PERSPECTIVES
1678 The Art of Making an Exit
F. Carlsson and E. J. Brown
>> Report p. 1729
1679 Through a Mirror, Differently
J. A. Sheps
>> Report p. 1718
1680 Producing Transportation Fuels with Less Work
D. Hildebrandt et al.
1682 Pressurized Viruses
W. M. Gelbart and C. M. Knobler
1683 Dangers In and Out
M. E. Bianchi and A. A. Manfredi
>> Report p. 1722

BREVIA
1687 Queen Succession Through Asexual Reproduction in Termites
K. Matsuura et al.
Queen termites produce their successors asexually but use normal sexual reproduction to produce other colony members.

CONTENTS continued >>
Fermi Observations of High-Energy Gamma-Ray Emission from GRB 080916C
1688

Comprehensive Characterization of Genes Required for Protein Folding in the Endoplasmic Reticulum
M. C. Jonikas et al.
1693

Lubrication at Physiological Pressures by Polyzwitterionic Brushes
M. Chen et al.
1698

Controlled Formation of Sharp Zigzag and Armchair Edges in Graphitic Nanoribbons
X. Jia et al.
1701

Graphene at the Edge: Stability and Dynamics
Ç. O. Girit et al.
1705

Reversible Interactions with para-Hydrogen Enhance NMR Sensitivity by Polarization Transfer
R. W. Adams et al.
1708

Increasing Hyperpolarized Spin Lifetimes Through True Singlet Eigenstates
W. S. Warren et al.
1711

Greatly Expanded Tropical Warm Pool and Weakened Hadley Circulation in the Early Pliocene
C. M. Brierley et al.
1714

Structure of P-Glycoprotein Reveals a Molecular Basis for Poly-Specific Drug Binding
S. G. Aller et al.
1718

CD24 and Siglec-10 Selectively Repress Tissue Damage–Induced Immune Responses
G.-Y. Chen et al.
1722

Comprehensive Characterization of Genes Required for Protein Folding in the Endoplasmic Reticulum
M. C. Jonikas et al.
1693

Infection by Tubercular Mycobacteria Is Spread by Nonlytic Ejection from Their Amoeba Hosts
M. Hagedorn et al.
1729

Critical Population Density Triggers Rapid Formation of Vast Oceanic Fish Shoals
N. C. Makris et al.
1734

Genetic Contribution to Variation in Cognitive Function: An fMRI Study in Twins
J. W. Koten Jr. et al.
1737

Changes in Temperature Preferences and Energy Homeostasis in Dystroglycan Mutants
K. Takeuchi et al.
1740

Quantitative 3D Video Microscopy of HIV Transfer Across T Cell Virological Synapses
W. Hübner et al.
1743

A Transposon-Based Genetic Screen in Mice Identifies Genes Altered in Colorectal Cancer
T. K. Starr et al.
1747
RESEARCH ARTICLE: Dynamic Signaling in the Hog1 MAPK Pathway Relies on High Basal Signal Transduction
J. Macia et al.
High intrinsic basal signaling in mitogen-activated protein kinase pathways ensures proper dynamic responses to environmental stimuli.

PERSPECTIVE: Challenges and Opportunities in Defining the Essential Cancer Kinome
B. D. Manning
RNAi screens for essential kinases reveal that the potential therapeutic kinase universe is larger than expected.

PERSPECTIVE: Amyloid Goes Global
I. Bezprozvanny
Amyloid plaques have farther-reaching effects on astrocytes than previously suspected.

MEETING REPORT: Signal Transduction—Receptors, Mediators, and Genes
F. Entschladen et al.
Cell signaling researchers gathered in Weimar, Germany for the annual meeting of the Signal Transduction Society.

PRESENTATION: Early Events of B Cell Activation by Antigen
D. Depoil et al.
B cells undergo membrane spreading and contraction during activation in response to antigen-presenting cells.

PODCAST
S. J. Smardon and A. M. Van Hook
The activity of a bacterial FHA domain-containing protein is regulated intramolecularly.

SCIENCE CAREERS

Free Career Resources for Scientists

Special Feature: Not What You Thought You’d Be Doing
E. Pain
A visual artist, a cartoonist, and a winemaker—all trained as scientists—are pursuing unexpected careers.

The Itinerant Artist
E. Pain
Angelo Vermeulen eventually reconciled his talent for the arts with his scientific curiosity.

In Vino Oportunitas
A. Levine
Jeff Mangahas left scientific work to become an award-winning winemaker.
