SOCIOLOGY
The Spreading of Disorder
K. Keizer, S. Lindenberg, L. Steg
Upon observing signs of social disorder (such as littering or graffiti), individuals are more likely to disobey a variety of social rules, including prohibitions against theft.
>> News story p. 1175 10.1126/science.1161405

CELL BIOLOGY
Dynamic Proteomics of Individual Cancer Cells in Response to a Drug
A. A. Cohen et al.
Cells that escape death from a chemotherapy drug express a different array of proteins from genetically identical ones that died, which may help to inform cancer therapeutics.
>> News story p. 1176 10.1126/science.1160165

REVIEW
PSYCHOLOGY
The Psychology of Transcending the Here and Now
N. Liberman and Y. Trope

BREVIA
ECOLOGY
Fossil Pollen as a Guide to Conservation in the Galápagos
J. F. N. van Leeuwen et al.
Fossil pollen shows that six plant species in the Galápagos, presumed to be invasive, had actually been native to the islands for thousands of years before human colonization. >> Science Podcast

RESEARCH ARTICLES
CHEMISTRY
Time-Resolved Dynamics in N₂O₄ Probed Using High Harmonic Generation
W. Li et al.
Electrons can be ejected from multiple orbitals of N₂O₄ by exploiting different stages in its excited vibrations, yielding an attosecond light probe of molecular dynamics. >> Perspective p. 1194

PHYSICS
Broadband Invisibility by Non-Euclidean Cloaking
U. Leonhardt and T. Tyc
In theory, materials with a negative refractive index deployed in a curved, non-Euclidean space can provide a route to cloaking and invisibility across a range of wavelengths.
10.1126/science.1166332

CHEMISTRY
Real-Time DNA Sequencing from Single Polymerase Molecules
J. Eid et al.
Arrays of narrow waveguides can record the action of a DNA polymerase stepping along a primer template, potentially providing a way to sequence DNA molecules.
>> Science Podcast 10.1126/science.1162986

RESEARCH ARTICLES CONTINUED...
BIOCHEMISTRY
The 2.6 Angstrom Crystal Structure of a Human A₂A Adenosine Receptor Bound to an Antagonist
V.-P. Jaakola et al.
The ligand binding pocket of the caffeine-binding human adenosine receptor has a different position and orientation than that of other G protein–linked receptors.

ASTRONOMY
The Fermi Gamma-Ray Space Telescope Discovers the Pulsar in the Young Galactic Supernova Remnant CTA 1
A. A. Abdo et al.
The Fermi Space Telescope has detected a gamma-ray pulsar associated with a young supernova remnant, implying that such stars may be unidentified gamma-ray sources.
>> Perspective p. 1193

ASTRONOMY
Observation of Pulsed γ-Rays Above 25 GeV from the Crab Pulsar with MAGIC
The MAGIC Collaboration
The MAGIC telescope has detected higher-energy, pulsed gamma rays from the Crab pulsar and a threshold suggesting that they are emitted from the outer magnetosphere.
>> Perspective p. 1193

PHYSICS
Ab Initio Determination of Light Hadron Masses
S. Dürr et al.
A quantum electrodynamics model that includes a full representation of quarks and their electromagnetic interactions accurately determines the masses of neutrons and protons.
>> Perspective p. 1198

Downloaded from http://science.sciencemag.org/ on July 21, 2017
DEVELOPMENTAL BIOLOGY
Canonical Wnt Signaling Regulates Organ-Specific Assembly and Differentiation of CNS Vasculature
J. M. Stenman et al.
In mice, two specialized ligands for a key developmental signaling pathway are produced by neuroepithelial cells and direct endothelial cells to form the blood-brain barrier. >> Perspective p. 1195

MEDICINE
Regulation of Pancreatic β Cell Mass by Neuronal Signals from the Liver
J. Imai et al.
In obese mice, fat tissue stimulates proliferation of insulin-producing pancreatic cells via a neural relay through the liver, contributing to symptoms of metabolic syndrome.

ECOLOGY
Control of Toxic Marine Dinoflagellate Blooms by Serial Parasitic Killers
A. Chambouvet, P. Morin, D. Marie, L. Guillou
As successive populations of protists have caused summer red tides in France, each has been killed off by a distinct, persistent parasite, establishing a self-regulating ecosystem.

IMMUNOLOGY
Antimicrobial Defense and Persistent Infection in Insects
E. R. Haine, Y. Moret, M. T. Siva-Jothy, J. Rolff
Flies fight some infections by quickly engulfing bacteria in phagocytic cells then deploying antimicrobial peptides, a system that avoids bacterial resistance. >> Perspective p. 1199

SOCIETY
Multi-University Research Teams: Shifting Impact, Geography, and Stratification in Science
B. F. Jones, S. Wuchty, B. Uzzi
Over the past 30 years, scientific papers have become increasingly likely to be written by teams of authors from more than one of a small number of elite universities.

Special Feature
Scientists as Financial Analysts

Finance’s Quantum Mechanics
Analyzing Scientific Investments

www.sciencemag.org  SCIENCE  VOL 322  21 NOVEMBER 2008  1155

Printed on 30% post-consumer recycled paper.
With new modes of regulation and new functions for members of the pathway, TGF-β breaks the canonical barrier.

There are TGF-β–independent regulatory mechanisms and functions of Smads.

The distribution of promyelocytic leukemia protein between the nucleus and cytoplasm controls Smad activation.

In addition to talks emphasizing the role of TGF-β in cancer, many speakers shared memories of Anita Roberts, scientist mentor, colleague, and friend.

Find an array of images, animations, and slides for teaching cell biology and signal transduction; in Educator Sites.

Explore the structures and functions of thousands of protein domain families; in Protein Databases.

Despite today’s headlines, it might be a good time to plan for a career as a financial analyst.

Financial systems executive Lee Maclin explains why scientists often succeed as quantitative analysts.

> See Scientists as Financial Analysts feature p. 1264

Download the 21 November *Science* Podcast to hear about classifying native and non-native Galápagos plant species, speeding up DNA sequencing, scientists as financial analysts, and more.
Science 322 (5905), 1159-1267.
