COVER
A close-up of the tropical coral Favia speciosa. The position and age of related fossil corals have been used to constrain the timing of sea-level rise during the penultimate deglacial period. The timing of past sea-level change, relative to potential forcings, can help determine the mechanisms of climate change and the speed of ice sheet collapse. See page 1186.

REVIEW
1160 The Computation of Social Behavior
T. E. J. Behrens et al.

BREVIA
1165 Entropic Evidence for Linguistic Structure in the Indus Script
R. P. N. Rao et al.
Analysis of the pattern of symbols confirms the linguistic role of ancient signs.

REPORTS
1166 Magnetic Field Sensing Beyond the Standard Quantum Limit Using 10-Spin NOON States
J. A. Jones et al.
Quantum mechanical entanglement of nuclei in a single molecule results in an enhancement of the magnetic field sensitivity.

1169 Two-Quantum 2D FT Electronic Spectroscopy of Biexcitons in GaAs Quantum Wells
K. W. Stone et al.
Controlling the phase and timing of four optical pulses enables measurement of correlations between the electronic semiconductor carriers.

1173 Tearing of Stagnant Slab
M. Obayashi et al.
A tear in the plate in the mantle provides information on the subduction history of the western Pacific.

1175 Assessment of Undiscovered Oil and Gas in the Arctic
D. L. Gautier et al.
About 30 percent of the world’s undiscovered gas and 13 percent of the world’s undiscovered oil probably exist north of the Arctic Circle.

1179 Volcanism, Mass Extinction, and Carbon Isotope Fluctuations in the Middle Permian of China
P. B. Wignall et al.
Fossiliferous rocks from southwest China show that a major extinction in the Middle Permian coincided with extensive volcanic eruptions.

1183 Implications of Limiting CO₂ Concentrations for Land Use and Energy
M. Wise et al.
Technologies for growing crops are potentially as important for limiting the concentration of atmospheric CO₂ as are those for capture and storage.

1186 Penultimate Deglacial Sea-Level Timing from Uranium/Thorium Dating of Tahitian Corals
A. L. Thomas et al.
Sea levels rose during the penultimate deglaciation while Northern Hemisphere insolation was at a minimum.

1190 Topographical and Temporal Diversity of the Human Skin Microbiome
E. A. Grice et al.
The human skin provides a landscape of dry, damp, and greasy niches for a diversity of symbiotic microorganisms.

1192 A Role for the CHC22 Clathrin Heavy-Chain Isoform in Human Glucose Metabolism
S. Vassilopoulos et al.
A human-specific vesicle-forming protein regulates relocation of a glucose transporter to the cell membrane.

1194 Synthetic Gene Networks That Count
A. E. Friedland et al.
Genetic counters with the ability to count up to three induction events are constructed in Escherichia coli.

1199 Implications of Limiting CO₂ Concentrations for Land Use and Energy
M. Wise et al.
Technologies for growing crops are potentially as important for limiting the concentration of atmospheric CO₂ as are those for capture and storage.

1203 Structural Basis of Transcription: Backtracked RNA Polymerase II at 3.4 Angstrom Resolution
D. Wang et al.
A backtracked RNA polymerase II reveals how the enzyme proofreads the RNA transcript.

1207 High-Frequency, Long-Range Coupling Between Prefrontal and Visual Cortex During Attention
G. G. Gregoriou et al.
Synchrony in neuronal firing within a specific frequency range may regulate interactions between brain structures.

1210 Genome-Wide Identification of Human RNA Editing Sites by Parallel DNA Capturing and Sequencing
J. B. Li et al.
Hundreds of new RNA editing sites are identified in the human genome.

1212 Unstable Tandem Repeats in Promoters Confer Transcriptional Evolvability
M. D. Vinces et al.
Unstable repetitive DNA in the control regions of yeast genes modulates the evolution of chromatin structure and gene expression.

CONTENTS continued
Surface Magnetism in Apparent Solar Oblateness Due to IL-21R on T Cells Is Critical for Sustained Functional integrity and Control of Chronic Viral Infection

Thymus cells of the immune system require the cytokine interleukin-21 to control chronic viral infections.

Structure and Mechanism of an Amino Acid Antipporter

Escherichia coli survive the acidic conditions of the stomach.

Ventral Tegmental Area BDNF Induces an Opiate-Dependent–Like Reward State in Naïve Rats

A growth factor involved in neuronal plasticity alters neurons in a specific area of the brain after chronic exposure to opioid drugs.
