Wealthy nations now devote billions of dollars each year to helping low- and middle-income countries confront HIV/AIDS epidemics. Investment in biomedical research has also shot up. What has come of this flood of money? And will there be enough in the future to meet increasing demands? See the special section beginning on page 511.

ASTRONOMY
The Metamorphosis of Supernova SN 2008D/XRF 080109: A Link Between Supernovae and GRBs/Hypernovae
P. A. Mazalli et al.
The spectra of a recent supernova evolved from that of a more energetic event to that of a less energetic one, providing a link between previous observations. 10.1126/science.1158088

MEDICINE
Human CHN1 Mutations Hyperactivate α2-Chimaerin and Cause Duane’s Retraction Syndrome
N. Miyake et al.
A signaling protein that helps nerve fibers find their correct target muscles is required for innervation of the eye muscles and, if defective, causes an eye movement disorder. 10.1126/science.1156121

ATMOSPHERIC SCIENCE
Tail Reconnection Triggering Substorm Onset
V. Angelopoulos et al.
Satellite and ground-based data show that reconnection of magnetic field lines in Earth’s magnetotail precedes dramatic aurora displays and is the source of magnetic substorms. 10.1126/science.1160495

PERSPECTIVE: The Elusive Onset of Geomagnetic Substorms
A. A. Petrukovich
10.1126/science.1162426

TECHNICAL COMMENT ABSTRACTS
GEOPHYSICS
Comment on “Major Australian-Antarctic Plate Reorganization at Hawaiian-Emperor Bend Time” A. A. Tikku and N. G. Direen
full text at www.sciencemag.org/cgi/content/full/321/5888/490c
Response to Comment on “Major Australian-Antarctic Plate Reorganization at Hawaiian-Emperor Bend Time” J. M. Whittaker et al.

REVIEW
APPLIED PHYSICS
Studying Atomic Structures by Aberration-Corrected Transmission Electron Microscopy
K. W. Urban

BREVIA
GEOCHEMISTRY
A Quantitative Link Between Recycling and Osmium Isotopes
A. V. Sobolev et al.
Osmium isotope data and metal concentrations from Icelandic lavas show that the underlying mantle contains some recycled oceanic crust that is 1 to 2 billion years old.

RESEARCH ARTICLE
MOLECULAR BIOLOGY
An Argonaute Transports siRNAs from the Cytoplasm to the Nucleus
S. Guang et al.
A protein similar to one that binds small cytoplasmic RNAs transports small RNAs into the nucleus, where they participate in RNA-based nuclear silencing processes. >> Perspective p. 496
**PLANT SCIENCE**

BSKs Mediate Signal Transduction from the Receptor Kinase BR1 in *Arabidopsis*

*W. Tang et al.*

When a plant membrane receptor is activated by a steroid hormone, two kinases are phosphorylated that ultimately regulate gene expression and development.

**ECOLOGY**

One-Third of Reef-Building Corals Face Elevated Extinction Risk from Climate Change and Local Impacts

*K. E. Carpenter et al.*

The viability of the world’s major coral reefs is endangered both by direct human disturbance and by disease and bleaching events brought on by climate change.

**CELL BIOLOGY**

Eco1-Dependent Cohesin Acetylation During Establishment of Sister Chromatid Cohesion

*T. Rolef Ben-Shahar et al.*

A molecular determinant for the establishment of sister chromatid cohesion.

**BIOCHEMISTRY**

ERdj5 Is Required as a Disulfide Reductase for Degradation of Misfolded Proteins in the ER

*R. Ushioda et al.*

A disulfide reductase found in the endoplasmic reticulum cleaves the disulfide bonds of misfolded proteins so they can be transported into the cytoplasm for degradation.

**BIOCHEMISTRY**

The Crystal Structure of [Fe]-Hydrogenase Reveals the Geometry of the Active Site

*S. Shima et al.*

Three hydrogenases that evolved independently exhibit similar features in their active sites, yielding clues for designing catalysts in hydrogen fuel cells.

**MOLECULAR BIOLOGY**

DNA Events Manipulating the Metazoan Mitochondrial Genome with Targeted Restriction Enzymes

*H. Xu, S. Z. DeLuca, P. H. O’Farrell*

Flies with mutant mitochondria—generated by introduction of restriction enzymes—show many of the same phenotypes as humans with mitochondrial mutations.
Prized looks.
