BREVIA

896 Tracking Long-Distance Songbird Migration Using Geolocators

B. J. M. Stutchbury et al.

Miniature recorders mounted on purple martins and wood thrush allow mapping of migration routes between North America and the Neotropics.

REPORTS

897 Lunar Global Shape and Polar Topography Derived from Kaguya-LALT Laser Altimetry

H. Araki et al.

An analysis of lunar high-resolution topographic data helps explain how surface features are supported by the lithosphere.

>> Perspective p. 885

900 Farside Gravity Field of the Moon from Four-Way Doppler Measurements of SELENE (Kaguya)

N. Namiki et al.

A gravity field model reveals differences in the lithosphere between the Moon’s far- and nearsides.

>> Perspective p. 885

905 Long-Lived Volcanism on the Lunar Farside Revealed by SELENE Terrain Camera

J. Haruyama et al.

Images of the Moon by the SELENE spacecraft and revised dates of lava flows by crater counts imply that episodic volcanism on the farside lasted to 2.5 billion years ago.

>> Perspective p. 885

909 Lunar Radar Sounder Observations of Subsurface Layers Under the Nearside Maria of the Moon

T. Ono et al.

A period of reduced volcanism may account for extensive regions of radar-reflective minerals that underlie some major lunar basalt flows.

>> Perspective p. 885

912 Equilibrium Iron Isotope Fractionation at Core-Mantle Boundary Conditions

V. B. Polyakov

Calculated iron fractionation factors at high pressures may explain the different isotopic values found for Earth, Mars, and meteorites.

>> Perspective p. 882

915 Skyrmion Lattice in a Chiral Magnet

S. Mühlbauer et al.

Magnetic ordering arises from a repeating network of spins caught in a spiral vortex structure.

>> Perspective p. 888

919 Observation of Unconventional Quantum Spin Textures in Topological Insulators

D. Hsieh et al.

Spin imaging reveals an insulating state that results from the entanglement of a macroscopic number of spins.

>> Perspective p. 888

923 Coherence Factors in a High-Tc Cuprate Probed by Quasi-Particle Scattering Off Vortices

T. Hanaguri et al.

The momentum-dependent coherence factors in a high-temperature superconductor are revealed by introducing magnetic vortices.

>> Perspective p. 884

926 Polydnaviruses of Braconid Wasps Derive from an Ancestral Nudivirus

A. Bézier et al.

Virus-like particles used by parasitic wasps to manipulate host defenses are encoded by virus-related genes incorporated into the wasp genome.

>> Perspective p. 884

930 Effects of Genetic Perturbation on Seasonal Life History Plasticity

A. M. Wilczek et al.

Interactions among mutation, germination timing, and climate alter flowering patterns in Arabidopsis.

934 The Hallucinogen N,N-Dimethyltryptamine (DMT) Is an Endogenous Sigma-1 Receptor Regulator

D. Fontanilla et al.

An endogenous compound is a ligand for a ubiquitously expressed receptor that binds many synthetic drugs and has been implicated in psychiatric disease.

937 When Your Gain Is My Pain and Your Pain Is My Gain: Neural Correlates of Envy and Schadenfreude

H. Takahashi et al.

Envy is strongest against those with similar attributes, and the most joy is gained from the pain of those envied the most.

>> Perspective p. 890

940 A Neural Mechanism for Microsaccade Generation in the Primate Superior Colliculus

Z. M. Hafed et al.

The same neural structure involved in voluntary fast eye movements controls small involuntary movements that occur during gaze fixation.

943 An ABC Transporter Controls Export of a Drosophila Germ Cell Attractant

S. Ricordo and R. Lehmann

Similar lipid modification and export pathways produce the attractants important in migration of budding yeast and fruit fly germ cells.

>> Perspective p. 883

946 The Orphan G Protein–Coupled Receptor 3 Modulates Amyloid-Beta Peptide Generation in Neurons

A. Thathiah et al.

A neuronal G protein–coupled receptor can stimulate the generation of the Aβ peptide implicated in Alzheimer’s disease.

951 Differences in Early Gesture Explain SES Disparities in Child Vocabulary Size at School Entry

M. L. Rowe and S. Goldin-Meadow

Pre-verbal communication through gestures can improve a child’s vocabulary.

Sequencing and Analyses of All Known Human Rhinovirus Genomes Reveals Structure and Evolution A. C. Palmenberg et al.

Rhinoviruses, which are a common cause of colds, fall into three or possibly four major clades and can undergo strain recombination. 10.1126/science.1165557

The Dynamic Control of Kiss-And-Run and Vesicular Reuse Probed with Single Nanoparticles Q. Zhang et al.

A transient form of vesicle fusion that allows vesicle reuse is more prevalent early during synaptic response to a train of stimuli. 10.1126/science.1167373

Genome-Wide Analysis in Vivo of Translation with Nucleotide Resolution Using Ribosome Profiling N. T. Ingolia et al.

Profiling the position of ribosomes on messenger RNA allows rapid, high-precision investigation of cellular protein translation. 10.1126/science.1168978

Colloidal silver particles can be formed into flexible electrodes of arbitrary shape in three dimensions. 10.1126/science.1168375

Highlights From Our Daily News Coverage

Novel HIV-Fighting Method Finally Gels Study reports first “success” in preventing HIV infections with vaginal microbicide.

One Giant Leap for Robot-Kind Cockroach-inspired design could help Mars rovers and other robots traverse sandy terrain.

Flu: It’s the Humidity. Absolutely Study suggests that absolute, not relative, humidity explains why influenza is seasonal.

The Signal Transduction Knowledge Environment

RESEARCH ARTICLE: Brx Mediates the Response of Lymphocytes to Osmotic Stress Through the Activation of NFAT5 T. Kino et al.

The guanine nucleotide exchange factor Brx is essential for osmotic stress–mediated expression of nfat5 in lymphocytes.

MEETING REPORT: Emerging Roles of NAD+ and Its Metabolites in Cell Signaling F. Koch-Nolte et al.

Scientists discussed the molecular aspects of NAD+ metabolism and signaling at a conference in Hamburg, Germany.

NETWATCH: Simmune Project Build models, run simulations, and explore the dynamics of signaling pathways; in Modeling Tools.

NETWATCH: American Physiological Society Archive Browse or search an index of peer-reviewed science education materials; in Educator Sites.
