THE WEEK**
- Arsenic and Paddy Rice: A Neglected Cancer Risk?  
  184
- Top Ph.D. Feeder Schools Are Now Chinese  
  185
- 2008 Supplemental Helps Fermilab by Putting
  Jobs Before Research  
  186
- Defense, NSF Team Up on National Security Research  
  186

**SCIENCESCOPE**
- Iraq Embarks on Demolition of Saddam-Era Nuclear Labs  
  188
- Major European Cities Are Quietly Missing Antinoise Deadline  
  189

**NEWS FOCUS**
- Steering Harvard Toward Collaborative Science  
  190
- Bipolar Disorder: Poles Apart  
  193
- Modernizing the Modern Synthesis  
  196

**LETTERS**
- Biofuels: Effects on Land and Fire  
  K. L. Kline and V. H. Dale  
  Response J. Fargione et al.; T. D. Searchinger  
  199
- Biofuels: One of Many Claims to Resources  
  T. Wassenaar and S. Kay  
  202

**CORRECTIONS AND CLARIFICATIONS**
- Females Are Mosaics X Inactivation and Sex Differences in Disease B. R. Migeon, 
  reviewed by J. A. M. Graves  
  200
- Nudge Improving Decisions About Health, Wealth, and Happiness R. H. Thaler and C. R. Sunstein, 
  reviewed by E. J. Johnson  
  203

**BOOKS ET AL.**
- Nudge Improving Decisions About Health, Wealth, and Happiness R. H. Thaler and C. R. Sunstein, 
  reviewed by E. J. Johnson  
  206

**POLICY FORUM**
- Interactions with the Mass Media H. P. Peters et al.  
  204

**PERSPECTIVES**
- Celebrating Spuds S. Knapp  
  206
- Homo experimentalis Evolves J. A. List  
  207
- Insights into the Pathogenesis of Autism J. S. Sutcliffe  
  208
- Phase-Change Materials for Electronic Memories G. Atwood  
  210
- New Tricks with Old Bones R. Mackelprang and E. M. Rubin  
  211

**EDITORIAL**
- European Research, 10 Years On by Enric Banda

PHYSICS
Suppressing Spin Qubit Dephasing by Nuclear State Preparation
D. J. Reilly et al.
A series of voltage pulses can mitigate the detrimental influence of background spins in gallium arsenide, allowing the spin of quantum dots to remain coherent for microseconds.
10.1126/science.1159221

IMMUNOLOGY
Regulation of CD45 Alternative Splicing by Heterogeneous Ribonucleoprotein, HnRNPLL
S. Oberdoerffer et al.
A ribonucleoprotein directs the splicing of the transcript for CD45, a transmembrane tyrosine phosphatase that initiates signaling through antigen receptors.
10.1126/science.1157610

ECOLOGY
One-Third of Reef-Building Corals Face Elevated Extinction Risk from Climate Change and Local Impacts
K. E. Carpenter et al.
The viability of the world’s major coral reefs is endangered both by direct human disturbance and by disease and bleaching events brought on by climate change.
10.1126/science.1159196

PHYSICS
Quantum Gas of Deeply Bound Ground State Molecules
J. G. Danzl et al.
A coherent Raman pumping scheme cools cesium molecules to a state with minimal rotational energy, needed for producing cold molecular Bose-Einstein condensates.
10.1126/science.1159909
REPORTS CONTINUED...

APPLIED PHYSICS
Control of Exciton Fluxes in an Excitonic Integrated Circuit 229
A. A. High et al.
Coupled quantum-wells structures, patterned to create electron-hole circuits, can perform simple logic operations on the optical input signals.

PHYSICS
Optical Pumping and Vibrational Cooling of Molecules 232
M. Viteau et al.
A broadband laser pulse can remove residual vibrational energy from molecules via excitation and relaxation cycles, allowing them to be cooled to low temperatures.

GEOLOGY
A Positive Test of East Antarctica–Laurentia Juxtaposition Within the Rodinia Supercontinent 235
J. W. Goodge et al.
A glacial boulder in Antarctica, and other data, confirm that East Antarctica and Australia were linked to western North America in a supercontinent 1 billion years ago.

GEOPHYSICS
Anticrack Nucleation as Triggering Mechanism for Snow Slab Avalanches 240
J. Heierli, P. Gumbsch, M. Zaiser
The nature of microcracks in snow on a steep slope, not just their angle, helps determine whether the pile simply collapses under its own weight or shears off as an avalanche.

BIOCHEMISTRY
Micelles Protect Membrane Complexes from Solution to Vacuum 243
N. P. Barrera, N. Di Bartolo, P. J. Booth, C. V. Robinson
Gas-phase lipid micelles protect a large complex of membrane proteins, allowing its subunit composition and ligand binding to be assessed by mass spectrometry.

BIOCHEMISTRY
Structural Basis of Trans-Inhibition in a Molybdurate/Tungstate ABC Transporter 246
S. Gerber, M. Comellas-Bigler, B. A. Goetz, K. P. Locher
A class of membrane transporters is subject to product inhibition: The imported substrate binds to a regulatory domain that sterically inhibits further ATP hydrolysis.

BIOCHEMISTRY
The High-Affinity E. coli Methionine ABC Transporter: Structure and Allosteric Regulation 250
N. S. Kadaba, J. T. Kaiser, E. Johnson, A. Lee, D. C. Rees
The structure of the methionine transporter illustrates how increased levels of methionine stabilize an inactive state to inhibit further translocation.

BIOCHEMISTRY
Structural Basis for Specific Substrate Recognition by the Chloroplast Signal Recognition Particle Protein cpSRP43 253
K. F. Stengel et al.
A protein subunit of the signal recognition particle that directs chlorophyll binding proteins to the chloroplast replaces RNA and causes posttranslational function.

MICROBIOLOGY
Genetic Determinants of Self Identity and Social Recognition in Bacteria 256
K. A. Gibbs, M. L. Urbanowski, E. P. Greenberg
The ability of clones of a pathogenic bacterium to distinguish themselves from one another resides in a six-gene locus with interrelated recognition functions.

IMMUNOLOGY
Modulation of Gene Expression via Disruption of NF-κB Signaling by a Bacterial Small Molecule 259
V. V. Kravchenko et al.
A small molecule produced by common pathogenic bacterium inhibits the activity of a key immune transcription factor.

MEDICINE
Drug Target Identification Using Side-Effect Similarity 263
M. Campillos et al.
By finding drugs that share similar side effects, several new drug targets were predicted and experimentally confirmed, suggesting a route to identifying new therapeutic agents.
SCIENCE SIGNALING
www.sciencesignaling.org
THE SIGNAL TRANSDUCTION KNOWLEDGE ENVIRONMENT

REVIEW: Ethanol’s Molecular Targets
R. A. Harris, J. R. Trudell, S. J. Mihic
Ethanol affects the functions of specific proteins through its interaction with a select few amino acids in those proteins.

PODCAST
J. F. Foley and A. M. VanHook
Inhibition of NF-kB activation in macrophages results in a proinflammatory outcome.
