CONTENTS

POLICY FORUM
43 “True” Conservation Progress
E. McDonald-Madden et al.

PERSPECTIVES
45 How Old Is That Star?
D. R. Soderblom

46 Cloaking with Curved Spaces
A. Nicolet and F. Zolla >> Report p. 110

47 Repair or Replacement—A Joint Perspective
J. Klein

49 A Matter of Preservation
C. Hawkesworth et al.

50 Farewell, Lecture?
E. Mazur
>> Education & Technology section p. 53

51 Mosquitoes Cut Short
A. F. Read and M. B. Thomas >> Report p. 141

BREVIA
94 Nanodiamonds in the Younger Dryas Boundary Sediment Layer
D. J. Kennett et al.
Nanodiamonds in sites across North America suggest that an asteroid impact coincided with cooling 12,900 years ago.
>> News story p. 26

RESEARCH ARTICLES
95 Glucosinolate Metabolites Required for an Arabidopsis Innate Immune Response
N. K. Clay et al.

101 A Glucosinolate Metabolism Pathway in Living Plant Cells Mediates Broad-Spectrum Antifungal Defenses
P. Bednarek et al.
Plant cells defend against fungal attack through an innate immunity pathway in which infection triggers glucosinolate synthesis, stimulating formation of a protective callose.

REPORTS
106 Mott Insulating State in Ultraclean Carbon Nanotubes
V. V. Deshpande et al.
Both metallic and semiconducting carbon nanotubes exhibit a radius-dependent energy gap arising from correlated electrons in the tubes.

110 Broadband Invisibility by Non-Euclidean Cloaking
U. Leonhardt and T. Tyc
In theory, materials with a negative refractive index deployed in a curved, non-Euclidean space can provide a route to cloaking and invisibility across a range of wavelengths.
>> Perspective p. 46

112 Control of Self-Assembly of DNA Tubules Through Integration of Gold Nanoparticles
J. Sharma et al.
Gold particles incorporated into DNA strands drive the formation of a variety of three-dimensional spiral architectures.

116 Declining Coral Calcification on the Great Barrier Reef
G. De’ath et al.
Calcification by Great Barrier Reef corals decreased by about 14% since 1990, the largest decline in the past 400 years.
>> News story p. 27

119 Stretching the Envelope of Past Surface Environments: Neoproterozoic Glacial Lakes from Svalbard
H. Bao et al.
Unusual oxygen isotope compositions indicate that a Precambrian glacial period had an anomalous, perhaps extremely CO₂-rich, atmosphere.

122 Why Peer Discussion Improves Student Performance on In-Class Concept Questions
M. K. Smith et al.
In the classroom, discussion among students improves understanding and leads to more accurate answers to questions.
>> Education & Technology section p. 53

124 Regulation of Neuronal Survival Factor MEF2D by Chaperone-Mediated Autophagy
Q. Yang et al.
The degradation of a key neuronal survival factor by chaperone-mediated autophagy may contribute to Parkinson’s disease.

127 Signal Sequences Activate the Catalytic Switch of SRP RNA
N. Bradshaw et al.
Newly made proteins destined to be inserted into membranes trigger an RNA switch that promotes initiation of this process.

130 Floral Iridescence, Produced by Diffractive Optics, Acts as a Cue for Animal Pollinators
H. M. Whitney et al.
The iridescence of tulip petals, as well as their pigmentation, affects foraging behavior by bumblebees.

132 Stable Introduction of a Life-Shortening Wolbachia Infection into the Mosquito Aedes aegypti
C. J. McMeniman et al.
Infection of mosquitoes with a bacterium shortens their lives and reduces disease transmission, without development of resistance.
>> Perspective p. 51

CONTENTS continued >>
Neuronal Activity–Induced Gadd45b Promotes Epigenetic DNA Demethylation and Adult Neurogenesis
D. K. Ma et al.
Neural activity induces an immediate early gene that triggers epigenetic modifications needed for neurogenesis.
10.1126/science.1166859

TECHNICAL COMMENTS
Comment on “Log or Linear? Distinct Intuitions of the Number Scale in Western and Amazonian Indigene Cultures”
J. F. Cantlon et al.
full text at www.sciencemag.org/cgi/content/full/323/5910/38b
Response to Comment on “Log or Linear? Distinct Intuitions of the Number Scale in Western and Amazonian Indigene Cultures”
S. Dehaene et al.
full text at www.sciencemag.org/cgi/content/full/323/5910/38c

SCIENCEONLINE
www.sciencexpress.org
Cytosolic Viral Sensor RIG-I Is a 5′-Triphosphate–Dependent Translocase on Double-Stranded RNA
S. Myong et al.
A host protein that recognizes invading viruses activates innate immunity defenses only when it senses both double-stranded RNA and a 5′ triphosphate.
10.1126/science.1168352

RESEARCH ARTICLE: Type I IL-4Rs Selectively Activate IRS-2 to Induce Target Gene Expression in Macrophages
N. M. Heller et al.
PERSPECTIVE: Untangling the Complex Web of IL-4– and IL-13–Mediated Signaling Pathways
M. Wills-Karp and F. D. Finkelman
Understanding how IL-4 and IL-13 signaling differ could result in the development of better anti-inflammatory therapies.
PERSPECTIVE: Bursting into the Nucleus
G. R. Crabtree and I. A. Graef
Calcium elicits bursts of nuclear localization of a yeast transcription factor, which may enable the coordinated activation of target genes.
