REVIEW
1284 Disulfide Formation in the ER and Mitochondria: Two Solutions to a Common Process
J. Riemer et al.

BREVIA
1288 Anthropogenic Impacts on Nitrogen Isotopes of Ice-Core Nitrate
M. G. Hastings et al.
The isotopic composition of nitrogen in nitrate deposited in Greenland has changed markedly over the past 150 years.

RESEARCH ARTICLES
1289 Regulation of Hypoxia-Inducible Factor 2α Signaling by the Stress-Responsive Deacetylase Sirtuin 1
E. M. Doum et al.
A deacetylase implicated in aging directly regulates a transcription factor that controls stress-responsive genes.
>> Perspective p. 1281
1293 Did Warfare Among Ancestral Hunter-Gatherers Affect the Evolution of Human Social Behaviors?
S. Bowles
Prehistoric conflict among humans could have favored the survival of groups containing altruists.
>> Perspective p. 1280

REPORTS
1298 Late Pleistocene Demography and the Appearance of Modern Human Behavior
A. Powell et al.
Population size and migration account for modern human behavior appearing in Africa about 90,000 years ago but much later across Europe.
>> Perspective p. 1280
1302 Pd-Pt Bimetallic Nanodendrites with High Activity for Oxygen Reduction
B. Lim et al.
The catalytic activity of platinum is enhanced through a growth process that creates nanocrystals with high surface area.
1306 Natural Quasicrystals
L. Bindi et al.
A sample of the mineral khatyrkite contains quasicrystals, which are ordered but lack the translational symmetry of crystals.
1309 Observation of Single Colloidal Platinum Nanocrystal Growth Trajectories
H. Zheng et al.
Transmission electron microscopy provides details of the growth mechanisms of platinum nanocrystals in solution.
>> Perspective p. 1276
1312 Large-Area Synthesis of High-Quality and Uniform Graphene Films on Copper Foils
X. Li et al.
Predominantly single-layer graphene films grow in a self-limited manner on copper and can be transferred to other substrates.
1314 Superconductivity at the Two-Dimensional Limit
S. Qin et al.
Superconductivity persists in lead films down to just two monolayers thick.
1318 Social Transmission of a Host Defense Against Cuckoo Parasitism
N. B. Davies and J. A. Welbergen
Social learning and predisposition explains why reed warblers mob parasitic cuckoos but not innocuous parrots.
1320 Epigenetic Temporal Control of Mouse Hox Genes in Vivo
N. Soshnikova and D. Duboule
A time-dependent transition in chromatin modifications parallels the sequential activation of genes involved in embryo organization.
1323 McsB Is a Protein Arginine Kinase That Phosphorylates and Inhibits the Heat-Shock Regulator CtsR
J. Fuhrmann et al.
A protein kinase can specifically target arginine residues in a transcription factor to regulate its DNA binding.
1327 Rhes, a Striatal Specific Protein, Mediates Mutant-Huntingtin Cytotoxicity
S. Subramaniam et al.
A small G protein localized in the brain striatum may explain the localized neurodegeneration observed in Huntington’s disease.
1330 Mechanoenzymatic Cleavage of the Ultralarge Vascular Protein von Willebrand Factor
X. Zhang et al.
Mechanical forces regulate the length of von Willebrand factor multimers and thus regulate thrombogenic potential.
>> Perspective p. 1278
1334 Halofuginone Inhibits T_{H17} Cell Differentiation by Activating the Amino Acid Starvation Response
M. S. Sundrud et al.
Activation of the amino acid starvation response inhibits differentiation of a subset of inflammatory T cells.
>> Perspective p. 1282
1338 Endogenous Activation Patterns of Cdc42 GTPase Within Drosophila Embryos
D. Kamiyama and A. Chiba
Bioprobe imaging reveals precise patterns of activation for a signaling protein in the neurons of intact animals.

Amplified Trace Gas Removal in the Troposphere
A. Hofzumahaus et al.

A yet undescribed pathway for hydroxyl radical production is needed to account for reaction rates of highly polluted air. 10.1126/science.1164566

Extending Universal Nodal Excitations Optimizes Superconductivity in Bi$_2$Sr$_2$CaCu$_2$O$_{8+\delta}$
A. Pushp et al.

Scanning tunneling spectroscopy reveals strong electronic correlations in the insulating state of a cuprate superconductor. 10.1126/science.1174338

Auxin-Dependent Patterning and Gamete Specification in the Arabidopsis Female Gametophyte
G. C. Pagnussat et al.

An auxin gradient is involved in cell fate specification of the female sex cells in flowering plants. 10.1126/science.1167324

IRAP Identifies an Endosomal Compartment Required for MHC Class I Cross-Presentation
L. Saveau et al.

Immunological dendritic cells contain an endocytic compartment involved in the cross-presentation of internalized antigens. 10.1126/science.1172845

RIP3, an Energy Metabolism Regulator That Switches TNF-Induced Cell Death from Apoptosis to Necrosis
D.-W. Zhang et al.

The protein kinase RIP3 mediates necrotic cell death, likely through regulation of metabolic enzymes. 10.1126/science.1172308

Highlights From Our Daily News Coverage

Thin the Air, Save the Biosphere?
A team suggests a way to prevent plant Armageddon.

Embryonic-Like Cells Advance Toward Disease Treatment
Researchers find ways to increase safety and to generate genetically tailored cells.

A Billion-Year Hard Drive
A new process could preserve digital data, essentially forever.

SCIENCE SIGNALING
www.sciencesignaling.org

The Signal Transduction Knowledge Environment

RESEARCH ARTICLE: Involvement of the Protein Kinase CK2 in the Regulation of Mammalian Circadian Rhythms
Y. Tsuchiya et al.

Protein kinase CK2 promotes PERIOD2 degradation and modulates the mammalian circadian clock.

PERSPECTIVE: Allosteric Effects Govern Nuclear Receptor Action—DNA Appears as a Player
H. Gronemeyer and W. Bourguet

DNA sequences regulate glucocorticoid receptor activity.

Science Policy News and Analysis

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2009 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (US issued): $114 (114 dollars at subscription). Domestic institutional subscription (US issued): $161. Foreign postage extra: Mexico, Caribbean surface mail 155; other countries (air assist delivery) 385. First class, airport, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #12548-0122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 65378, Washington, DC 20090-6178. Single-copy sales: $10.00 current issue, $15.00 back issue prepaid includes surface postage, bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $20.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
