Cover
Maltose binding protein (translucent), shown suspended in its
molten globule state with chaperone protein SecB (yellow),
destined for transport across the cellular membrane. The Gordon
Research Conference on Visualization in Science & Education
will be held 26 to 31 July 2009 at Magdalen College, Oxford, UK.
The schedules for the 2009 Gordon Research Conferences begin
on page 1084.

RESEARCH ARTICLE
1026 Oxide Nanoelectronics on Demand
C. Cen et al.
An atomic force microscope is used to pattern and fabricate devices created at the interface between different oxides.
>> Perspective p. 1018

REPORTS
1030 Macroscopic 10-Terabit–per–Square-Inch Arrays from Block Copolymers with Lateral Order
S. Park et al.
The sawtooth topography of annealed sapphire wafers guides the phase separation of a block copolymer to create a nearly defect-free patterned film.
1033 The Formation of Warm Dense Matter: Experimental Evidence for Electronic Bond Hardening in Gold
R. Ernstorfer et al.
Injecting energy into a gold film can create a transient excited state with stronger bonds prior to melting.
1037 Switching Off Hydrogen Peroxide Hydrogenation in the Direct Synthesis Process
J. K. Edwards et al.
Unwanted product hydrogenation was avoided by using a modified catalyst that had smaller gold-palladium nanoparticles.
1041 Strong Release of Methane on Mars in Northern Summer 2003
M. J. Mumma et al.
Earth-based spectrometers have detected seasonal variations of methane emissions from certain locations on Mars in 2003.
1045 Isotopic Evidence for an Aerobic Nitrogen Cycle in the Latest Archean
J. Garvin et al.
A modern nitrogen cycle developed and microbial metabolisms evolved as soon as some free oxygen was present.
1048 Zircon Dating of Oceanic Crustal Accretion
C. J. Lissenberg et al.
Zircon dates from the slow-spreading mid-Atlantic Ridge show that magmatic intrusions formed new oceanic crust regularly and evenly, thereby providing cooling times.
>> Perspective p. 1017
1050 A Self-Regulatory System of Interlinked Signaling Feedback Loops Controls Mouse Limb Patterning
J.-O. Bénazet et al.
Interactions between three signaling pathways allow robust regulation of vertebrate limb development.
1053 Trifurcate Feed-Forward Regulation of Age-Dependent Cell Death Involving mir164 in Arabidopsis
J. H. Kim et al.
A logic circuit involving microRNA and transcription factors ensures the timely demise of plant leaves.
1057 HIN-200 Proteins Regulate Caspase Activation in Response to Foreign Cytoplasmic DNA
T. L. Roberts et al.
A family of proteins is identified that binds to foreign cytoplasmic DNA in mammalian cells and regulates the immune response.
1060 A Genetic Defect Caused by a Triplet Repeat Expansion in Arabidopsis thaliana
S. Sureshkumar et al.
A strain of Arabidopsis provides a plant model for the harmful effects of repeat nucleotide expansions in populations.
1063 Stress-Inducible Regulation of Heat Shock Factor 1 by the Deacetylase SIRT1
S. D. Westerheide et al.
The longevity factor SIRT1 influences protein stability by keeping heat shock factor 1 in its active state.
>> Perspective p. 1021
1067 Disruption of Vertical Motility by Shear Triggers Formation of Thin Phytoplankton Layers
W. M. Durham et al.
Extensive sheets of photosynthetic algae accumulate in coastal waters when their upward swimming is disrupted by counter currents in lateral water flow.
>> Perspective p. 1022
1070 Cytosolic Viral Sensor RIG-I Is a 5’-Triphosphate–Dependent Translocase on Double-Stranded RNA
S. Myong et al.
A host protein that recognizes invading viruses activates innate immunity defenses only when it senses both double-stranded RNA and a 5’ triphosphate.
1074 Neuronal Activity–Induced Gadd45b Promotes Epigenetic DNA Demethylation and Adult Neurogenesis
D. K. Ma et al.
Neural activity induces an immediate early gene that triggers epigenetic modifications needed for neurogenesis.
1077 Harmonic Convergence in the Love Songs of the Dengue Vector Mosquito
L. J. Cator et al.
Male and female mosquitoes change their wing beat frequencies to match each other as a prelude to mating.

 pos. regulated by a nuclear receptor and

kinetically controlled and determined by primary
and tertiary structures.

PERSPECTIVE: Von Gierke’s Disease Adopts
an Orphan (and Its Partner)
A. Cheng and A. R. Saltiel

The transcription of glucose-6-phosphatase is
positively regulated by a nuclear receptor and
coactivator.

TOOLING UP: The Cold, Hard Truth About
the course of your career as a physician-scientist.
L. Austin

Your choice of research problem may determine
the course of your career as a physician-scientist.

FREE WEEKLY SHOW
PODCAST
T. Kino and A. M. VanHook

The guanine nucleotide exchange factor Brx is
required in lymphocytes for the expression of
nfrats in response to osmotic stress.
