COVER
Hot dust clouds in the center of the Milky Way, photographed by the Infrared Array Camera (IRAC) aboard the Spitzer Space Telescope. The International Year of Astronomy gets under way this week with opening ceremonies at UNESCO headquarters in Paris; Science marks the occasion with a special News Focus section beginning on page 326.

REPORTS

353 Dust Formation in a Galaxy with Primitive Abundances
G. C. Sloan et al.
A carbon star lacking many heavy elements produces abundant dust, perhaps explaining the origin of dust in the early universe.

356 Early Lunar Magnetism
I. Garrick-Bethell et al.
Remnant magnetism in minerals in an unshocked Apollo sample implies that the Moon had a molten core 4.2 billion years ago.

359 Contribution of Fish to the Marine Inorganic Carbon Cycle
R. W. Wilson et al.
Fish excrete large amounts of calcium carbonate and thus influence the carbon cycle in the ocean.

362 Morphogenesis of Self-Assembled Nanocrystalline Materials of Barium Carbonate and Silica
J. M. Garcia-Ruiz et al.
The growth of inorganic crystals in a chemically coupled system produces curved morphologies like those found in biology.

366 Broadband Ground-Plane Cloak
R. Liu et al.
An automated design process arranges thousands of metamaterial components to cloak an object on a metal surface.

369 Coherent Intrachain Energy Migration in a Conjugated Polymer at Room Temperature
E. Collini and G. D. Scholes
Extended conformations of polymers in solution foster rapid energy transport along individual chains, but not between chains.

373 A Mouse Speciation Gene Encodes a Meiotic Histone H3 Methyltransferase
O. Mihola et al.
A gene responsible for sterility in the offspring of two mouse species, and therefore important in speciation, regulates gene expression via methylation in chromatin.

376 A Single Gene Causes Both Male Sterility and Segregation Distortion in Drosophila Hybrids
N. Phadnis and H. A. Orr
A Drosophila gene that causes sterility in the offspring of two species and may be important for speciation causes increased transmission of itself to progeny.

379 The Dynamics and Time Scale of Ongoing Genomic Erosion in Symbiotic Bacteria
N. A. Moran et al.
Comparisons of strains of obligate symbionts reveal stepwise evolutionary changes leading to gene inactivation and DNA loss.

382 A Polymorphism in npr-1 Is a Behavioral Determinant of Pathogen Susceptibility in C. elegans
K. C. Reddy et al.
Mutations in neuropeptide receptors prevent nematode worms from swimming away to avoid bacterial pathogens.

384 The Structure of Rat Liver Vault at 3.5 Angstrom Resolution
H. Tanaka et al.
The large, ribonucleotide proteins involved in resisting infection have domains that bind to lipid-raft regions of the cell membrane.

388 Draxin, a Repulsive Guidance Protein for Spinal Cord and Forebrain Commissures
S. M. Islam et al.
A protein cue guides the formation of bundles of nerve fibers that connect the cerebral hemispheres.

393 Recombination of Retrotransposon and Exogenous RNA Virus Results in Nonretroviral cDNA Integration
M. B. Geuking et al.
With the help of an endogenous retrovirus, RNA virus sequence can be incorporated into mouse chromosomes.

396 Molecular Mechanisms of HipA-Mediated Multidrug Tolerance and Its Neutralization by HipB
M. A. Schumacher et al.
A persistence factor similar to a eukaryotic kinase regulates bacterial dormancy and contributes to antibiotic resistance in E. coli.

401 Chromatin-Associated Periodicity in Genetic Variation Downstream of Transcriptional Start Sites
S. Sasaki et al.
The periodic wrapping of DNA around nucleosomes in chromatin determines a periodic variation in mutation type and frequency around transcription start sites in a fish.

The Formation of Massive Star Systems by Accretion
M. R. Krumholz et al.
Numerical simulations show that instabilities can channel gas into growing massive stars despite their high radiation pressure. >> Science Podcast
10.1126/science.1165857

Strong Release of Methane on Mars in Northern Summer 2003
M. J. Mumma et al.
Earth-based spectrometers have detected seasonal variations of methane emissions from certain locations on Mars in 2003. 10.1126/science.1165243

Sensing Chromosome Bi-Orientation by Spatial Separation of Aurora B Kinase from Kinetochore Substrates
D. Liu et al.
The mechanism for sensing tension across chromosome pairs before mitotic separation relies on the distance between enzyme and substrate. 10.1126/science.1167000

Effects of Genetic Perturbation on Seasonal Life History Plasticity
A. M. Wilczek et al.
Interactions among mutation, germination timing, and climate alter flowering patterns in Arabidopsis. 10.1126/science.1165826

A Genetic Defect Caused by a Triplet Repeat Expansion in Arabidopsis thaliana
S. Sureshkumar et al.
A strain of Arabidopsis provides a plant model for the harmful effects of repeat nucleotide expansions in populations. 10.1126/science.1164014

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2009 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (15 issues): $146 (157 allocated to subscription). Domestic institutional subscription (15 issues): $1615. Foreign postage extra: Mexico, Caribbean surface mail 155; other countries (air assist delivery) 185. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Publications Mail Agreement Number 4009624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96611, Washington, DC 20090–6178. Single-copy sales: $10.00 current issue, $15.00 back issue prepaid includes surface postage, bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $2.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
Science 323 (5912), 307-405.
