**CONTENTS**

**DEPARTMENTS**
- 11 Science Online
- 12 This Week in Science
- 16 Editors’ Choice
- 20 Contact Science
- 23 Random Samples
- 25 Newsmakers
- 118 New Products
- 119 Science Careers

**EDITORIAL**
- 15 A Populist Movement for Health? by Jim Wells and Mary Woolley

**NEWS OF THE WEEK**
- New Malaria Plan Called Ambitious by Some, Unrealistic by Others
- NAS Study May Fail to Settle Anthrax Case
- Europeans Think Big for Particle Detectors

**SCIENSCESCOPE**
- Adding a Turn to the Roadmap, Zerhouni to Step Down
- U.S. Oceans Chief Leaves a Mixed Legacy in His 7-Year Wake
- Minerals Suggest Water Once Flowed on Mars—But Where?
- Quantum Network Set to Send Uncrackable Secrets
- Winds, Not Just Global Warming, Eating Away at the Ice Sheets
- Biochemist Robert Tjian Named President of Hughes Institute
- An International Plan to Hatch Scientist-Entrepreneurs

**NEWS FOCUS**
- The Peanut Butter Debate
  - Patents: A Recipe for Problems?
  - >> Science Podcast
- Culture Wars Over How to Find an Ancient Niche for Life on Mars
- Edward Buckler: Romping Through Maize Diversity

**LETTERS**
- Keeping an Eye on the Prize R. A. Sedjo
- Protecting Aggregate Genomic Data E. A. Zerhouni and E. G. Nabel
- Closing A Loophole in the FDA Amendments Act E. H. Turner, N. J. Moaleji, B. L. Arnold
- Response D. A. Zarin and T. Tse
- Big Payoffs Possible for Small-Molecule Screening J. H. Toney

**CORRECTIONS AND CLARIFICATIONS**
- Dissent over Descent: Intelligent Design’s Challenge to Darwinism S. Fuller, reviewed by M. Ruse
- Physics for Future Presidents: The Science Behind the Headlines R. A. Muller, reviewed by K. R. Foster

**POLICY FORUM**
- Sustainable Biofuels Redux G. P. Robertson et al.

**PERSPECTIVES**
- The Shining Make-Up of Our Star M. Asplund
- Bugs’ Bugs M. R. Berenbaum and T. Eisner
- >> Brevia p. 63
- From Ocean to Stratosphere R. Deckert and M. Dameris
- A Light Touch Catalyzes Asymmetric Carbon-Carbon Bond Formation P. Renaud and P. Leong >> Report p. 77

---

**COVER**
Ordovician sedimentary rocks at Presqu’île de Crozon, Brittany, France. These rocks show high-frequency cycles of less than 500,000 years between bay and open marine conditions. This and similar records allow reconstruction of global sea level from 550 to 250 million years ago. The pink boulder at the bottom is about 15 centimeters across. See page 64.

ECOLOGY
Natal Homing and Connectivity in Atlantic Bluefin Tuna Populations
J. R. Rooker et al.
Isotopes in the ear bones of tuna reveal that two populations—from the Gulf of Mexico and the Mediterranean—mingle in the Atlantic as adolescents but return home to breed. >> Science Podcast
10.1126/science.1161473

CHEMISTRY
Molecular Confinement Accelerates Deformation of Entangled Polymers During Squeeze Flow
H. D. Rowland, W. P. King, J. B. Pethica, G. L. W. Cross
When polymers are squeezed at nanometer scales, the longest chains unexpectedly flow more easily, even though in theory they should be the most entangled.
10.1126/science.1157945

CELL BIOLOGY
Ubiquitin-Like Protein Involved in the Proteasome Pathway of Mycobacterium tuberculosis
A prokaryotic version of ubiquitin, a eukaryotic tag for protein degradation, is linked to lysines in prokaryotic proteins destined for destruction, a process called pupylation.
10.1126/science.1163885

ASTROPHYSICS
A Large Excess in Apparent Solar Oblateness Due to Surface Magnetism
M. D. Fivian, H. S. Hudson, R. P. Lin, H. J. Zahid
Satellite measurements indicate that the sun is more oblate than previous measurements suggested, a shape resulting from the combined effects of rotation and magnetism.
10.1126/science.1160863

BIOCHEMISTRY
The 2.6 Angstrom Crystal Structure of a Human A2a Adenosine Receptor Bound to an Antagonist
V.-P. Jaakola et al.
The ligand binding pocket of the caffeine-binding human adenosine receptor has a different position and orientation than that of other G protein–linked receptors.
10.1126/science.1164772

REVIEW
PSYCHOLOGY
The Origin and Evolution of Religious Prosociality
A. Norenzayan and A. F. Shariff
58

BREVIA
ECOLOGY
Bacterial Protection of Beetle-Fungus Mutualism
J. J. Scott et al.
The southern pine beetle uses a polyene peroxide antifungal agent secreted by a bacterium to protect its fungal food source from attack by another fungal species. >> Perspective p. 52
63

RESEARCH ARTICLE
GEOLOGY
A Chronology of Paleozoic Sea-Level Changes
B. U. Haq and S. R. Schutter
The marine sedimentary rock record shows that sea level rose from the Early Cambrian to the Ordovician and then fluctuated through the Permian, partly in response to glaciations.
64

PHYSICS
Ultrafast X-ray Thomson Scattering of Shock-Compressed Matter
A. L. Kritcher et al.
A transient x-ray source reveals rapid structural changes in LiH as a high-powered laser produces extreme compression and heating, inducing an insulator-to-metal transition.
69

APPLIED PHYSICS
Time Reversal and Negative Refraction
J. B. Pendry
Optically active materials with nonlinear optical properties are predicted to mimic negatively refractive materials but without losses associated with true negative refraction.
71

CHEMISTRY
Surface-Modified Carbon Nanotubes Catalyze Oxidative Dehydrogenation of n-Butane
J. Zhang, X. Liu, R. Blume, A. Zhang, R. Schlögl, D. S. Su
Carbon nanotubes decorated with phosphate groups can catalyze the partial oxidation of alkanes, a process that has normally required complex metal oxides.
73
REPORTS CONTINUED...

CHEMISTRY
Merging Photoredox Catalysis with Organocatalysis: The Direct Asymmetric Alkylation of Aldehydes
D. A. Nicewicz and D. W. C. MacMillan
When irradiated by light, a ruthenium-organic catalyst creates intermediates with unpaired electrons that undergo otherwise intractable asymmetric reactions. >> Perspective p. 55

CHEMISTRY
Temperature-Induced Hydrophobic-Hydrophilic Transition Observed by Water Adsorption
H.-J. Wang, X.-K. Xi, A. Kleinhammes, Y. Wu
The insides of single-walled carbon nanotubes repel water at 22°C but absorb it at 8°C, showing that temperature finely controls the dynamics of confined water nanodroplets.

CLIMATE CHANGE
Atmospheric CO₂ and Climate on Millennial Time Scales During the Last Glacial Period
J. Ahn and E. J. Brook
A detailed gas record from the Byrd ice core from 90,000 to 20,000 years ago shows that warming episodes tracked high CO₂ levels in Antarctica but lagged by several thousands of years in Greenland.

EVOLUTION
Rates of Molecular Evolution Are Linked to Life History in Flowering Plants
S. A. Smith and M. J. Donoghue
A phylogenetic analysis shows that long-lived trees and shrubs have lower rates of molecular evolution than short-lived herbaceous plants.

DEVELOPMENTAL BIOLOGY
Chemokine Signaling Controls Endodermal Migration During Zebrafish Gastrulation
S. Nair and T. F. Schilling
During zebrafish gastrulation, chemokines are required for integrin-dependent adhesion of endodermal cells to mesoderm, a role distinct from their action as chemoattractants.

STRUCTURAL BIOLOGY
Molecular Architecture of the "Stressosome," a Signal Integration and Transduction Hub
J. Marles-Wright et al.
The stressosome, a huge multiprotein complex, has a virus capsid–like core and variable extensions that detect and integrate signals to activate the stress response.

NEUROSCIENCE
Internally Generated Reactivation of Single Neurons in Human Hippocampus During Free Recall
H. Gelbard-Sagiv et al.
The firing patterns of brain neurons recorded from people watching a video episode were the same as those recorded during later recall of the same show.

PLANT SCIENCE
A Physical Map of the 1-Gigabase Bread Wheat Chromosome 3B
E. Paux et al.
A physical map of the largest chromosome of wheat provides the first step toward sequencing the huge, 17-billion base pair genome of this critical food crop.

CELL BIOLOGY
High-Quality Binary Protein Interaction Map of the Yeast Interactome Network
H. Yu et al.
Comparison of existing methods for mapping protein-protein interactions in yeast cells shows that the high-throughput approaches are complementary to one another. >> Perspective p. 56

PSYCHOLOGY
Lacking Control Increases Illusory Pattern Perception
J. A. Whitson and A. D. Galinsky
When subjects receive false feedback in lab tests and so feel a loss of control, they are more apt to perceive patterns in random visual static and imagine conspiracies.

>> Science Podcast
Purinergic receptor antagonists inhibit inflammation.

**SCIENCE SIGNALING**

**www.sciencesignaling.org**

**THE SIGNAL TRANSDUCTION KNOWLEDGE ENVIRONMENT**

**RESEARCH ARTICLE:** Purinergic Control of T Cell Activation by ATP Released Through Pannexin-1 Hemichannels

Pannexin hemichannel-mediated release of ATP provides an autocrine, costimulatory signal for T cell activation.

**RESEARCH ARTICLE:** Kinome siRNA Screen Identifies Regulators of Ciliogenesis and Hedgehog Signal Transduction

M. Evangelista, T. Y. Lim, J. Lee, L. Parker, A. Ashique, A. S. Peterson, W. Ye, D. P. Davis, F. J. de Sauvage

Cdc2l1 is a component of the Hh signaling pathway and opposes the activity of the negative regulator Sufu.

**PERSPECTIVE:** A Wnt-fall for Gene Regulation—Repression

N. P. Hovrter and M. L. Waterman

Recognition of a nonclassical Wnt-response element by the transcription factor TCF results in β-catenin acting as a transcriptional repressor of certain Wnt target genes.

**PRESENTATION:** Somatic Cell Genetics for the Study of NF-κB Signaling in Innate Immunity

R. Krumbach, S. Bloor, G. Ryzhakov, F. Randow

A forward genetic screen in immortalized cells identifies NF-κB signaling components required to transduce signals from Toll-like receptors.
