

# Isn't it time to change the shape of cell culture?

**You asked. We angled.** The new GIBCO bottle puts an end to painful pipetting, thanks to its wide mouth and angled neck. Pouring is easier, too. And when it comes to storage, GIBCO bottles fit nicely right next to each other. With labels on two sides, you can find what you need so you can get on to what you need to do. GIBCO's got a new angle on cell culture media. Give it a try at [www.invitrogen.com/gibcobottle](http://www.invitrogen.com/gibcobottle).
