DEVELOPMENTAL BIOLOGY
Induced Pluripotent Stem Cells Generated from Patients with ALS Can Be Differentiated into Motor Neurons
J. T. Dimos et al.
Skin cells from elderly individuals with a mutation that causes amyotrophic lateral sclerosis (ALS) were used to derive stem cells that could then be differentiated.
10.1126/science.1158799

PALEOCLIMATE
Regional Synthesis of Mediterranean Atmospheric Circulation During the Last Glacial Maximum
J. Kuhlemann et al.
A three-dimensional reconstruction of atmospheric temperatures in the Mediterranean during glacial times is analogous to one of winter during the Little Ice Age.
10.1126/science.1157638

TECHNICAL COMMENT ABSTRACTS
NEUROSCIENCE
Comment on "Magnetic Resonance Spectroscopy Identifies Neural Progenitor Cells in the Live Human Brain"
J. C. Hoch, M. W. Maciejewski, M. R. Gryk
full text at www.sciencemag.org/cgi/content/full/321/5889/640b
Comment on "Magnetic Resonance Spectroscopy Identifies Neural Progenitor Cells in the Live Human Brain"
S. D. Friedman

BREVIA
BIOCHEMISTRY
Evidence of Global Chlorophyll d
Y. Kashiyama et al.
A survey of chlorophyll d, used by a cyanobacterium for harvesting infrared light, implies that this microbe inhabits a much wider range than previously thought.

RESEARCH ARTICLES
BIOCHEMISTRY
Crystal Structure of the Termination Module of a Nonribosomal Peptide Synthetase
A. Tanovic, S. A. Samel, L.-O. Essen, M. A. Marahiel
A large enzyme complex assembles peptide natural products without ribosomal participation by successive catalytic steps at the end of a flexible, substrate-loaded arm.

CELL BIOLOGY
Essential Cytoplasmic Translocation of a Cytokine Receptor–Assembled Signaling Complex
A. Matsuzawa et al.
Degradation of one member of a protein complex that forms when a cytokine receptor is activated causes the complex to move to the cytoplasm, triggering the downstream pathway.
>> Perspective p. 648

REPORTS
ASTRONOMY
Protostar Formation in the Early Universe
N. Yoshida, K. Omukai, L. Hernquist
A model traces the coalescence of small variations in gas density after the Big Bang into protostars, showing that the first stars would be large enough to make heavy elements.
>> Perspective p. 647
REPORTS CONTINUED...

CHEMISTRY
High Rates of Oxygen Reduction over a Vapor Phase–Polymerized PEDOT Electrode 671
B. Winther-Jensen et al.
A conducting polymer grown on a high–surface area membrane exhibits rates of oxygen reduction for electrochemical applications comparable with those of platinum electrodes.

>> News story p. 620

CHEMISTRY
Structures of Neutral Au_{17}, Au_{19}, and Au_{20} Clusters in the Gas Phase 674
P. Gruene et al.
Vibrational spectroscopy and theory reveal the elusive structures of small, stable gold clusters with catalytic ability: Au_{17} has a two-dimensional structure and Au_{20} is pyramidal.

MATERIALS SCIENCE
Colossal Ionic Conductivity at Interfaces of Epitaxial ZrO_{2}Y_{2}O_{3}/SrTiO_{3} Heterostructures 676
J. Garcia-Barriocanal et al.
Thin layers of zirconium oxide containing some yttrium in a strontium titanate fuel cell increase its ionic conductivity, allowing it to operate at much lower temperatures.

CLIMATE CHANGE
High-Resolution Greenland Ice Core Data Show Abrupt Climate Change Happens in Few Years 680
J. P. Steffensen et al.
Greenland’s climate flipped to a different state within 1 to 3 years more than once during the last deglaciation.

>> Perspective p. 650

MICROBIOLOGY
The Global Stoichiometry of Litter Nitrogen Mineralization 684
S. Manzoni, R. B. Jackson, J. A. Trofymow, A. Porporato
A global data set shows that the decomposition rate of plant litter is primarily controlled by its nitrogen content, which affects the rate of microbial activity.

IMMUNOLOGY
Regulation of CD45 Alternative Splicing by Heterogeneous Ribonucleoprotein, hnRNPLL 686
S. Oberdoerffer et al.
A ribonucleoprotein directs the splicing of the transcript for CD45, a transmembrane tyrosine phosphatase that initiates signaling through antigen receptors.

IMMUNOLOGY
Pyogenic Bacterial Infections in Humans with MyD88 Deficiency 691
H. von Bernuth et al.
Although a key immune gene is necessary for mice to fight off a broad range of pathogens, in humans it is only required to protect against a few specialized bacteria.

IMMUNOLOGY
Censoring of Autoreactive B Cell Development by the Pre-B Cell Receptor 696
R. A. Keenan et al.
A protein that helps newly rearranged antibody chains arrive at the cell surface of immature immune cells is found to help delete cells with potential autoreactivity.

DEVELOPMENTAL BIOLOGY
Generation of Pluripotent Stem Cells from Adult Mouse Liver and Stomach Cells 699
T. Aoi et al.
Induced pluripotent stem cells are generated by direct reprogramming of adult liver and stomach cells.

NEUROSCIENCE
The Cell and Molecular Basis of Mechanical, Cold, and Inflammatory Pain 702
B. Abrahamsen et al.
Pain neurons containing a particular sodium channel respond only to cold, mechanical, and inflammatory pain, not to all painful stimuli as previously assumed.

>> Science Podcast

Published by AAAS
Anesthetics increase postoperative pain.
