SCIENCE VOL 322 7 NOVEMBER 2008 979

DEPARTMENT HEAD and ASSOCIATE PROFESSOR/PROFESSOR
Department of Pharmacy Care Systems
Harrison School of Pharmacy, Auburn University

This is a tenure-track position at the Associate Professor/Professor level. Candidate must have a terminal degree in his/her field and sufficient accomplishments in research, teaching, and service to meet the tenure eligibility requirements of Auburn University. Salary and rank will be competitive and commensurate with education and experience. A professional degree in pharmacy is preferred; however, candidates with a background in public health, health economics, epidemiology, or health care administration and management are encouraged to apply. As Department Head, the successful candidate must combine excellent interpersonal and management skills with a dynamic vision for the future of pharmacy. The Department Head’s responsibilities include: daily departmental operations, budgeting, ensuring quality in the Department’s instructional programs, faculty development in all areas of scholarship, participation in the executive administrative functions of the School, contributing to the development of School policies, and participation in the Department’s graduate and research programs. The candidate selected for this position must be able to meet eligibility requirements to work in the United States at the time appointment is scheduled to begin and continue working legally for the proposed term on an employment; excellent communication skills required. Applicants must provide their curriculum vitae, a letter addressing their interest and qualifications, and three letters of reference. Review of applications began May 15, 2008, and will continue until the position is filled. Applications and nominations should be submitted electronically via e-mail: hollite@auburn.edu to the Department Head Search Committee, Department of Pharmacy Care Systems, Harrison School of Pharmacy, 207 Dunstan Hall, Auburn University, AL 36849-5501. For further information applicants may contact Dr. William Villawea, Search Committee Chair, telephone: 334-844-5152 or via e-mail: villawe@auburn.edu.

Auburn University is an Equal Opportunity/Affirmative Action Employer. Women and minorities are encouraged to apply.

ASSISTANT/ASSOCIATE PROFESSOR
Toxicology
St. John’s University

Working for a better world.

St. John’s University, one of the nation’s largest Catholic universities, currently has a tenure-track faculty position available in our Department of Pharmaceutical Sciences at our Queens campus.

St. John’s has an active Toxicology Program offering undergraduate and graduate degrees in the field. The Department has 34 faculty members with varied research interests in toxicology, pharmacology, medicinal chemistry, and industrial pharmacy. Modern instrumentation and Association for Assessment and Accreditation of Laboratory Animal Care-accredited facilities are available.

You will establish an active research program that will attract external funding, mentor students, and teach graduate and undergraduate courses in toxicology. To qualify, you must have an earned Ph.D. in toxicology and postdoctoral experience.

We provide rank and salary commensurate with qualifications, excellent benefits, talented professional colleagues, and a culturally diverse student population. Interested professionals should send letter of application, curriculum vitae, research plan and statement of teaching philosophy, and three letters of reference to Dr. Louis D. Trombetta, Professor and Chair, Division of Cellular and Molecular Pathogenesis, Department of Pathology, Virginia Commonwealth University School of Medicine, Richmond, VA 23298-0297; e-mail: asirica@vcu.edu. Virginia Commonwealth University is an Equal Opportunity/Affirmative Action Employer. Women and minority candidates and persons with disabilities are encouraged to apply.

RESEARCH POSITIONS IN BASIC and CLINICAL SCIENCES

The Department of Surgery at the Beth Israel Deaconess Medical Center invites applications for Research (Postdoctoral) Fellows and Research Associates or Instructors to participate in basic, translational, and clinical research in a variety of areas: vascular and cardiovascular biology, transplantation biology and immunobiology, epithelial and cancer biology, neurobiology, diabetes, muscle wasting, sepsis and inflammation, bionutrition and herbal medicine. Applicants must have a Ph.D. and/or M.D. degree and significant research training and experience. Successful candidates will be proposed for an academic appointment at Harvard Medical School.

Beth Israel Deaconess Medical Center is a leading, internationally recognized academic medical center affiliated with Harvard Medical School, and ranks fourth in the United States among independent research hospitals in sponsored research funding. Please send letters of application accompanied by curriculum vitae and names of three references to: Susan J. Hagen, Ph.D., Associate Director for Research, Department of Surgery, Beth Israel Deaconess Medical Center, E/DA-805, 330 Brookline Avenue, Boston, MA 02215 or to e-mail: wdasgupta@bidmc.harvard.edu.

Beth Israel Deaconess Medical Center is an Equal Opportunity Employer that values the strength that diversity brings to the workplace.

RESEARCH ASSOCIATE POSITION, CANCER POPULATION GENETICS and GENOMICS, Memorial Sloan-Kettering Cancer Center.

Starting February 1, 2009. Focus on inherited susceptibility to cancers of the breast, ovary, colon, prostate, and lymphoma. Methodologies include whole genome association studies, Proc. Natl. Acad. Sci. 105:5430-5 2008; and candidate gene association studies, Science 297:2013, 2002; Cancer Res. 66:5104-10, 2006, and 64:8891-900, 2004. Applicant must have strong background in molecular genetics as well as population genetics and laboratory experience with high-throughput genotyping. Send applications and three letters of reference to: Kenneth Offit, M.D., M.P.H., Clinical Genetics Service, P.O. Box 192, Memorial Sloan-Kettering Cancer Center, 1275 York Avenue, New York, NY 10021. Fax: 212-434-5166; e-mail: ofitk@mskcc.org. Memorial Sloan-Kettering Cancer Center is an Equal Opportunity Employer with a strong commitment to enhancing the diversity of its faculty and staff. Women and applicants from diverse racial, ethnic and cultural backgrounds are encouraged to apply.

POSTDOCTORAL POSITION in HEPATOBLIARY CANCER RESEARCH

A Postdoctoral position is currently available to participate in long-term NIH-funded research on the molecular pathogenesis of hepatobiliary cancer. Suitable candidates should possess a Ph.D. in cell and molecular biology, molecular pathology, or in a related field of study. Expertise in cancer cell/cellular interactions, tumorigenesis as says, siRNA technology, and immunohistochemistry are highly desirable. Preference will be given to candidates who are also eligible for U.S. postdoctoral fellowships. Salary levels are attractive and commensurate with experience and qualifications. Applicants should send curriculum vitae and contact information for three references to: Dr. Alphonse E. Sirica, Professor and Division Chair, Division of Cellular and Molecular Pathogenesis, Department of Pathology, Virginia Commonwealth University is an Equal Opportunity/Affirmative Action Employer. Women and minority candidates and persons with disabilities are encouraged to apply.

Positions

THE NATIONAL INSTITUTES OF HEALTH

Director, Division of Cardiovascular Diseases
National Heart, Lung, and Blood Institute

The National Heart, Lung, and Blood Institute (NHLBI) at the National Institutes of Health (NIH) seeks a dynamic physician-scientist to provide strategic leadership for its Division of Cardiovascular Diseases (DCVD). The DCVD Director will have a profound impact upon the national investment in research, and the quality of service to the international research community. The Director of DCVD will have the opportunity to advocate for areas of critical importance to the national and global populace, to improve the health of the public, and to establish and implement programs congruent with NHLBI’s strategic plan. The Director will provide leadership for creating and nurturing internationally-renowned programs for an extramural program that integrates basic science and clinical research, including translational research, networks, and multicenter clinical trials. The Director guides a national research program on the causes and prevention and treatment of diseases and disorders such as atherothrombosis; coronary artery disease; myocardial infarction and ischemia; heart failure; arrhythmia; congenital heart disease; cardiovascular complications of diabetes and obesity; and hypertension. The DCVD also supports and oversees research in vascular medicine and biology and valvular, cerebral, renal, peripheral, and other cardiovascular disorders. The DCVD fosters biotechnological research in CVD-related genomics, proteomics, nanotechnology, imaging, device development, cell- and tissue-based therapeutics, and gene therapy. DCVD also supports training and career development programs in cardiovascular research at all educational levels, including programs for individuals from diverse populations. The Director will recruit scientists and scientific administrators, develop and nurture a strong workforce, and build depth in disease-specific branches. As a key member of the senior leadership team of the Institute, the incumbent will collaborate with closely aligned programs in the Institute. Applicants must possess an MD or equivalent degree as well as senior level research experience, interpersonal and communications expertise and ability. The successful candidate will be a respected, accomplished researcher with maturity, integrity, and outstanding communication skills. Salary is commensurate with experience and a full package of Civil Service benefits is available including retirement, health and life insurance, leave and savings plan (401K equivalent).

Application Process: Please submit your CV, bibliography, and two letters of recommendation to: Marianna Mertts, PhD, Office of Workforce Management, NHLBI, 6705 Rockledge Drive, Rockledge 1, Suite 6070, Bethesda, MD 20892. For further information, please call Dr. Mertts at (301) 496-1763 or email merttsm@nhlbi.nih.gov. Your application package should be received by December 1, 2008. All information provided by candidates will remain strictly confidential and will not be released outside the NHLBI search process without a signed release from candidates.

The National Heart, Lung, and Blood Institute provides leadership for a national program in diseases of the heart, blood vessels, lung, and blood; blood resources; and sleep disorders. With nationwide responsibility for improving the health and well-being of all Americans, the Department of Health and Human Services oversees the biomedical research programs of the NIH.

Developmental Neurobiology
Tenure-Track Investigator
Research Triangle Park, NC

The Laboratory of Neurobiology is recruiting a Tenure-Track Investigator to lead a high-quality independent research program on any fundamental aspect of developmental neurobiology with the potential for identifying and preventing the deleterious effects of environmental exposures on human cognitive development. Investigators in the NIEHS intramural program have no formal teaching duties and minimal administrative responsibilities and are funded internally without extramural grants. In exchange, they are expected to engage directly in the conduct of research with a small group of postdoctoral fellows and technicians and to collaborate with their colleagues to solve important scientific problems related to the Institute’s mission. Excellent start-up funds, salary, and benefits package will be provided to the selected applicant, who will also have access to state-of-the-art research core facilities at the NIEHS. Applicants should have a Ph.D., M.D., or equivalent doctoral degree with at least 3 years of postdoctoral research experience in developmental neurobiology and a strong publication record. Applicants using fluorescence imaging and genetic model organisms are particularly encouraged to apply, but the emphasis will be on identifying an outstanding scientist with an innovative research program. Interested persons should send their curriculum vitae with a statement of research interests, and arrange for three letters of recommendation to be submitted to the address below. Applications received by February 13, 2009, will be given first consideration. Applications received after that date will be considered only if the position has not been filled.

Mr. Will Williams (DIR-08-08)
P.O. Box 12233, Maldrop A2-06
111 South Alexander Drive, Room A255
Research Triangle Park, NC 27709
dir-apps@niehs.nih.gov

Tenure-Track Developmental Biologist
Research Triangle Park, NC

A position is available for a Developmental Biologist to establish an independent basic research program and form a research group in the Laboratory of Reproductive and Developmental Toxicology, Division of Intramural Research. Applications are invited from scientists with demonstrated ability for creative and productive research in cellular and molecular mechanisms of mammalian development. Of particular interest are investigators using rodent models to study cell interactions, epigenetics or other basic biomedical problems relating to the impact of the environment on development. The successful candidate will interact with investigators studying diverse problems in reproductive biology, developmental toxicology, hormone mechanisms, signal transduction, cell cycle regulation, cell growth and differentiation, apoptosis, gene regulation, mutagenesis and DNA repair, and cancer biology. Minimum qualifications are an M.D., Ph.D., D.V.M. or equivalent doctoral degree in the biomedical sciences, at least three years of postdoctoral experience, and publications in high quality journals. Salary will be commensurate with the experience and qualifications of the candidate. Federal benefits apply.

Information about the NIEHS may be found at www.niehs.nih.gov and the Laboratory of Reproductive and Developmental Toxicology at www.niehs.nih.gov/research/atrnihs/labs/lrdt/index.cfm. Applications from women and minorities are encouraged. Interested applicants should provide a curriculum vitae and bibliography, a 2-5 page statement of current research interests and future plans, and have three letters of recommendation sent directly to the address below by January 31, 2009. Material received after this date may be considered as needed.

Ms. Cindy Garrard (DIR-8-07)
P.O. Box 12233, Maldrop A2-06
111 Alexander Drive, Room A206
Research Triangle Park, NC 27709
e-mail: dir-apps@niehs.nih.gov

The NIH is dedicated to building a diverse community in its training and employment programs.

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES National Institute of Health

We are dedicated to building a diverse community in our training and employment programs.
Investigator Recruitment in Genetic Disease Research
National Human Genome Research Institute

The Genetic Disease Research Branch (GDRB) of the National Human Genome Research Institute (NHGRI) provides unparalleled opportunities for young investigators to develop world-class research programs in genetics and genomics. The Branch is pleased to announce that it is seeking to recruit a new tenure-track investigator to pursue innovative, independent research as part of this group of highly interactive and supportive investigators.

Current GDRB faculty members use a variety of approaches to study the regulation and function of genes involved in normal and abnormal development, focusing on diseases in both humans and model systems. We are seeking to recruit an individual whose research interests and approaches complement those already found within the Branch. Specifically, the ideal candidate will have an interest in developing a research program that integrates:

- Clinical or translational research
- Molecular and genomic approaches aimed at understanding the mechanisms of normal development and disease
- Basic genetic or genomic research

The Branch strongly supports interdisciplinary research, with NHGRI faculty providing mentoring and guidance to individuals interested in developing research programs involving basic, clinical, and translational approaches.

The successful candidate will be able to take advantage of interactions with a highly collegial group of scientists within NHGRI and on the NIH campus as a whole. In addition, the successful candidate will have access to NHGRI’s outstanding core laboratories, as well as the unparalleled resources of the NIH Clinical Center.

Candidates must have a Ph.D., M.D., or equivalent degree, as well as comprehensive, advanced training and a record of accomplishment in one of the targeted areas. This position includes a generous start-up allowance, an ongoing commitment of research space, laboratory resources, and positions for personnel and trainees.

Interested applicants should submit a curriculum vitae, a three-page description of proposed research, and three letters of recommendation through our online application system, at http://research.nhgri.nih.gov/apply.

Applications will be reviewed starting Monday, December 15, 2008 and will be accepted until the position is filled.

For more information on GDRB and NHGRI’s Intramural Program, please see http://genome.gov/DIR. Specific questions regarding the recruitment may be directed to Dr. William Pavan, the Search Chair, at wpavan@nhgri.nih.gov. Questions may also be directed to Dr. Leslie Biesecker, the GDRB Branch Chief, at leslieb@nhgri.nih.gov.

DHHS and NIH are Equal Opportunity Employers and encourage applications from women and minorities.

Investigator Recruitment in Cancer Genetics
National Human Genome Research Institute

The Cancer Genetics Branch (CGB) of the National Human Genome Research Institute (NHGRI) is seeking to recruit an outstanding tenure-track investigator to pursue innovative, independent research in cancer genetics. General areas of interest include, but are not limited to:

- Cancer Gene Discovery
- Comparative Cancer Genomics
- Genetic Epidemiology
- Molecular Profiling of Tumors
- Functional Genomics of Cancer
- Genome Instability in Cancer
- Markers for Early Detection
- Genetics of Tumor Progression

The Branch strongly supports interdisciplinary research, with NHGRI faculty providing mentoring and guidance to individuals interested in developing research programs involving basic, clinical, and translational approaches.

The successful candidate will be able to take advantage of interactions with a highly collegial group of scientists within NHGRI and on the NIH campus as a whole. In addition, they will have access to NHGRI’s outstanding core laboratories.

Candidates must have a Ph.D., M.D., or equivalent degree, as well as comprehensive, advanced training and a record of accomplishment in one of the targeted areas. This position includes generous start-up funds, an ongoing commitment of research space, laboratory resources, and positions for personnel and trainees.

Interested applicants should submit a curriculum vitae, a three-page description of their proposed research, and three letters of recommendation through our online application system, at http://research.nhgri.nih.gov/apply.

Applications will be reviewed starting November 21, 2008 and will be accepted until the position is filled.

For more information on CGB and NHGRI’s Intramural Program, please see http://genome.gov/DIR. Specific questions regarding the recruitment may be directed to Dr. Joan Bailey-Wilson (Search Chair) at jebw@nhgri.nih.gov or by fax at 410-550-7513. Questions may also be directed to Dr. Elaine Ostrander, Chief, Cancer Genetics Branch, at eostrand@mail.nih.gov or by fax at 301-480-0472.

DHHS and NIH are Equal Opportunity Employers and encourage applications from women and minorities.
Worcester Polytechnic Institute (WPI) invites applications for the position of Professor and Department Head in the Biomedical Engineering (BME) Department. The BME Department Head is responsible for the academic operation of the department, the development of the BME faculty, and maintaining the high quality of the department’s programs and facilities. The WPI BME Department (www.wpi.edu/+BME) has an ABET-accredited undergraduate program with approximately 180 students and a graduate program with approximately 50 students. The department currently has 6 tenured and tenure track faculty members with expertise in the areas of cellular and tissue engineering, biomechanics, biomaterials, bioinstrumentation, and biomedical imaging.

The BME Department is an integral part of the WPI Center for Regenerative Biosciences and Engineering (www.wpi.edu/Academics/Research/BEI/Centers/regenerative.html). The Center promotes interdisciplinary research across departmental boundaries in the following areas of expertise: adult and induced pluripotent stems cells, cell signaling pathways in pluripotency and differentiation, biomaterials, 3D scaffold design, tissue mechanics, cardiovascular differentiation, biofilms and infection control, BioMEMs, biosensors, and bioreactors. The BME Department and WPI Center for Regenerative Biosciences and Engineering are housed in the recently completed $70M WPI Life Sciences and Bioengineering Center at Gateway Park. The WPI BME Department also has extensive research relationships with the University of Massachusetts Medical School, which is ~2 miles from the WPI campus.

Over the next several years WPI will be building its strengths and capabilities in regenerative biosciences and engineering – as well as other related areas – and this year anticipates making multiple faculty hires across several disciplines to support this growth. WPI is seeking a distinguished senior scholar with an international reputation and an outstanding research record in BME. The successful candidate will play an important part in developing these multidisciplinary research areas and help the BME Department take a central role in this effort. Candidates should have a Ph.D. in BME or a closely related field, demonstrated leadership ability, and a commitment to excellence in both research and teaching.

Interested candidates should submit a pdf-formatted curriculum vitae, statement of accomplishments and priorities in research and teaching, and the names and contact information for at least five evaluators who have agreed to provide letters of reference. These materials and any inquiries should be directed to: Grant McGimpsey, Associate Provost for Research and Graduate Studies ad interim, Chair of the BME Department Head Search Committee, Worcester Polytechnic Institute, 100 Institute Rd., Worcester, MA 01609. Electronic submission of materials to: lifesciences@wpi.edu is strongly encouraged. Applications will be evaluated beginning January 15, 2009 and continue until the position is filled. For more information on this position and on other searches ongoing in our life sciences thrust area, please visit: http://www.wpi.edu/goto/lifesci/

WPI is an AA/EEO employer and has an open records law. We promote excellence through diversity and encourage all qualified individuals to apply.

CALL FOR CANDIDATES

ATTRACT RESEARCH GRANT

Opportunities for Outstanding Young Researchers in Luxembourg

What is it? A grant programme by the National Research Fund Luxembourg (FNR) which offers outstanding international researchers the opportunity to set up an independent research team within a public-sector research institution in Luxembourg.

How does it work? Candidates jointly submit a project proposal together with a Luxembourg public-sector research institution. The FNR chooses up to two candidates per call. Funding is allocated for five years and projects may obtain up to EUR 1,000,000 as a contribution from the FNR.

Who may apply? Candidates must be excellent and have gained a minimum of two and a maximum of eight years’ professional experience since successful completion of their doctoral studies.

Interested? A list of Luxembourg research institutions and priority research domains can be found on our web site www.fnr.lu.

Call Deadlines:
2 February 2009: Submission of summary proposals
15 April 2009: Submission of full proposals

For further information please contact:
Mr Frank Glod, Programme Manager
Phone: +352 26 19 25 33
Email: frank.glod@fnr.lu

Fonds National de la Recherche Luxembourg

Research Director for G.C. Rieber Climate Institute at Nansen Environmental and Remote Sensing Center Bergen, Norway

Vision

The Nansen Center’s vision is to make a significant contribution to the understanding, monitoring and forecasting of the world’s environment and climate on local, regional and global scales.

Main research areas are:
• Climate understanding – its variability and change
• Global ocean studies and ocean forecasting
• Development and use of satellite based methods for marine studies
• Satellite monitoring of global environment and climate
• Wind energy mapping in coastal areas
• Socioeconomic impact of global change

Organization

The Nansen Center is an independent nonprofit research foundation affiliated with the University of Bergen, Norway. The Nansen Center conducts basic and applied research funded by research councils, space agencies, national and international governmental agencies, industry and private donations.

The Nansen Center is organized in three groups, the Mohn-Sverdrup Center for Global Ocean Studies and Operational Oceanography, The Polar and Environmental Group and the G.C. Rieber Climate Institute. The total staff is 70 including 10 scientists in adjunct positions. The G.C. Rieber Climate Institute has a scientific staff of 15 including 5 PhD students. The main activity of the G.C. Rieber Climate Institute is devoted to the variability and the dynamical properties of the North Atlantic and Arctic climate system and teleconnection between high and low latitudes. The institute is a main contributor to the development and operation of the Bergen Climate Model (BCM), and the construction of the new Norwegian Earth System Model (NorESM).

The Nansen Center is a major partner in the Bjerknes co-operation in Climate Research established in Bergen between the University of Bergen, the Institute of Marine Research and the Nansen Center (www.bjerknes.uib.no; http://www.bjerknes.uib.no/filer/912.pdf) The Nansen Center is also a partner in the Nansen Centers in St.Petersburg, Russia (www.nersc.spb.ru; www.nersc.no/main/about/annual_reports/NERSC-2007.pdf) in Cochin, India (www.nersc.no/main/about/annual_reports/NERC-2007.pdf) and in Beijing, China (http://nzc.iap.ac.cn; http://www.nersc.no/main/about/annual_reports/NZC_2007.pdf).

The position as Research Director of the G.C. Rieber Climate Institute is vacant. The Nansen Center is seeking a senior climate scientist of international standing to lead the group. Candidates must also have proven management experience and fund raising capacity. Applications will be reviewed from December 1, 2008.

Application with CV and publications list should be sent by e-mail to the Founding Director of Nansen Center, Prof. Ola M. Johannessen (ola.johannessen@nersc.no)
Singapore invites applications for the
Singapore Translational Research “STaR” Investigator Award

STaR INVESTIGATORS

The STaR Investigator Award is a prestigious award, jointly offered by the Singapore Ministry of Health’s National Medical Research Council (NMRC) and the Agency for Science, Technology and Research (A*STAR), to recognise and support investigators with outstanding qualifications in translational and clinical research.

Tenable in Singapore, STaR Investigators can start a new research programme which can potentially advance Singapore’s priorities in biomedical research and healthcare or contribute to the Translational and Clinical Research (TCR) Flagship Programmes*. STaR Investigators may also spend up to 20% of their time engaging in direct patient care in Singapore.

In keeping with the international status of the STaR Investigator Awards, recipients will receive very competitive research support and remuneration, appointments at A*STAR’s Singapore Institute for Clinical Sciences (SICS) as well as tenure-track appointments at the National University of Singapore’s (NUS) Yong Loo Lin School of Medicine, or Duke-NUS Graduate Medical School (GMS). This award is funded by the National Research Foundation (NRF).

Three categories of the STaR Investigator are available:

[i] Distinguished Senior Investigator (DSI),
[ii] Senior Investigator (SI), and
[iii] Investigator (INV).

Successful candidates will receive 5-year support for DSI and SI, and 3- to 5-year support for INV. Awards include (I) Annual Research Support, (II) Annual Salary Support and (III) Start-up Costs. The awards are renewable for further terms upon excellent external reviews.

Profile of a STaR Investigator:

- Medically qualified doctors (MDs) or PhDs active in translational and clinical research or who conduct research that involves integrating basic scientific discoveries with clinical applications
- A physician scientist, clinical investigator, population geneticist, epidemiologist, health services researcher or an investigator engaged in other kinds of population-based biomedical research
- A strong track record of scientific achievement and impact in translational and clinical research

*TCR Flagship Programmes is a national level grant under Singapore Biomedical Science Initiative Phase II with the aim of establishing Singapore as a leader in key disease-oriented focus. More details on the TCR programmes can be found on the NMRC website.

A unique and innovative opportunity for outstanding translational and clinical research investigators

All applications are to be submitted online through the Research, Innovation and Technology Administration (RITA) system.

To apply, please go to http://www.nmrc.gov.sg

Applicants are also required to send in 1 original hardcopy to NMRC at the following address:
Singapore Translational Research (STaR) Investigatorship Awards
National Medical Research Council
11 Biopolis Way
#09-10/11 Helios
Singapore 138667

For further enquires, you may email to: MOH_STAR_NMRC@moh.gov.sg

Closing Date: 31 January 2009, 5pm
Singapore time (+UTC/GMT + 1 hour)
FACULTY POSITIONS
Lupus and Autoimmunity Research
Hospital for Special Surgery and Weill Cornell Medical College

Tenure-track faculty positions at the Assistant Professor, Associate Professor and Professor level are available for established M.D./Ph.D., Ph.D., or M.D. immunologists, cell or molecular biologists with an interest in research relevant to systemic lupus erythematosus or other autoimmune and inflammatory rheumatic diseases. Applicants should have demonstrated high productivity and an outstanding record of funded research. Physician scientists are especially encouraged to apply.

Successful applicants will develop an independent research program focused on basic cellular, molecular or genetic mechanisms relevant to systemic autoimmune and inflammatory rheumatic diseases and will have joint appointments and participate in the academic programs of HSS and WCMC. Desired targeted areas of investigation include functional implications of disease-associated genetic variants; environment-host interactions in induction of disease, including the role of microbial, non-specific adjuvant, or other triggers of immune activation; mechanisms of lymphocyte activation and regulation; and mechanisms of target organ inflammation and damage. An extensive start up package and competitive compensation will be offered to successful applicants.

HSS is a unique institution, providing a multidisciplinary approach to research, patient care, and education focused on the autoimmune rheumatic and musculoskeletal diseases. Located in the York Avenue complex of biomedical institutions on Manhattan’s Upper East Side, including WCMC, Sloan-Kettering Institute, and Rockefeller University, HSS is renowned for outstanding research in the pathogenesis of systemic autoimmune disorders and is rich in resources for translational research, including extensive clinical registries and sample repositories. Opportunities for participation in the clinical and academic activities of the Division of Rheumatology are available for physician applicants.

Please address inquiries, including CV and a two page summary of research accomplishments and plans, to:

Peggy Crow, MD
Chair, Lupus and Autoimmunity Research Search Committee
Hospital for Special Surgery
535 East 70th Street, R-200

FACULTY POSITIONS
DEPARTMENT OF PHYSICS
THE UNIVERSITY OF TEXAS AT AUSTIN

The Department of Physics at The University of Texas at Austin is seeking candidates for tenure-track assistant professorship positions in physics starting in September 2009. In special cases, appointments at more senior levels will be considered. Successful candidates will assume full teaching responsibilities for undergraduate and graduate courses in the Department of Physics and are also expected to conduct vigorous research programs. Research areas of current highest priority for the Department are Biophysics Experiment and Fundamental Theory/Cosmology. Outstanding candidates in other areas of departmental focus will also be considered. Excellent English language communication skills are required. Applicants must have a Ph.D. (or equivalent) and a demonstrated potential for excellence in teaching and research.

Interested applicants should send a curriculum vitae, a list of publications, a statement of research interests, a research plan, and should arrange for at least five letters of recommendation to be sent to: Prof. John T. Markert, Chair, Department of Physics, The University of Texas at Austin, 1 University Station C1600, Austin, TX 78712-0264. Review of completed applications began in October, 2008 and is ongoing.

Duke University

Marine Biogeochemistry Position
Duke University

Duke University’s Division of Earth and Ocean Sciences in the Nicholas School of the Environment invites applications for a tenure-track faculty position in marine biogeochemistry, with the appointment at the assistant professor level. We are interested in individuals who conduct research in biogeochemical cycling in the context of ocean ecosystems, particularly those who study the ocean’s response to climate change. We seek an interdisciplinary scientist who will develop a strong, externally funded research program and participate in undergraduate, graduate and professional teaching and mentoring within the Nicholas School. This search is part of our ongoing efforts to expand the Earth and Ocean Sciences faculty and strengthen research and teaching in the areas of climate, water resources, and energy.

The Nicholas School focuses on leadership in education, research, and service to understand basic earth and environmental processes, to understand human behavior related to the environment, and to inform society about the conservation and enhancement of the environment and its natural resources. Research interests within Earth and Ocean Sciences and the Nicholas School that will complement this position include oceanic ecosystem dynamics, physical oceanography, terrestrial and aquatic biogeochemistry, climate dynamics, paleoceanography, oceanic biodiversity and marine geospatial analysis. Additional interactions in marine conservation and policy are possible with social scientists within the School and the Nicholas Institute. Duke University is a member of the Duke/University of North Carolina Oceanographic Consortium that operates and supports the regional oceanographic vessel R/V Cape Hatteras.

Letters of interest should include a curriculum vitae and names of three references and be sent to: Marine Biogeochemist Search Committee, Division of Earth and Ocean Sciences, Nicholas School of the Environment, Box 90227, Duke University, Durham, NC 27708. The search committee will begin to review applications on December 15, 2008, with an anticipated start date of September 1, 2009.

Duke University is an Affirmative Action/ Equal Opportunity Employer.

At CNA we analyze and solve problems by getting as close as possible to the people, the data and the problems themselves in order to find the answers of greatest clarity and credibility – all to help government leaders choose the best course of action.

We have a professional, diverse staff of over 600 people working in a variety of critical policy areas – such as national security, homeland security, healthcare and education – and offer career opportunities for people with advanced degrees in engineering, mathematics, economics, physics, chemistry, international relations, national security, history, and many other scientific and professional fields of study.

Diverse views, objectivity, imaginative techniques, process driven, results oriented, committed to the common good. Join us.

www.cna.org

NOBODY GETS CLOSER TO THE PEOPLE. TO THE DATA. TO THE PROBLEM.
PICTURE YOURSELF AS A
AAAS SCIENCE & TECHNOLOGY
POLICY FELLOW

Make a Difference.
Help give science a greater voice in Washington, DC! Since 1973, AAAS Fellows have applied their skills to federal decision-making processes that affect people in the U.S. and around the world, while learning first-hand about the government and policymaking.

Join the Network.
Year-long fellowships are available in the U.S. Congress and federal agencies. Applicants must hold a PhD or equivalent doctoral-level degree in any behavioral/social, biological, medical/health, or physical science, or any engineering discipline. Individuals with a master’s degree in engineering and three years of post-degree professional experience also may apply. Federal employees are not eligible and U.S. citizenship is required.

Apply.
The application deadline for the 2009-2010 AAAS Fellowships is 15 December 2008. Fellowships are awarded in the spring and begin in September. Stipends range from $70,000 to $92,000.

Note: Additional fellowships are available through approximately 30 scientific society partners. Individuals are encouraged to apply with AAAS as well as with any scientific societies for which they qualify.

Now a professor in the Department of Psychology at Weber State University

Enhancing Public Policy,
Advancing Science Careers
The Department of Microbiology and Immunology at Dartmouth Medical School (DMS) invites applications from investigators in all areas of immunology, particularly tumor immunology or the immunopathogenesis of infection. We seek an individual for a tenure track position at the assistant, associate or full professor level who will complement existing strengths in molecular and cellular immunology, autoimmunity, tumor immunology, infectious diseases and microbial pathogenesis. Candidates at the associate level or above must have an active research program and current funding. Current faculty have strong research and teaching credentials in a range of topics within the fields of microbiology and immunology (http://dms.dartmouth.edu/microbio/faculty/), and Dartmouth has an existing cancer immunotherapy program (http://www.cancer.dartmouth.edu/research/immunology). There is the opportunity to participate in the interdepartmental Immunology Program, a COBRE-funded Center for Molecular, Cellular and Translational Immunological Research, and an NIH Institutional Training Grant in Immunology. Teaching expectations primarily include participation in courses in medical immunology or microbiology and graduate level courses as part of the Molecular and Cellular Biology interdepartmental Ph.D. graduate program.

This position affords the opportunity to utilize state-of-the-art facilities and resources associated with a major research and teaching institution and cancer center, while enjoying the quality of life characteristic of upper New England. For further information on the various programs at DMS and the Norris Cotton Cancer Center see: www.dartmouth.edu/~dms or www.dartmouth.edu/dms/ncce/index.htm.

All applicants must submit electronic copies of their curriculum vitae, a statement of research interests, future plans and list of publications to Micro.Immu.Faculty.Search@Dartmouth.edu. Letters of recommendation should be sent from three scientists who can evaluate the candidate’s achievements and future potential. Address for mail correspondence is: Kristen Platt, RE: Faculty search, 6th floor Borwell Building, One Medical Center Drive, Lebanon NH 03756. Please address informal inquiries to Dr. Edward Usherwood, search committee chair, EJU@Dartmouth.EDU. Applicants who responded to previously posted advertisements need not re-apply.

Dartmouth Medical School is an Affirmative Action/Equal Opportunity Employer that encourages applications from women and members of minority groups.

**TENURE TRACK FACULTY POSITION IN IMMUNOLOGY ASSISTANT, ASSOCIATE OR FULL PROFESSOR LEVEL DARTMOUTH MEDICAL SCHOOL**

The Department of Microbiology and Immunology at Dartmouth Medical School (DMS) invites applications from investigators in all areas of immunology, particularly tumor immunology or the immunopathogenesis of infection. We seek an individual for a tenure track position at the assistant, associate or full professor level who will complement existing strengths in molecular and cellular immunology, autoimmunity, tumor immunology, infectious diseases and microbial pathogenesis. Candidates at the associate level or above must have an active research program and current funding. Current faculty have strong research and teaching credentials in a range of topics within the fields of microbiology and immunology (http://dms.dartmouth.edu/microbio/faculty/), and Dartmouth has an existing cancer immunotherapy program (http://www.cancer.dartmouth.edu/research/immunology). There is the opportunity to participate in the interdepartmental Immunology Program, a COBRE-funded Center for Molecular, Cellular and Translational Immunological Research, and an NIH Institutional Training Grant in Immunology. Teaching expectations primarily include participation in courses in medical immunology or microbiology and graduate level courses as part of the Molecular and Cellular Biology interdepartmental Ph.D. graduate program.

This position affords the opportunity to utilize state-of-the-art facilities and resources associated with a major research and teaching institution and cancer center, while enjoying the quality of life characteristic of upper New England. For further information on the various programs at DMS and the Norris Cotton Cancer Center see: www.dartmouth.edu/~dms or www.dartmouth.edu/dms/ncce/index.htm.

All applicants must submit electronic copies of their curriculum vitae, a statement of research interests, future plans and list of publications to Micro.Immu.Faculty.Search@Dartmouth.edu. Letters of recommendation should be sent from three scientists who can evaluate the candidate’s achievements and future potential. Address for mail correspondence is: Kristen Platt, RE: Faculty search, 6th floor Borwell Building, One Medical Center Drive, Lebanon NH 03756. Please address informal inquiries to Dr. Edward Usherwood, search committee chair, EJU@Dartmouth.EDU. Applicants who responded to previously posted advertisements need not re-apply.

Dartmouth Medical School is an Affirmative Action/Equal Opportunity Employer that encourages applications from women and members of minority groups.

**Head, Electron Microscopy Facility Sloan-Kettering Institute**

The Sloan-Kettering Institute (SKI) is seeking to fill a position to lead its Electron Microscopy (EM) Core Facility. SKI offers a highly interactive basic, translational and clinical cancer-focused research environment (www.ski.edu) and is located in a multi-institutional academic community. This is a non-tenure track position, fully supported by the Institution.

In this position, you will oversee all operations of the EM Facility including supervision of staff, operations and troubleshooting of Transmission and Scanning Electron microscopes. You will provide technical consultation to the academic staff to optimize use of the microscopes to support research objectives and provide hands-on training to facility users. Additionally, you will assure that established standards of quality are met and that the facility remains state-of-the-art. You will also perform administrative duties that include preparation of reports, budgets and charge backs to facility users.

Applicants must have Ph.D. in Biology or other related areas and several years of experience with Transmission Electron Microscopy in an analytical research and development or academic environment. A record of productivity and management experience is desirable.

Candidates should e-mail their CV and bibliography, a cover letter describing career objectives, and the names of 3 referees in PDF format to: cblabitrack@mskcc.org. Inquiries regarding this position should be sent to Diane Tabarini, PhD, Director Core Facility Operations at tabarini@mskcc.org or Alan Hall, PhD, Chairman of Cell Biology at halla@mskcc.org. Deadline: December 1, 2008. Memorial Sloan-Kettering is an affirmative action, equal opportunity employer.

**UCRiverside ASSISTANT, ASSOCIATE OR FULL PROFESSOR Evolutionary Microbiologist**

The Department of Plant Pathology and Microbiology invites applications for an open-rank tenure-track faculty position in Evolutionary Microbiology. This position will address the department’s expanded mission in research and teaching in the area of general microbiology. The successful candidate will carry out studies of microbial gene or genome evolution, phylogenetic reconstructions of microbe evolution, comparative genome analysis, comparative structural biology, and/or evolution of metabolic pathways. The position will join a vibrant community of faculty in the departments of Plant Pathology and Microbiology, Biology, Botany and Plant Sciences, Entomology, Nematology, Environmental Sciences, the Center for Plant Cell Biology, the Institute for Integrative Genome Biology and Cooperative Extension. The successful applicant will be expected to develop a strong, innovative, extramurally funded research program and contribute to undergraduate and graduate teaching in areas such as microbiology, evolution, bioinformatics and/or statistics. A Ph.D. and demonstrated research excellence are required.

Review of applications will begin January 5, 2009 and will continue until the position is filled. The position will be available July 1, 2009. Applicants should submit a curriculum vitae, a statement of research and teaching interests, selected reprints and have three letters of reference sent to: Dr. Katherine Borkovich, c/o M. Gaton, Department of Plant Pathology and Microbiology, 1415 Boyce Hall, 900 University Avenue, University of California, Riverside, CA 92521. Email: marie.gaton@ucr.edu.

Additional information can be found at http://www.plantpathology.ucr.edu or call Katherine Borkovich at (951) 827-2753.

The University of California is an Affirmative Action/Equal Opportunity Employer.
The journal’s mission is to facilitate communication and cooperation among basic and preclinical researchers, physician scientists, regulators, policy makers, industry, and funding agencies in order to improve health around the world. It will present original, science-based peer reviewed research that successfully moves the field closer to helping patients. Perspectives and reviews from basic and clinical viewpoints, and discussions about research funding and regulatory issues will be included.

With Science Translational Medicine, you can expect the same level of breakthrough research that is the hallmark of the journal Science. The journal will be edited by Katrina L. Kelner, Ph.D. and an international advisory group of clinician scientists and other experts. AAAS will publish an online weekly edition and a monthly print compilation.

The monthly print edition, to be published 12 times a year, will be a compilation of the weekly online edition and sold exclusively to subscribers of the online edition. More subscription details will be available as the launch date approaches. For more information contact the editor and product manager at scitranslationalmed@aaas.org.

Coming Fall 2009

Science Translational Medicine

Integrating clinical medicine and science.

AAAS, publisher of the world’s leading general science journal, Science, is launching a new journal of translational medicine in the fall of 2009.

The journal’s mission is to facilitate communication and cooperation among basic and preclinical researchers, physician scientists, regulators, policy makers, industry, and funding agencies in order to improve health around the world. It will present original, science-based peer reviewed research that successfully moves the field closer to helping patients. Perspectives and reviews from basic and clinical viewpoints, and discussions about research funding and regulatory issues will be included.

Assistant Professor
Tenure-Track
Neurobiology/Oncology

The Dana-Farber Cancer Institute has launched a new program on low-grade astrocytomas and related brain tumors in children. Dana-Farber now seeks outstanding applicants for a tenure-track position at the Assistant or Associate Professor level, with appointment in the Department of Neurobiology at Harvard Medical School or Pediatric Oncology at Children’s Hospital, as appropriate. Candidates are expected to direct innovative and independent research on fundamental problems that underlie pediatric brain tumors and to participate in the teaching missions of the Institute and of Harvard Medical School. Neurodevelopment, the roles of oncogenes and tumor suppressors in the nervous system, and neuropathology are areas of focus for the search. The position offers an attractive start-up support package in a stimulating scientific environment. Applicants must hold a Ph.D., M.D./Ph.D. or M.D. degree, have completed postdoctoral training, and have a strong record of research accomplishments. Applications from women and minority candidates are encouraged.

Applicants should submit a curriculum vitae including a full list of publications, a brief statement of previous contributions and future research plans as well as the names and contact information of four references to:

Faculty Search Committee, c/o Deborah Goff
Dana-Farber Cancer Institute
Room SM1068, 44 Binney Street, Boston, MA 02115
e-mail: Deborah_goff@dfci.harvard.edu
Applications must be received by December 31, 2008.
The Ohio State University Medical Center

POSITION AVAILABLE:
Chair of Neuroscience

The Ohio State University Medical Center Department of Neuroscience seeks an energetic and dynamic leader for the position of Chair of Neuroscience. Neuroscience is one of six strategic programs slated for major investment at the Ohio State University College of Medicine.

Ohio State’s Medical Center leads the region with eight specialties named as among the best in America in the latest U.S. News & World Report magazine. Ohio State’s College of Medicine is ranked 30th by USNWR, making it one of the best public academic medical centers in the U.S.

The Department of Neuroscience currently has 20 faculty members plus 13 individuals who have joint appointments. The department has active research programs in developmental neurobiology, spinal cord injury and repair, neuroimmunology, visual neurobiology and ion channel and receptor physiology.

The Chair candidate should have a background in basic laboratory research and/or translational research and a demonstrated record of scholarly activity, successful extramural funding and administrative experience.

The Chair will lead the integration of basic and clinical research programs in neuroscience and the creation of a strong academic department. The Chair will establish collaborative programs that expand and integrate the strategic priorities of the Medical Center, including neuroscience, heart, cancer, critical care, transplantation and imaging.

This is a full-time, tenure-track position. Applicants should submit a C.V. and a description of their accomplishments and current focus and goals to:

James S. King, Ph.D
Chair, Search Committee
4198 Graves Hall | 333 W. 10th Ave.
Columbus, OH 43210

The Helen L. and Martin S. Kimmel Center for Biology and Medicine at the Skirball Institute of Biomolecular Medicine

Faculty Positions

The Helen L. and Martin S. Kimmel Center for Biology and Medicine at the Skirball Institute of Biomolecular Medicine at New York University Langone Medical Center invites applications for tenure-track positions at the assistant, associate or full professor level. We seek applicants with an exceptional record of achievement to join our existing programs in Molecular Neurobiology, Developmental Genetics, Molecular Pathogenesis and Structural Biology. These programs are interdisciplinary and reflect strengths at NYU Langone Medical Center and the College of Arts and Sciences. Special priority will be given to applicants who:

• Study macromolecular structure and function using X-ray crystallography or single-molecule techniques.
• Study stem cell biology or vertebrate developmental genetics.
• Apply cell biological, molecular and physiological approaches to the study of the nervous system.

The NYU Langone Medical Center offers excellent resources to support new faculty, including generous start-up packages and core facilities for cell sorting, imaging, proteomics, mouse molecular genetics, genomics and structural biology.

Successful candidates are expected to initiate and maintain vigorous independent research programs that will enrich and be enriched by the highly collaborative environment at the Skirball Institute and throughout the NYU research community.

This is an electronic application process only. Please create your application packet by formatting it as a Single PDF document. Use the following page order: 1) Cover Letter – indicating program preference, 2) Curriculum Vitae, 3) Research Statement.

Email the application packet to: skirballsearch@med.nyu.edu

Three letters of reference should be sent independently to: skirballsearch@med.nyu.edu

For full consideration, complete applications should be received by November 15th, 2008.

New York University was founded in 1841 and is an equal opportunity affirmative action employer. Women and minority candidates are encouraged to apply.

http://skirball.med.nyu.edu/
Neuro-oncology Faculty Positions

Our new Neuro-oncology Research Center is recruiting research scientists at assistant, associate, or full professor levels. This Center is a part of an initiative to expand neuroscience research at the Cincinnati Children’s Hospital. In addition to multiple positions in Neuro-Oncology, a multi-divisional neurobiology group will expand in the coming 2–3 years to integrate basic science and clinical neuroscience. Candidates may hold MD, PhD, DVM or MD/PhD degrees. Applicants must have a record of outstanding accomplishment and will be expected to maintain externally funded innovative research programs that contribute to molecular understanding of and treatment for cancer of the nervous system. Areas of interest include development and analysis of models for treatment of pediatric brain tumors, to augment existing strength in neurofibromatosis and tuberosclerosis. The Cincinnati Children’s Hospital Research Foundation is ranked 2nd nationally in NIH funding for Pediatric Research Institutions. Strong programs in gene therapy and hematopoetic malignancy, and a vibrant Phase I program contribute to an outstanding collaborative environment. Salary and start-up packages will be commensurate with experience and qualifications.

Applicants should submit the following as electronic files: curriculum vitae and statement of research interest via email to Nancy Ratner, Professor of Pediatrics, c/o Kenya Lyles, email: Kenya.lyles@cchmc.org.

The University of Cincinnati is an Equal Opportunity Employer and encourages applications from women and minorities.

The University of Cincinnati is currently accepting applications for a Retinal Cell Biologist in the Ophthalmic Research Laboratory in the Department of Ophthalmology with a faculty appointment at the rank of assistant research professor, associate research professor or research professor (rank commensurate with experience).

Job Description: The retinal cell biologist will participate in ongoing projects in vision neuroscience research.

Min. Quals: Candidate should have a doctoral degree, i.e. a Ph.D., Ed.D., M.D. or equivalent, in life sciences.

Ideal Qualifications: Individuals using molecular and genetic approaches for innovative research in Ocular Surface and Retinal Cell Biology and Age-related Macular Degeneration are particularly encouraged to apply.

To apply for position (28UC0913), please see www.jobsatuc.com

The University of Texas Southwestern Medical Center is an Equal Employment Opportunity/Affirmative Action/Immigration Reform and Control Act/Americans with Disabilities Act Employer.

The Department of Neuroscience at the University of Texas Southwestern Medical Center at Dallas, under the new leadership of Dr. Joseph Takahashi, invites applications at the Assistant Professor level for a tenure-track Faculty position in the broadly defined area of Neurogenetics. We seek outstanding scientists addressing molecular and genetic mechanisms underlying behavior, neural circuits and related neurological disorders. Our emphasis is on individuals using forward genetic approaches to understand the nervous system and behavior. Scientists within the Department of Neuroscience participate in a vibrant, interdisciplinary, interdepartmental, and highly collaborative research community within the University, and enjoy access to state-of-art research cores in imaging, mouse MRI imaging, metabolic phenotyping, behavioral phenotyping, protein chemistry, structural biology, genomics, genetics and transgenic technology.

Applicants should send a curriculum vitae, two-page summary of research accomplishments and future plans by January 15, 2009. Applicants should arrange to have 3-5 letters of recommendation sent to the search committee. Please e-mail application materials to:

NeuroscienceSearch@UTSouthwestern.edu
Neuroscience Search Committee
The University of Texas Southwestern Medical Center at Dallas
5323 Harry Hines Blvd.

The University of Texas Southwestern Medical Center is an Affirmative Action/Equal Opportunity Employer. Women and minority candidates are encouraged to apply.
Full Professor of Theory of Molecules and Materials (1.0 fte)
Faculty of Science

The Institute for Molecules and Materials (IMM) at Radboud University Nijmegen (Netherlands) invites applications for a Full Professor of Theory of Molecules and Materials.

The successful candidate shows an exceptional potential to conduct theoretical research at the interface of chemistry and physics. We are seeking an energetic and interactive colleague who initiates novel research within the theory cluster of the IMM and is capable of developing and strengthening collaboration within the institute. He/she has a proven record in acquiring external funding for research and is willing to participate in multidisciplinary projects. In addition, the candidate is expected to be an inspiring lecturer with excellent teaching skills. The candidate should be communicative and willing to represent the institute in national and international research organizations and to contribute to its administrative and organizational tasks. Applicants should have a Ph.D. in chemistry or physics or related discipline.

www.ru.nl/vacancies

Radboud University Nijmegen

Senior Clinical Research Fellows

Oxford Biomedical Research Centre

The NIHR Comprehensive Biomedical Research Centre at Oxford (OxBRC) is a powerful and innovative partnership between the Oxford Radcliffe Hospitals and the University of Oxford. OxBRC was founded in 2007 through a competitively awarded grant of £57.5M over five years from the National Institute for Health Research and its aim is to develop a research portfolio and to build on the international reputations of the partners to reflect the importance of Oxford as a leading centre for translational medical and bio-medical research. OxBRC is now seeking to appoint up to 12 Senior Clinical Research Fellows at Attending Physician level to increase the capacity and capability of the organisation to undertake world-class research. Fostered by the Comprehensive Biomedical Research Centre these roles will build towards the developing Academic Health Science Centre in Oxford. Expressions of interest are now sought from high calibre national and international candidates from a wide range of medical and scientific disciplines.

The Role:
• To generate and lead new translational research programmes comprising predominantly clinical studies involving innovations in patient care and develop new funding streams.
• To take an active clinical role and contribute to the further strategic development of clinical services, innovation and translational research.
• To provide leadership in both clinical services and research within both the hospital and the University.

The Candidate:
• Senior Clinician Scientists within an academic teaching hospital environment.
• Evidence of highly innovative clinical research in a specific discipline, with a track record of peer reviewed and published papers and of securing external funding.
• A commitment to the facilitation of clinical/translational research within an integrated academic-clinical unit.

Please see www.odgers.com/25746 for a candidate brief containing further details or contact Melissa Horn on +44 (0)20 7529 1148 for an informal discussion about these posts. Closing date for expressions of interest is 28th November 2008.

The Department of Neuroscience www.neurosci.tufts.edu/indexDept.html at Tufts University School of Medicine is expanding by adding several tenure-track faculty positions. Positions are available at Assistant, Associate and Full Professor levels. The department will build on its core strengths and focus on the study of synaptic, disorders of the nervous system and neuron-glia interactions. We are seeking candidates who use innovative approaches to investigate problems that cross levels of investigation from molecular and cellular to systems and/or behavioral neuroscience. Candidates using molecular, genetic, electrophysiological and/or imaging methodologies to study neurons, synapses and networks are particularly encouraged to apply. We offer generous start-up packages, newly renovated laboratory space and a highly collaborative environment offering opportunities for both basic and translational research.

Applicants should hold a Ph.D. and/or M.D. degree and have several years of productive postdoctoral experience. Successful candidates will be expected to develop thriving, well-funded research programs and to contribute to graduate and medical education. Please submit electronic applications including a CV, a statement of research interests and the names and email addresses of at least three references to:

neurosci-facultyrecruitment@tufts.edu

TUSM is an Equal Opportunity/Affirmative Action Employer. Women and minorities are encouraged to apply.
Faculty position
Molecular Cardiovascular Biology

The Division of Molecular Cardiovascular Biology at Cincinnati Children’s Hospital Medical Center is initiating a search for a tenure track position at the Assistant, Associate or full Professor level. The successful candidate will have a PhD, MD or MD-PhD degree and at least two years of post-doctoral research experience. The Division occupies outstanding new research space in a state-of-the art, 450,000 ft² building that opened in December, 2007.

Division faculty may join the multi disciplinary graduate program in Molecular and Developmental Biology. The applicant will have a demonstrated track record in one or more of the following areas: molecular aspects of cardiogenesis, normal or abnormal heart development and function, the genetic basis of cardiovascular disease, cardiac signaling, molecular approaches to cardiac physiology, gene regulation, or the application of global approaches to the cardiovascular system.

The successful applicant will be joining a highly productive and interactive faculty. Ample laboratory space in the new building and a generous multi-year start-up package will be provided. Applications should include a comprehensive curriculum vita, the names of three references, a summary of past research and future research plans. Applications should be emailed to: Jeff.Robbins@chmc.org

Faculty Positions in Global Change and Earth System Science
Beijing Normal University, China

The College of Global Change and Earth System Science at Beijing Normal University is a newly established research and education unit. The college is recruiting faculty members at various levels specializing on human-earth system interactions, earth system modeling, earth observation, and global change economics. Interested scientists are encouraged to apply either jointly as a team or individually. The university has allocated support for the establishment of ten research teams in the first phase with each team composing a chief scientist supported by two senior and two junior faculty members. Full-time employment is 9 months per year while visiting positions should work at least 3 months each year in the college. Each chief scientist is expected to do research and graduate teaching in one of the following directions: (1) Human activities and global warming, (2) Carbon cycling science, (3) Atmospheric aerosols and global change, (4) Mass and energy exchange between ocean and land, (5) Climate system modeling, (6) Earth system modeling, (7) High-performance computing for earth system modeling, (8) Earth observation data assimilation at global scale, (9) Application of earth observation data in global change studies, (10) Socio-economic impact of global change and adaptation, (11) Effect of economic development on global change, (12) Economic, social and environmental evaluation of international protocols on reduction of carbon emission.

A scientist at the chief scientist level must have an established international reputation in one of those research directions, proven research organization and leadership skills. A scientist at the senior scientist level is equivalent to a full professor at the university and must have a strong record of publications in world-class journals and have the potential of maintaining first-class scholarly productivity. Scientists at the assistant and associate professor levels must have demonstrated potential of independently carrying out cutting-edge research. Visiting fellows must be leading scientists in his/her area of research and can complement the research activities in the college.

Initial appointment for full-time positions will be for 3-5 year terms. At the end of the second year, there will be an initial review followed by a tenure review at the end of the fourth year. Renewal of appointment will be based on merit review by an international committee. The university is offering a competitive compensation package to successful candidates. The baseline annual salary for a chief scientist is 500,000 RMB. More competitive salaries will be commensurate with qualification. The annual salary of other scientists is determined jointly by the corresponding chief scientist and the college. Visiting fellows are compensated at a monthly basis. Each chief scientist is provided a certain amount of startup funds depending on needs. In addition, medical care is provided the same as other university employee. A certain amount of housing assistance will be provided according to university regulations.

Applicants should send CV, fill an application form downloadable from http://www.bnu.edu.cn/gces/indexe.html, provide 3 most representative research publications, a description of research and teaching interest, and arrange for 3 letter of references by email to: Xiaoqiong Yang, yangxq88@ires.cn, or by post to the College of Global Change and Earth System Science, Beijing Normal University, No.19, Xinjiekouwai Street, Beijing, 100875 China.
COLUMBIA UNIVERSITY

Tenure-Track Faculty Positions

Department to Electrical Engineering

The Department of Electrical Engineering at Columbia University in the City of New York invites applications for tenure-track faculty positions. Primary attention will be given to appointments at the assistant professor level; however, senior appointments may be possible in exceptional cases. Areas of interest include computer engineering, computer networking and communications, nanoscale materials and devices, and systems biology and other research at the interface of electrical engineering and the life sciences.

Candidates must have a PhD degree and are expected to establish a strong research program and excel in teaching both undergraduate and graduate courses. The Department is especially interested in qualified candidates who can contribute, through their research, teaching, and/or service, to the diversity and excellence of the academic community.

Applicants should apply online from the Department Web site at http://www.ee.columbia.edu by following the links to “Job Opportunities.” For full consideration, applications should be submitted by December 31, 2008.

Columbia University is an equal opportunity/affirmative action employer. Minorities and women are encouraged to apply.

Worcester Polytechnic Institute

Department of Biology & Biotechnology

Faculty Position

The Department of Biology & Biotechnology invites applications for a tenure-track faculty position at the ASSISTANT PROFESSOR level. Preference will be given to candidates who use molecular approaches and who seek an environment of collaboration across disciplinary lines, particularly in the three focus areas of WPI’s strategic growth initiative in the Life Sciences: green energy, regenerative biosciences and biophysics. This position is part of a planned ‘cluster hire’ of five faculty positions in this year of the initiative. (visit: www.wpi.edu/goto/lifesci)

The ideal candidate will have a keen interest in participating in our multidisciplinary green energy research cluster. The successful candidate will join a growing community of life scientists within WPI’s new Life Sciences and Bioengineering Center, a $70 million research facility that opened in 2007. Applicants will possess the Ph.D. degree and have postdoctoral training. The successful candidate will be expected to establish a vigorous, extramurally-funded research program in their area of expertise, as well as to provide strong teaching at the undergraduate and/or graduate level. Compensation, new laboratory space and resources for startup funding are competitive and commensurate with research experience and accomplishments.

WPI is a nationally ranked, selective university with a student population of 4,450 including 1,300 fulltime and part-time graduate students. The Department of Biology & Biotechnology currently enrolls ~250 undergraduate majors and ~20 graduate students (Ph.D. & M.S.) Worcester, New England’s second largest city, offers ready access to diverse economic, cultural and recreational resources of the region. Further information about WPI and the department can be accessed at http://www.wpi.edu.

Interested candidates should send pdf-formatted applications including a curriculum vitae, a description of research plans, a statement of teaching philosophy, and a list of five references (with full contact information) to: Professor Eric Overström, Head, Department of Biology & Biotechnology at faculty-searchBBT@wpi.edu. The cover letter should address how the research aligns with the cluster hire focus areas above. Review of applications will be conducted on a rolling basis and continue until the position is filled.

To enrich education through diversity, WPI is an affirmative action, equal opportunity employer.
POSTDOCTORAL POSITIONS AVAILABLE
AMERICAN SOCIETY FOR MICROBIOLOGY AND COORDINATING CENTER FOR INFECTIOUS DISEASES
2009 POSTDOCTORAL RESEARCH PROGRAM

Up to ten positions will be awarded for full-time research on infectious diseases which cause significant public health problems. Fellows will perform research in residence at one of the laboratories of the Centers for Disease Control and Prevention (CDC). CDC operates laboratories in Atlanta, GA, Ft. Collins, CO, Anchorage, AK, and San Juan, Puerto Rico.

Eligible fields of study include:
- Bacterial and Mycotic Diseases
- Viral and Rickettsial Infections
- Nosocomial Infections
- HIV/AIDS
- Vector-borne Infectious Diseases
- Sexually Transmitted Diseases
- Parasitic Diseases

Positions are limited to individuals who either earned their doctorate degree (Ph.D., Sc.D., M.D., D.V.M., or D.D.S.) or have completed a primary residency within three years of their proposed start date. The program provides an annual stipend for two years, up to $500 relocation expenses, up to $3,000 health care benefits package and up to $2,000 for professional development. The fellowship is for 2 years.

The application deadline is January 15, 2009. For more information, visit: http://www.asm.org/Education/index.asp?bid=15497. The brochure and application are available on line.

The Royal Society 2010 Anniversary Research Professorships

During 2010 the Royal Society will be celebrating its 350th anniversary. As part of the celebrations we will be appointing four Royal Society 2010 Anniversary Research Professorships. These posts are designed to enable individuals of the highest ability and achievement to undertake independent, original research at a UK university or not-for-profit organisation into any of the natural and applied sciences, including medical and engineering science.

We are now seeking applications for these 2010 Anniversary Research Professorships, with the aim of making these awards in April 2009. Successful applicants would be expected to take up their appointments by October 2009, or as soon as possible thereafter.

Research Professorships provide long-term support for world-class scientists of outstanding achievement and promise, allowing them to focus on research and collaboration. Previous holders of Royal Society Research Professorships include five Nobel Laureates and five Presidents of the Royal Society.

Applications are particularly welcomed from scientists currently resident outside the UK. The Professorships are available for scientists of any nationality.

The closing date for applications is 23 January 2009. It is expected that the outcome of applications will be announced by the end of April 2009.

Further information is available from the Royal Society website: www.royalsociety.org or via email: ukgrants@royalsociety.org

For more information about this program, please visit: www.ie.edu/biotech
Admissions contact: biotech@ie.edu

COLUMBIA UNIVERSITY
College of Physicians and Surgeons

Basic Pain Research
Assistant-Associate Professor

The Department of Anesthesiology in collaboration with the Departments of Neuroscience, Pharmacology and Physiology/Cellular Biophysics seeks an established and independent basic research scientist to develop a research program in the area of pain biology. It is expected that the successful candidate will be able to interact successfully with a large group of leading neuroscientists in the areas of ion channels, neuronal circuitry and synaptic plasticity. The opportunity exists for interactions with the clinical pain service.

The successful applicant will have strong research interests in aspects of pain and will have a Ph.D., M.D. or Ph.D./M.D. with postdoctoral training and have established a strong independent research program in basic laboratory and/or translation pain research with successful extramural funding, and have the creativity and commitment to take their current program to a higher level offered by this recruitment.

Candidates are invited to submit a CV, description of research interests/achievements, and three references. Please submit to the following address by mail or email (preferred):

Vivian Mirabal, Executive Assistant to the Search Committee, Department of Anesthesiology, Columbia University - College of Physicians & Surgeons, 650 West 168th Street P&S Box 46, New York, NY 10032, (email: vm5@columbia.edu).

Columbia University is an affirmative action/equal opportunity employer.

UMDNJ-ROBERT WOOD JOHNSON MEDICAL SCHOOL

FACULTY POSITIONS IN CANCER EPIDEMIOLOGY, PREVENTION, AND CONTROL

The Cancer Institute of New Jersey (CINJ), part of the University of Medicine & Dentistry of New Jersey (UMDNJ)-Robert Wood Johnson Medical School, with strong academic and scientific affiliations with Rutgers University, the UMDNJ-School of Public Health, and the Institute for Advanced Study, in Princeton, is significantly expanding programmatic efforts in Population Science, including Cancer Epidemiology, Prevention, and Control. Several new faculty positions with generous start up funds are available immediately.

The CINJ is a recipient of a major grant from the Robert Wood Johnson Foundation to expand programmatic efforts in all aspects of population science, including bioinformatics. Population Science, along with outstanding Basic Science and Clinical Science, comprises one of the three operating Divisions of CINJ. The five-county region of Central New Jersey that makes up the major patient base for the CINJ has a population of over 4 million people with significant ethnic diversity. In addition, New Jersey SEER Registry is being integrated into the CINJ. We are seeking independent investigators and collaborators with an established research portfolio including, but not limited to, the areas of behavioral, survivorship, health disparities, molecular epidemiology, environmental epidemiology, and chemoprevention.

Candidates must have a PhD, MD, MD/PhD or related degree. Desirable candidates will have a nationally recognized population science research program and strong interest in collaborative and interdisciplinary research efforts. Academic appointment will be in the UMDNJ-Robert Wood Johnson Medical School with the opportunity for a joint appointment in the UMDNJ-School of Public Health and/or Rutgers University. Rank will be commensurate with experience. Excellent benefits package, including pension plan.

Nominations, Letters of Interest and CVs should be addressed to: Helmut Zarbl, Ph.D., Chair, Search Committee, c/o Louise Burke, The Cancer Institute of New Jersey, 335 George Street, Suite 3700, New Brunswick, NJ 08901; Email: burkels@umdnj.edu. The UMDNJ is an Affirmative Action/Equal Employment Opportunity Employer, m/f/h/v, and a member of the University Health System of New Jersey.

THE UNIVERSITY OF CALIFORNIA, DAVIS
Department of Plant Sciences invites applicants for an Assistant Professor – Plant Biology position. Successful candidate’s research will focus on the biochemical and/or molecular basis of plant biomass production and conversion into Biomaterials and/or Biofuels. Some key research areas may include but are not limited to (1) enhancement of biomass production by plant species to be cultivated as biofuels feedstocks, (2) modification or altered regulation of lignin and/or polysaccharide biosynthesis, and (3) modification or controlled management of cell wall polymer disassembly using multidisciplinary approaches that include molecular genetics, biochemistry, genomics and/or transgenic technologies questions. The ability to teach undergraduate and graduate students is a requirement and the successful candidate will be expected to teach subjects related to plant biomass synthesis and conversion to biomaterials and energy and participate in teaching other undergraduate and/or graduate courses in the Plant Science curriculum. The Assistant Professor position includes an appointment in the Agricultural Experiment Station. Faculty members who hold an Agricultural Experiment Station appointment have a responsibility to conduct research and outreach relevant to the mission of the California Agricultural Experiment Station.

QUALIFICATIONS: Ph.D. or equivalent level of experience in plant Biochemistry, or genetics, or related fields.

SALARY: Commensurate with qualifications and experience.

TO APPLY: Candidates should begin the application process by registering online at: http://recruitments.plantsciences.ucdavis.edu/

For administrative questions regarding the application process, please email: plantsciences@ucdavis.edu. Review of the applications for this position will begin January 9, 2009. The position will remain open until filled.

The University of California, Davis, and the Department of Plant Sciences are interested in candidates who are committed to the highest standards of scholarship and professional activities, and to the development of a campus climate that supports equality and diversity. We welcome all qualified applicants to apply, including women, minorities, veterans, and individuals with disabilities.

Group Leader

Applications are invited for a Group Leader to lead a new research group in the Cell Biology Division of the Laboratory of Molecular Biology. The LMB, which will soon move to a spectacular new building, has an exceptional record of ground-breaking research, a broad remit, and excellent resources. The primary criteria for selection are scientific excellence and potential for major impact. We are keen to recruit someone planning bold and imaginative approaches to solve fundamental questions of cell and developmental biology. Enthusiasm for translational developments from basic research would be welcome.

You should have completed a period of postdoctoral training, or equivalent, with an excellent track record, and show outstanding potential for independent research. You will lead a small team and substantial funding will be available.

This appointment will be made at either Programme Leader or Programme Leader Track depending on experience and achievements. Your salary will be internationally competitive and is supported by a flexible pay and reward scheme. Further information about this post is available from Matthew Freeman, email: mfl1@mrc-lmb.cam.ac.uk

Applications should include a covering letter and full CV, an outline of current research interests (1 page) and a proposal for future research (up to 2 pages), along with the names and addresses of three professional referees who have agreed to be contacted prior to interview. Applications for this post must be made online at http://jobs.mrc.ac.uk inputting the reference LMB08/637. If you do not have access to the internet, or experience technical difficulties, please contact 01793 301257.

This position is subject to pre-employment screening.

Closing date: 10 December 2008.

For further information about the MRC visit www.mrc.ac.uk

The Medical Research Council is an Equal Opportunities Employer
Facility Positions At MIT, The McGovern Institute For Brain Research

The McGovern Institute for Brain Research at MIT is seeking two faculty members at the Assistant Professor, Associate Professor or Professor level. The McGovern Institute’s general focus is in systems neuroscience with an emphasis on the neural basis of perception, cognition, and action. We are seeking two candidates with a research focus in any of these three areas, one using human subjects and the other using animal models. We would regard it as a plus if the candidate’s work bridges levels using a variety of tools and/or if the candidate were interested in translating basic research findings into new ideas for studying the pathophysiology or treatment of brain disorders.

The mission of the McGovern Institute is to understand the relationship of neuronal processes, circuits and computations to behavior, ultimately providing benefits to human health and welfare. Research in the McGovern Institute is expected to help people with brain disorders ranging from sensory system impairments to movement disorders and emotional and cognitive disorders. McGovern Institute scientists have many opportunities for collaboration in a diverse and cutting-edge environment. In the fall of 2005, the Institute moved to occupy a new building, which includes a brain imaging center for human subjects and animals. McGovern Institute members are appointed through an MIT department and will have teaching responsibilities for their home department.

Applicants should submit a curriculum vitae, a summary of current and proposed research programs, a publication list, and should arrange for three letters of recommendation to be sent electronically (preferably PDF) to the McGovern Institute Search Committee, at the following email address: McGovernInstituteSearch@mit.edu. Please indicate which of the two positions you are applying for in your cover letter. Consideration of applications will begin on November 1, 2008 and will continue until the positions are filled. For more information on the McGovern Institute please visit our website at http://web.mit.edu/mcgovertnstitute.

MIT is an Affirmative Action/Equal Opportunity Employer. Qualified women and minority candidates are especially encouraged to apply.

http://web.mit.edu

Founded in 1911, The University of Hong Kong is committed to the highest international standards of excellence in teaching and research, and has been at the international forefront of academic scholarship for many years. Of a number of recent indicators of the University’s performance, one is its ranking at 26 among the top 200 universities in the world by the UK’s Times Higher Education Supplement. The University has a comprehensive range of study programmes and research disciplines, with 20,000 undergraduate and postgraduate students from 50 countries, and a complement of 1,200 academic members of staff, many of whom are internationally renowned.

Post-doctoral Fellowships in the Faculty of Engineering
(Ref.: RF-2008/2009-251)

Applications are invited for appointments as Post-doctoral Fellow (PDF) in the Faculty of Engineering, on or before September 1, 2009. Appointments will be made for a period of 2 to 3 years. PDF posts are created specifically to bring new impetus and vigour to the University’s research enterprise. Positions are available from time to time to meet the strategic research needs identified by the University.

Positions are available in the following Departments:

- Civil Engineering
- Computer Science
- Electrical and Electronic Engineering
- Industrial and Manufacturing Systems Engineering
- Mechanical Engineering

PDFs are expected to devote full-time to research. Applicants should be doctoral degree holders having undertaken original research that has contributed to the body of knowledge. A highly competitive salary commensurate with qualifications and experience will be offered. Annual leave and medical/dental benefits will also be offered.

Procedures

Before preparing an application, applicants should contact the Head of the appropriate department to ascertain that their research expertise matches the research area for which a vacant PDF post is available. Applicants must submit a completed University application form, which should clearly state which department they are applying for. They should also provide further information such as details of their research experience, publications, research proposals, etc.

Further particulars and application forms (152/708) can be obtained at https://www.hku.hk/apptunit/; or from the Appointments Unit (Senior), Human Resource Section, Registry, The University of Hong Kong, Hong Kong (fax: (852) 2540 6735 or 2559 2058, e-mail: senrappt@hku.hk). Applications will be accepted until the positions are filled. Candidates who are not contacted within 3 months may consider their applications unsuccessful.

Science Scholarships and Fellowships

UNCF/MERCK SCIENCE INITIATIVE

The UNCF/Merck Science Initiative is an innovative approach that will create opportunities in the biological and chemical sciences for African American students throughout the country.
FULL TENURE TRACK FACULTY POSITION FOR A CANCER RESEARCH SCIENTIST

The Meharry Medical College/Vanderbilt- Ingram Cancer Center Partnership (MMC/VICC Partnership) is currently soliciting competitive applications for one cancer basic research scientist for a full tenure track faculty position at the level of either assistant or associate professor at Meharry Medical College with a joint appointment at Vanderbilt- Ingram Cancer Comprehensive Center (VICC). The qualified candidate will also have either full or an associate membership status at the VICC. The candidate will be expected to develop and maintain funded competitive cancer research. Initially, the position will be fully funded by the NCI’s U54 Cancer Center Grant to the MMC/VICC Partnership, whose principal investigators are Dr. Harold Moses, Emeritus Director of VICC and Dr. Samuel Evans Adunyah, Chairman of Department of Cancer Biology at Meharry Medical College.

Basic scientists (Ph.D. or M.D./Ph.D.) with cancer research interests in breast cancer are encouraged to apply by November 30, 2008. Please, send an electronic file on CD containing the following information to the address below: • A letter which describes your interest in our position and your current position • Research description and future research goals • Current full CV • References (at least 4)

Dr. Samuel Evans Adunyah
Chairman, Department of Cancer Biology
Co-P.I., MMC/VICC Partnership
Department of Cancer Biology
1005 D.B. Todd Blvd.
Nashville, TN 37208

Dr. Samuel Evans Adunyah can be reached at: 615/327-6345; Fax: 615/327-6440; e-mail: sadunyah@mmc.edu. OR Send your materials by e-mail to: Ms Ketia Barnes, MMC/VICC Cancer Partnership Program Coordinator, kbarnes@mmc.edu.

University of California, San Diego
Division of Biological Sciences (http://www-biology.ucsd.edu/)
Faculty Position in Algal Biotechnology

The Section of Molecular Biology at UCSD seeks a faculty member who will contribute to our developing research strength in the area of photosynthetic microbiology, with a preference for research on the role of algae in sustainable energy systems. It is anticipated that the position will be filled as a tenured appointment at the Associate or Full Professor level, but tenure-track appointment at the Assistant Professor level will be considered for an exceptionally strong candidate. Applications are invited from candidates who work with eukaryotic or prokaryotic photosynthetic microbial systems in areas relevant to sustainable energy, including biofuels. The candidate should have a strong record in fundamental biological or biochemical research as well as an interest in applications of algae for biofuel production. Candidates must have a Ph.D. degree or equivalent, postdoctoral experience, and a distinguished record of research accomplishment. In addition to performing outstanding research, the successful candidate will participate in undergraduate and graduate education. The level of appointment will be commensurate with qualifications and experience, with salary based on the University of California pay scale. This position in algal fuels is part of a major cluster hire effort in environmental sustainability, and constitutes one of several positions being recruited by six campus departments.

Each applicant should submit a detailed resume, copies of selected publications, and a summary of current and proposed research. The compiled document should be submitted as a Portable Document File (.pdf) attached to an e-mail: algal-search-g@ucsd.edu. Assistant Professor level candidates should arrange for three letters of recommendation to be sent electronically to the search committee at the same email address above. Complete applications received by November 11, 2008 will be assured of full consideration. Direct inquiries can also be submitted to algal-search-g@ucsd.edu.

UCSD is an EO/AA Employer with a strong institutional commitment to excellence through diversity. Applicants are welcome to include a personal statement summarizing their contributions to diversity.
The Salk Institute for Biological Studies, located in La Jolla, CA, is inviting applications for:

Faculty Positions in the Crick-Jacobs Center for Theoretical and Computational Biology

The Salk Institute invites applications for faculty positions at any level in the Crick-Jacobs Center for Theoretical and Computational Biology. Appointees will be expected to establish independent research programs aimed at understanding the organization of signaling systems and the functional neuroanatomy of the brain, from the molecular to the systems levels, and how behavior arises from the interactions between the brain's many components. Researchers from the physical sciences and engineering who are developing new tools to study brain circuits and systems are encouraged to apply.

The Salk Institute offers a competitive salary, excellent benefits and a highly interactive environment with research groups working in areas of genetics, molecular biology and neuroscience.

Information on how to apply may be found on Salk's website at: http://www.salk.edu/careers/careers_current_faculty.php.

The Salk Institute for Biological Studies, 10010 N. Torrey Pines Road, La Jolla, CA 92037. EOE.

Do what you love.
Love what you do.

Science Careers
From the journal Science
GEORGE MASON UNIVERSITY
School of Public Policy

The School of Public Policy at George Mason University invites nominations and applications for two faculty positions: (1) the OMER L. and NANCY HIRST ENDOWED CHAIR and (2) PROFESSOR in public policy. In each case, an earned Doctorate is required.

(1) The Omer L. and Nancy Hirst Endowed Chair is one of five named Chairs resident in the School of Public Policy (SPP) and holds the most senior faculty rank in the School. The Chair is held by an outstanding scholar in any field of public policy who has also established a reputation as a civic intellectual, and makes regular and thoughtful contributions to public deliberations about policy issues at the national and global levels. Previous holders of the Chair include Alice Rivlin, Francis Fukuyama, and Richard Florida.

(2) A Senior Professor in public policy is also sought to begin in fall 2009, or as soon as practicable thereafter. This position will be held by an outstanding scholar with a well-established reputation and a strong track record of publications in academic journals, sponsored research, professional collaboration, and contributions to the policy debate in the United States or elsewhere. The position is open to all fields of public policy, but the SPP particularly encourages scholars who focus on prices and markets, regulation, private sector governance, political economy, or one of the established areas of financial markets or natural resources to apply.

The positions will be based primarily at George Mason’s Arlington campus, in the SPP’s new building (completion scheduled for 2010), just minutes from Washington, D.C. and the major national and international policy institutions. The SPP is a leading research program in HCV biology, and ample laboratory space.

Successful candidates will receive a competitive salary, startup funds, and ample laboratory space.

INTERESTED APPLICANTS ARE ENCOURAGED TO APPLY

APPLICATIONS SHOULD INCLUDE A BRIEF SUMMARY OF RESEARCH INTERESTS AND PLANS, AND CONTACT INFORMATION OF AT LEAST THREE REFERENCES, AND A TENTATIVE CURRICULUM VITAE. APPLICATIONS SHOULD BE SENT TO:

Dr. Kenneth McQuaid, Chief of Gastroenterology, San Francisco VA Medical Center
e-mail: Kenneth.mcquaid@med.va.gov

or via post:
GI Section 11BB, VA Medical Center, 4150 Clement Street, San Francisco, CA 94121.

MUSC is an Equal Employment Opportunity/Affirmative Action Employer. The University undertakes affirmative action to assure equal employment opportunity for underrepresented minorities and women, for persons with disabilities, and for covered veterans.

PHANOR L. PEROT, JR., ENDOWED CHAIR in SPINAL CORD INJURY

Medical University of South Carolina

The Medical University of South Carolina, Department of Neurosciences, invites nominations and applications for the Phanor L. Perot, Jr., Professorship and Endowed Chair in Spinal Cord Injury. The position will be filled at the rank of ASSOCIATE or FULL PROFESSOR (M.D. or Ph.D.). The optimal candidate should be an accomplished scientist with an outstanding record of research. The position in the Department of Neurosciences, comprised of Neurology, Neurosurgery, and Neuroscience Divisions, is elegantly suited for both basic research and clinical patient care. A competitive development package, research space, and salary are available.

Review of applications will begin on December 1, 2008, and continue until the position is filled. Applicants must apply online at website: http://www.musc.edu/hrm/careers/faculty.htm (position/ requisition number 045186). Your online application for this position should include curriculum vitae, the names and contact information of at least three references, and a cover letter expressing your qualification and statement of research interests. For further information contact: Naren L. Banik, Ph.D., Search Committee Chair, e-mail: baniknl@musc.edu.

MUSC is an Equal Employment Opportunity/Affirmative Action Employer.
Faculty Position – Assistant Professor
ANIMAL SYSTEMS PHYSIOLOGY

The Department of Biology at the University of California, Riverside invites applications for a tenure-track 9-month academic position at the assistant professor rank beginning Fall 2009. A Ph.D. in Physiology or a related field and at least one year of postdoctoral experience are required. Applicants are expected to develop a strong and externally funded research program in animal systems physiology. We seek a candidate that can bridge our existing departmental strengths in integrative and comparative physiology with campus wide strengths in biomedical and applied physiology.

Opportunities include collaborations with a variety of campus research centers (http://www.cnas.ucr.edu/centers/index.html), the emerging medical school, and the University of California Natural Reserve System. All faculty members teach at the undergraduate and graduate levels, and may participate in one or more interdepartmental graduate programs. Applicants should email a curriculum vitae, separate statements of research and teaching interests, and up to three reprints to animalphys@ucr.edu. In addition, applicants should request that three letters of recommendation be sent to:

Chair, Systems Physiology Search Committee
Department of Biology
University of California
Riverside, CA 92521-0334

Review of applications will begin on January 12, 2009 and will continue until the position is filled. Website: http://biology.ucr.edu.

The University of California is an Equal Opportunity Employer.

ASSOCIATE PROFESSOR
Department of Breast Medical Oncology

The University of Texas M. D. Anderson Cancer Center, Department of Breast Medical Oncology, is recruiting for a tenure-track faculty position within the Associate Professor level with active laboratory research related to breast cancer. Physicians/Scientists with strong laboratory research and clinical expertise in breast cancer or Ph.D. candidates with active translational research interests in breast cancer are strongly encouraged to apply. The successful candidate will have the opportunity to participate in ongoing research with world-class scientists through membership in the large Breast Cancer Research Program within the University of Texas M. D. Anderson Cancer Center. The program is comprised of dynamic interdisciplinary leading researchers dedicated to improving prevention, detection, diagnosis, prognosis and treatment of breast cancer. The selected candidate will assist with mentoring young faculty, fellows, and other trainees, and contribute to the overall mission of the department.

Applicants should possess excellent writing and communication skills as evidenced by peer-reviewed publications, presentation skills for professional meetings, and the demonstrated ability to obtain extramural funding for clinical and laboratory research. Expertise in breast cancer biology and drug development is preferred, with a specific focus on novel biologic agents and their clinical applications. The selected candidate is expected to develop a nationally recognized research program emphasizing a broad variety of candidates.

Salary is competitive and based on qualifications. Please send a letter of intent, curriculum vitae, names and addresses of three references, and a brief summary of past research accomplishments and future research plans to: Gabriel N. Hortobagyi, MD, Chairman, Department of Breast Medical Oncology, the University of Texas M. D. Anderson Cancer Center, 1515 Holcombe Blvd., Unit 1354, Houston, TX 77030-4009.

The University of Texas M. D. Anderson Cancer Center is an equal opportunity employer and does not discriminate on the basis of race, color, national origin, gender, sexual orientation, age, religion, disability or veteran status except where such distinction is required by law. All positions at The University of Texas M. D. Anderson Cancer Center are security sensitive and subject to examination of criminal history record information. Smoke-free and drug-free environment.

Tenure-Track Faculty Positions in Bio-Defense and Emerging Infectious Diseases

The newly established Center for Predictive Medicine (CPM) for Bio-Defense and Emerging Infectious Diseases at the University of Louisville is seeking candidates for two tenure-track positions at ASSISTANT, ASSOCIATE or FULL PROFESSOR levels. Preference will be given to applicants using small animal models to study basic mechanisms of emerging and select agents which will lead to the discovery of novel diagnostics, biomarkers, treatments, and vaccines. The successful candidates will hold a Ph.D. and/or M.D. and be expected to develop and maintain an externally funded research program. The University of Louisville is now undergoing expansion in microbiology and infectious disease research, with a new 35,000 sq. ft. NIH-funded Regional Biocontainment Laboratory (RBL) and 25,000 sq. ft. of additional BSL2/3 laboratories on the University Health Science campus that will become available in mid-2009. This is an opportunity to join a dynamic and interactive team of faculty in the Schools of Medicine, Dentistry, Public Health, and Arts & Sciences with access to state-of-the-art research, imaging technologies (i.e., small animal BLI/FLI, microPET/CT, etc.) and biocontainment infrastructure. For more information on the CPM-RBL, please visit: http://louisville.edu/community/biosafetylab/

Applicants must apply on-line at www.louisville.edu/jobs for Job Openings 23425 or 23429; attach the following documents in a single PDF file: cover letter, curriculum vitae, statements of research and teaching interests, and contact information for four references. For further inquiries, contact Jan Powars, jjanpowars@louisville.edu. Review of applications will begin immediately, and continue until successful candidates are identified.

The University of Louisville is an Affirmative Action, Equal Opportunity, and Americans with Disabilities Employer, committed to diversity and, in that spirit, seeks applications from a broad variety of candidates.

Tenure Track Virologist Position

Tenure track Assistant Professor at the University of Nebraska Center for Virology and the School of Biological Sciences. Candidates will be expected to develop a nationally recognized research program emphasizing a broad biological or system approach, preferably working on the evolution and/or ecology of prokaryotic and eukaryotic viruses. Specific area of research is open; appropriate examples of research interests include viral evolutionary genetics, comparative genomics and proteomics, pathogenesis or epidemiology of diseases. Candidates must show excellent capacity to develop and coordinate interdisciplinary collaborative research with other Center and departmental researchers. Candidates will be expected to teach courses at the undergraduate and graduate levels. A Ph.D. or equivalent and post-doctoral experience in related area is required.

Start date is Fall 2009. The position will remain open until a suitable candidate is selected. To apply log on to http://employment.unl.edu requisition #080880 and complete the Faculty/Administrative information Form and attach CV, cover letter, statement of research interests and teaching interests and philosophy; representative publications; names, addresses and phone numbers of three references. Arrange for three letters of reference to be sent by January 12, 2009 to Dr. Alan Kamil, School of Biological Sciences, University of Nebraska-Lincoln, 348 Manter Hall, Lincoln, NE 68588-0118. Review of applications will begin January 12, 2009 and continue until the position is filled or the search is closed.

The University of Nebraska has an active National Science Foundation ADVANCE gender equity program, and is committed to a pluralistic campus community through Affirmative Action, Equal Opportunity, work-life balance, and dual careers.
The Research Imaging Center (RIC) at UTHSCSA seeks applications for a Postdoctoral Fellowship in the field of brain development and aging using MRI and PET imaging. The RIC has an expansive inventory of state-of-the-art imaging equipment, including new 7T and 11.7T dedicated animal MRI scanners, several PET cameras, and two cyclotrons (website: http://ric.uthscsa.edu). The candidate should have training in either MRI imaging or developmental neurobiology or both. Those not proficient in imaging technologies will have capable staff made available for such purposes, but should have good computational and analytical skills. Send cover letter and curriculum vitae to: Dr. Duff Davis, Research Imaging Center, University of Texas Health Science Center, 7703 Floyd Curl Drive, San Antonio, TX 78295. E-mail: davism2@uthscsa.edu.

The University of Texas Health Science Center at San Antonio is an Equal Employment Opportunity/Affirmative Action Employer.

The Department of Biology at Duke University and the Duke Institute of Brain Sciences (DIBS) seek applications for a tenure-track faculty position in neurobiology at a cellular/molecular level. We are especially interested in applicants using model invertebrate systems, or zebrafish, and genetic, molecular, developmental, and/or systems level approaches to address problems of fundamental importance to neural function. DIBS is a cross-school, campuswide, interdisciplinary Institute with a commitment to building an interactive community of brain science research and scholarship. The Department of Biology is in close proximity to the Medical School and the School of Engineering, and there are excellent opportunities for interactions with faculty and students from other departments and programs across campus. Successful candidates must have a Ph.D. and will be expected to establish extramurally funded research, train graduate students, and actively participate in undergraduate education and research. We anticipate hiring at the ASSISTANT PROFESSOR level but will consider outstanding individuals at a more senior level.

Applicants should submit curriculum vitae, a brief summary of current and proposed research, reprints of two or three key publications, and a statement of teaching interests via the web at website: http://www.academicjobsonline.org. Candidates should also arrange for three letters of recommendation to be uploaded to this website.

Deadline for applications is November 30, 2008.

Duke University is an Equal Opportunity/Affirmative Action Employer; women and members of minority groups are strongly encouraged to apply.

VISITING ASSISTANT PROFESSOR

Biological Sciences, Physics, or Chemistry

The Departments of Chemistry, Physics, and Biological Sciences at Bowling Green State University invite applications for a visiting Assistant Professor/Instructor position beginning August 2009. Applicants are expected to teach forensic science courses to both nonscience majors and science majors. The successful candidate will hold a Ph.D. or equivalent in an area of biology, physics, or chemistry with demonstrated expertise in forensic science. Also, the individual will be involved as a faculty member with the Chapman Residential Learning Community. Some courses will be taught at Chapman and the candidate will be expected to participate in the Chapman Residential Learning Community. Applicants must send curriculum vitae, statement of expertise and teaching interests, and three reference letters by November 20, 2008, to: Connie Allison, Forensic Science Search Committee, College of Arts and Sciences, 205 Administration Building, Bowling Green State University, Bowling Green, OH 43403.

BGSU is an Affirmative Action/Equal Employment Opportunity Employer/Educator and welcomes applications from women, minorities, veterans, and persons with disabilities.

Calling for applications for ASSOCIATE DEAN of the Shantou University Medical College, China. Shantou University Medical School, a dynamic and innovative school located in Guangdong Province, China, jointly funded by the Chinese government and the Li Ka-shing Foundation, is seeking an Associate Dean of the Medical School to direct the five affiliated hospitals.

Preferred qualifications: (1) M.D. or M.D./Ph.D. with extensive experiences in teaching hospital management; (2) outstanding organization and management skills; (3) excellent in both Chinese and English.

We provide a competitive package. Please address applications to Dr. Qin at e-mail: dnsqin@stu.edu.cn.
How to Publish in Science

Come get a leg up on publishing in *Science* and other top journals. Find out what editors and reviewers look for in submissions and learn about the publication process.

**featuring Katrina Kelner, Ph.D.**
Deputy Editor, *Science*

**Society for Neuroscience Meeting**
Washington, D.C.
Convention Center
November 18, 2008
6:30–7:30 pm, Room 209
Light refreshments will be served.
NEUROBIOLOGIST. The Biology Department of Franklin and Marshall College invites applications for a one-year VISITING ASSISTANT PROFESSOR position in neurobiology/neuroscience, beginning Fall 2009. Candidates should have the Ph.D. and demonstrated strengths in teaching and research. Teaching responsibilities will include lecture and laboratory sections of a sophomore-level neuroscience course, a laboratory elective in neuroscience in the context of a course on functional brain imaging, and contributions to the general education curriculum. The teaching load is 3/2. We offer strong interdisciplinary majors in neuroscience and animal behavior in addition to our majors in biology and biochemistry and molecular biology.

Franklin and Marshall has a tradition of excellence in science and student research. A new life sciences building opened in 2007. In 2008, the Howard Hughes Medical Institute awarded the College a substantial grant to launch a Research Training Program. Please send a letter of application, a statement that explains plans for actively engaging undergraduates through teaching and research and explains goals for developing as a teacher and scholar, curriculum vitae, teaching evaluations, and undergraduate and graduate transcripts to: Prof. Robert N. Jinks, Department of Biology, Franklin and Marshall College, P.O. Box 3003, Lancaster, PA 17604-3003. Applicants should send three letters of recommendation to Prof. Jinks. Priority will be given to completed applications received by January 9, 2009. Electronic submissions cannot be accepted. Telephone: 717-291-4118; fax: 717-291-4545; e-mail: science@fandm.edu; website: http://www.fandm.edu/biology.xml. Franklin and Marshall College is a highly selective liberal arts College with a demonstrated commitment to cultural pluralism. Equal Opportunity Employer.

VERTEBRATE FUNCTIONAL MORPHOLOGIST. Florida International University Biological Sciences Department invites applications for a tenure-track, open-rank position, for fall 2009. Candidates must have a Ph.D., demonstrated record of research excellence, potential for independent research, and commitment to teaching at the undergraduate and graduate levels. Postdoctoral experience required, and the successful candidate is expected to develop a competitive externally funded research program. The Biological Sciences Department has 900 plus undergraduate majors, 135 graduate students, 16 post-doctoral fellows, and faculty members. Visit our website: http://www.fiu.edu/~biology. Applications will be accepted until the position is filled. Send curriculum vitae, summary of research and teaching interests, and three reprints, along with names and addresses of three references, to: Prof. J. J. Fink. Vertebrate Functional Morphologist Search and Screen Committee, Department of Biological Sciences, Florida International University, University Park Campus, OX 167, Miami, FL 33199. Florida International University is an Equal Opportunity Educator and Employer.

CHAIR, DEPARTMENT OF BIOLOGY. University of North Carolina at Charlotte

Chair, the Department of Biology, University of North Carolina, Charlotte, effective July 1, 2009. Twelve-month appointment. Required qualifications: (1) a doctoral degree in the biological sciences; (2) a distinguished record of scholarship and teaching, appropriate for appointment as a FULL PROFESSOR; and (3) evidence of strong administrative skills. Desired qualifications: previous administration experience; a strong history of faculty development; and ability to develop a large and diverse and successful research program. Applicants must be computer literate. Applications must be made electronically at: https://jobs.uncc.edu and must include curriculum vitae and statements on research, teaching, and leadership/management style. Informal inquiries can be made to: Dr. John A. Holyoke, Chair, Vertebrate Functional Morphologist Search and Screen Committee, Department of Biological Sciences, Florida International University, University Park Campus, OX 167, Miami, FL 33199. Florida International University is an Equal Opportunity Educator and Employer.

POSTDOCTORAL FELLOW/RESEARCH ASSOCIATE

Two positions, Research Associate and Postdoctoral Fellow, are available to study the cellular and molecular mechanisms of lung development and function. Applicants must have a Ph.D. degree with research experience in signal transduction mechanisms and/or models of neurodegeneration. For the Research Associate position, postdoctoral experience and a strong publication record is required. Please send curriculum vitae to: Santosh R. D’Mello, Department of Molecular and Cell Biology, University of Texas - Dallas, 600 W. Campbell Road, Richardson, TX 75083-0688. (website: http://www.utdallas.edu/biology/faculty/research/dmello.html). UT D is an Affirmative Action/Equal Opportunity Employer.

BIOINFORMATICIST, faculty position in microbiology. Miami University invites applications for a tenure-track ASSISTANT PROFESSOR position to begin in August 2009. Applicants must have a Ph.D. in microbiology or closely related discipline with an emphasis in bioinformatics or computational biology, and postdoctoral research experience that applied computer sciences to biology. Teaching responsibilities include introductory and advanced level courses in microbiology, bioinformatics, and computational biology, and directing M.S. and Ph.D. students. The successful applicant will establish and maintain an externally funded, hypothesis-driven research program based on the development and application of tools and algorithms used in bioinformatics, structural biology, and/or the analysis of microbial genomic and/or metagenomic databases and biological networks, and provide service to the University. More information about the Department of Microbiology and Miami University is available at: website: http://www.miamiohio.edu/micro/; Submit curriculum vitae, up to three reprints, statements of teaching philosophy and research goals, and three letters of reference sent to: Dr. Gary R. Jansen, Department of Microbiology, Miami University, Oxford, OH 45056 or (send PDF of materials to e-mail: jansreg@miamiohio.edu). Screening of applicants begins December 1, 2008, and will continue until the position is filled. Women and minority candidates are encouraged to apply. Miami University is an Equal Opportunity Employer/Affirmative Action Employer with smokefree campus. Crime Prevention and Safety Report, see website: http://www.miamiohio.edu/righttoknow. Hand copy upon request.

The University of Michigan Department of Medicine, Division of Infectious Diseases seeks M.D., or M.D./Ph.D. candidates for tenure-track positions at the ASSISTANT, ASSOCIATE, or FULL PROFESSOR rank to develop and conduct independently funded basic and/or translational research programs in the fields of viral or bacterial pathogenesis. Investigators will join a growing and interactive group of researchers with close ties to both basic science and clinical departments within the University, and joint appointments within graduate departments of the University of Michigan are available. Interested individuals should submit curriculum vitae, summary of research and career goals for junior applicants, and contact information along with three references addressed to: Powel Kazanjian, M.D., Professor and Chief Division of Infectious Diseases Department of Internal Medicine 4505 S. State St., Box 1004 1500 E. Medical Center Drive 3119 Taubman Center SPC 5378 Ann Arbor, MI 48109-5378 or e-mail: francis@umich.edu. The University of Michigan is an Equal Opportunity Employer; women and other minorities are encouraged to apply.
Found Animals is proud to announce:

The Michelson Prize & Grants in Reproductive Biology

The Michelson Prize in Reproductive Biology:

$25 million Prize will be awarded to the first entity to provide a non-surgical sterilant that is safe, effective, and practical for use in cats and dogs.

Winning entry must meet the following:
- Single dose, non-surgical sterilant
- Safe and effective in male and female cats and dogs
- Viable pathway to regulatory approval
- Feasible manufacturing process and cost
- Suitable for administration in a field setting, either orally or by injection

For more information about the Prize and Grants, visit: www.foundanimals.org
Join the mailing list to receive the latest news and updates.

The Michelson Grants in Reproductive Biology:

Up to $50 million in multiple, multi-year grants for promising research.

Grant recipients eligible for Prize claims.

The first step in the Grant process is submitting a Letter of Intent (LOI).

For more information about submitting an LOI, visit: www.foundanimals.org.

The Alliance for Contraception in Cats and Dogs (ACC&D) is a strategic partner in the Michelson Prize and Grants in Reproductive Biology. Visit www.acc-d.org for information on non-surgical approaches to pet overpopulation.

Director of Scientific Research

Found Animals is a private operating foundation dedicated to developing sustainable, scalable animal welfare business models to minimize euthanasia of cats and dogs.

The Foundation is seeking a Director of Scientific Research. Position is ideal for a self-starter with operations management abilities and a solid background in biological sciences.

Duties:
- Review research in reproductive biology & non-surgical sterilization
- Oversee Prize & Grants program
- Serve as lead representative and spokesperson for the Prize and Grants

Qualifications:
- PhD in biological sciences
- Experience in development and commercialization of pharmaceuticals
- Understanding of animal welfare issues helpful, but not required

To apply, submit CV, cover letter, salary history and requirements to: employment@foundanimals.org.
RESEARCH ASSOCIATE/POSTDOCTORAL FELLOW

The University of Arkansas at Little Rock seeks applicants to fill the position of Research Associate/Postdoctoral Fellow to work with Dr. Hong Li Wang in the areas of molecular biology, gene regulation, metabolism, functional genomics and bioinformatics, to start as soon as possible.

The position is funded by a National Science Foundation Experimental Program to Stimulate Competitive Research grant. The research is focused on the identification of novel phenolic compounds and co-regulated biologically active compounds in medicinal plants. The research involves the collection of algae and plant material from the southeastern United States, followed by isolation and characterization of active bioactive compounds using liquid chromatography/mass spectrometry, analysis of gene expression, gene functional analysis using in situ hybridization or direct visualization of subcellular localization by fluorescent proteins, knockout gene expression using gene silencing and/or mutation.

Please send a letter of application (reference required) to: hliwang@ualr.edu. Please list all applications to: glitpositions@ualr.edu. Related website: http://www.ualr.edu/biology/.

UALR is subject to Equal Employment Opportunity/Affirmative Action/Freedom of Information laws. Persons hired must provide proof of legal authority to work in the United States.

ASSOCIATE RESEARCH SCIENTIST

Associate Research Scientist position is immediately available for M.D. or Ph.D. scientists in the Division of Molecular Medicine to conduct research on the molecular basis of atherosclerosis and atherothrombosis. See website: http://www.alantall.org for more information. Send curriculum vitae to: Dr. Alan Tall, Division of Molecular Medicine, Columbia University, 630 West 168th Street (P&S 8-401), New York, NY 10032. We take Affirmative Action toward Equal Employment Opportunity.

POSTDOCTORAL POSITIONS
University of Florida

Two positions in molecular microbial pathogenicity available immediately to study (1) communication and signaling in oral microbial communities (see Mol. Microbiol. 69:1153, 2008); (2) interactions between P. gingivalis and host epithelial cells (see Proc. Natl. Acad. Sci. 103:11027, 2006). Experience with bacterial genetics is required; tissue culture and cell biology expertise is also preferred. Send curriculum vitae and names of three references to e-mail: lamont@ufl.edu.
